

The Edge-to-Cloud Company

Delivering Exceptional Experiences with a Differentiated Portfolio

HPE delivers unique, open, and intelligent technology solutions as a service – spanning Cloud Services, Compute, High Performance Computing & AI, Intelligent Edge, Software, and Storage – with a consistent experience across all clouds and edges, helping customers develop new business models, engage in new ways, and increase operational performance.

Strategic partner to accelerate digital transformations

HPE helps organizations drive outcomes by unlocking value from all of their data, everywhere, with businesses aligned to customer needs

Compute: Offers both general purpose servers for multi-workload computing and workload optimized servers to deliver the best performance and value for demanding applications.

Storage: Offers storage as-a-service and cloud data services with portfolio offerings like primary storage, hyper-converged infrastructure, disaster and ransomware recovery, big data solutions, management offerings, and storage for unstructured data and analytics workloads, plus traditional tape, storage networking, and disk products.

HPE Services: Advises on digital transformation, designs IT solutions and helps businesses consume IT as-a-service.

HPC & AI: Delivers standard and custom hardware, software, and data-management solutions designed to support supercomputers, high-performance compute, converged edge systems, and data-intensive workloads like data analytics and artificial intelligence applications.

Intelligent Edge: Operates platforms and services at network edges, connecting devices and applications via Aruba solutions such as wired and wireless local area network, campus and data center switching, software-defined wide area networking, and network security.

HPE GreenLake Cloud Services: Provides customers with a consistent cloud experience for all applications and data wherever they live: at the edge, data center, colocation facility or across public clouds.

HPE Financial Services: Serves as the financial engine behind HPE's offerings to provide financial solutions including leasing offers, asset management, and asset upcycling.
