

# Product End-of-Life Disassembly Instructions

**Product Category:** Networking Equipment

**Marketing Name / Model**

**[List multiple models if applicable.]**

HP A12518 Switch Chassis (JF430C)

**Purpose:** The document is intended for use by end-of-life recyclers or treatment facilities. It provides the basic instructions for the disassembly of HP products to remove components and materials requiring selective treatment, as defined by EU directive 2002/96/EC, Waste Electrical and Electronic Equipment (WEEE).

## 1.0 Items Requiring Selective Treatment

1.1 Items listed below are classified as requiring selective treatment.

1.2 Enter the quantity of items contained within the product which require selective treatment in the right column, as applicable.

Item Description	Notes	Quantity of items included in product
Printed Circuit Boards (PCB) or Printed Circuit Assemblies (PCA)	With a surface greater than 10 sq cm	36
Batteries	All types including standard alkaline and lithium coin or button style batteries	1
Mercury-containing components	For example, mercury in lamps, display backlights, scanner lamps, switches, batteries	0
Liquid Crystal Displays (LCD) with a surface greater than 100 sq cm	Includes background illuminated displays with gas discharge lamps	0
Cathode Ray Tubes (CRT)		0
Capacitors / condensers (Containing PCB/PCT)		0
Electrolytic Capacitors / Condensers measuring greater than 2.5 cm in diameter or height		30
External electrical cables and cords		7
Gas Discharge Lamps		0
Plastics containing Brominated Flame Retardants weighing > 25 grams (not including PCBs or PCAs already listed as a separate item above)		4
Components and parts containing toner and ink, including liquids, semi-liquids (gel/paste) and toner	Include the cartridges, print heads, tubes, vent chambers, and service stations.	0
Components and waste containing asbestos		0
Components, parts and materials containing refractory ceramic fibers		0

Components, parts and materials containing radioactive substances		0
---	--	---

## 2.0 Tools Required

List the type and size of the tools that would typically be used to disassemble the product to a point where components and materials requiring selective treatment can be removed.

Tool Description	Tool Size (if applicable)
Phillips Screwdriver	2 #
Phillips Screwdriver	1 #
Flathead Screwdriver	
Screwdriver for outside hexagon screws	
Diagonal Pliers	

## 3.0 Product Disassembly Process

3.1 List the basic steps that should typically be followed to remove components and materials requiring selective treatment:

1. Unscrew the screws on mounting angle 2, and then remove mounting angle 2 from the chassis.
2. Unscrew the screws on front panel 3, and then remove front panel 3 from the chassis.
3. Unscrew the screws on front panel 4, and then remove front panel 4 from the chassis.
4. Unscrew the screws on front panel 5, and then remove front panel 5 from the chassis.
5. Unscrew the screws on front panel 6, and then remove front panel 6 from the chassis.
6. Unscrew the screws on plastic panel 7, and then remove plastic panel 7 from the chassis.
7. Remove plastic panel 8 from the chassis.
8. Remove plastic panel 9 from the chassis.
9. Remove plastic panel 10 from the chassis.
10. Unscrew the screws on cable management bracket 11, and then remove cable management bracket 11 from the chassis
11. Remove film 12 from the chassis.
12. Remove PSU 13 from the chassis.
13. Unscrew the screws on PMU 14, and then remove PMU 14 from the chassis.
14. Remove film 15 from the chassis.
15. Unscrew the screws on power cable holder 17, and then remove power cable holder 17 from the chassis.
16. Unscrew the screws on PEM 18, and then remove PEM 18 from the chassis.
17. Unscrew the screws on rear cover 19, and then remove rear cover 19 from the chassis.
18. Unscrew the screws on fan tray 20, and then remove fan tray 20 from the chassis.
19. Unscrew the screws on panel 21, and then remove panel 21 from the chassis.
20. Unscrew the screws on panel 22, and then remove panel 22 from the chassis.
21. Unscrew the screws on panel 23, and then remove panel 23 from the chassis.
22. Unscrew the screws on part 24, and then remove part 24 from the chassis.
23. Unscrew the screws on part 25, and then remove part 25 from the chassis.
24. Unscrew the screws on part 26, and then remove part 26 from the chassis.
25. Unscrew the screws on part 27, and then remove part 27 from the chassis.
26. Unscrew the screws on part 28, and then remove part 28 from the chassis.
27. Unscrew the screws on part 29, and then remove part 29 from the chassis.
28. Unscrew the screws on part 30, and then remove part 30 from the chassis.
29. Remove all of the inner cables from the chassis.
30. Unscrew the screws on backboard 31, and then remove backboard 31 from the chassis.
31. Unscrew the screws on panel 32, and then remove panel 32 from the chassis.
32. Unscrew the screws on power shelf 16, and then remove power shelf 16 from the chassis.
33. Remove all of the EMI fingers from the chassis.
34. Unscrew the screws on PCB 3-1, and then remove PCB 3-1 from the front panel 3.
35. Unscrew the screws on PCB 3-2, and then remove PCB 3-2 from the front panel 3.
36. Unscrew the screws on PCB 3-3, and then remove PCB 3-3 from the front panel 3.

37. Remove hole plugs 3-4 from the front panel 3.
38. Remove film 3-5 from the front panel 3.
39. Remove EMI finger 3-6 from the front panel 3.
40. Unscrew the screws on PCB 4-1, and then remove PCB 4-1 from the front panel 4.
41. Unscrew the screws on PCB 4-2, and then remove PCB 4-2 from the front panel 4.
42. Unscrew the screws on part 4-3, and then remove part 4-3 from the front panel 4.
43. Unscrew the screws on PCB 4-4, and then remove PCB 4-4 from the front panel 4.
44. Remove film 4-5 from the front panel 4.
45. Remove EMI finger 4-6 from the front panel 4.
46. Remove film 5-1 from the front panel 5.
47. Remove EMI finger 5-2 from the front panel 5.
48. Unscrew the screws on air filter 7-1, and then remove air filter 7-1 from the plastic panel 7.
49. Unscrew the screws on hinge 7-2, and then remove hinge 7-2 from the plastic panel 7.
50. Unscrew the screws on part 11-1, and then remove part 11-1 from the cable management bracket 11.
51. Unscrew the screws on part 11-2, and then remove part 11-2 from the cable management bracket 11.
52. Unscrew the screws on part 11-3, and then remove part 11-3 from the cable management bracket 11.
53. Unscrew the screws on part 14-1, and then remove part 14-1 from PMU 14.
54. Remove the inner cable from PMU 14.
55. Unscrew the screws on PCB 14-2, and then remove PCB 14-2 from PMU 14.
56. Remove part 14-3 from PMU 14.
57. Remove film 14-4 from PMU 14.
58. Unscrew the screws on part 17-1, and then remove part 17-1 from the power cable holder 17.
59. Unscrew the screws on part 17-2, and then remove part 17-2 from the power cable holder 17.
60. Unscrew the screws on part 18-1, and then remove part 18-1 from the PEM 18.
61. Disconnect the inner cable 18-2 from plug receptacle 18-4.
62. Unscrew the screws on panel 18-3, and then remove panel 18-3 from the PEM 18.
63. Unscrew the screws on plug receptacle 18-4, and then remove plug receptacle 18-4 from the panel 18-3.
64. Unscrew the screws on inner cable 18-2, and then remove inner cable 18-2 from the part 18-6.
65. Unscrew the screws on part 18-5, and then remove part 18-5 from the part 18-6.
66. Unscrew the screws on protection cover 20-1, and then remove protection cover 20-1 from the fan tray 20.
67. Unscrew the screws on protection cover 20-2, and then remove protection cover 20-2 from the fan tray 20.
68. Unscrew the screws on fan 20-3, and then remove fan 20-3 from the fan tray 20.
69. Unscrew the screws on PCB 20-4, and then remove PCB 20-4 from the fan tray 20.
70. Remove film 20-5 from the fan tray 20.
71. Remove EMI finger 20-6 from the fan tray 20.
72. Unscrew the screws on PCB 21-1, and then remove PCB 21-1 from the panel 21.
73. Remove film 21-2 from the panel 21.
74. Remove EMI finger 21-3 from the panel 21.
75. Remove film 22-1 from the panel 22.
76. Remove EMI finger 21-2 from the panel 22.
77. Unscrew the screws on top cover 16-1, and then remove top cover 16-1 from the power shelf 16.
78. Remove switch cable from the rocker switch 16-8.
79. Unscrew the screws on rear cover 16-2, and then remove rear cover 16-2 from the power shelf 16.
80. Unscrew the screws on bracket 16-3, and then remove bracket 16-3 from the power shelf 16.
81. Unscrew the screws on PCB 16-4, and then remove PCB 16-4 from the bracket 16-3.
82. Unscrew the screws on conflux plate 16-5, and then remove conflux plate 16-5 from the bracket 16-3.
83. Unscrew the screws on PCB 16-6, and then remove PCB 16-6 from the bracket 16-3.
84. Remove insulation pad 16-7 from the bracket 16-3.
85. Remove rocker switch 16-8 from the power shelf 16.
86. Unscrew the screws on handle 16-9, and then remove handle 16-9 from the power shelf 16.
- 87.

3.2 Optional Graphic. If the disassembly process is complex, insert a graphic illustration below to identify the items contained in the product that require selective treatment (with descriptions and arrows identifying locations).
