

# Product End-of-Life Disassembly Instructions

Product Category: Networking Equipment

Marketing Name / Model

[List multiple models if applicable.]

HP ProCurve 10GbE 2-Port SFP+/2-Port CX4 yl Module ( J9312A)

**Purpose:** The document is intended for use by end-of-life recyclers or treatment facilities. It provides the basic instructions for the disassembly of HP products to remove components and materials requiring selective treatment, as defined by EU directive 2002/96/EC, Waste Electrical and Electronic Equipment (WEEE).

## 1.0 Items Requiring Selective Treatment

1.1 Items listed below are classified as requiring selective treatment.

1.2 Enter the quantity of items contained within the product which require selective treatment in the right column, as applicable.

Item Description	Notes	Quantity of items included in product
Printed Circuit Boards (PCB) or Printed Circuit Assemblies (PCA)	With a surface greater than 10 sq cm PCA, Pygmy- 1no.	1
Batteries	All types including standard alkaline and lithium coin or button style batteries Nil	0
Mercury-containing components	For example, mercury in lamps, display backlights, scanner lamps, switches, batteries Nil	0
Liquid Crystal Displays (LCD) with a surface greater than 100 sq cm	Includes background illuminated displays with gas discharge lamps Nil	0
Cathode Ray Tubes (CRT)	Nil	0
Capacitors / condensers (Containing PCB/PCT)	Nil	0
Electrolytic Capacitors / Condensers measuring greater than 2.5 cm in diameter or height	Nil	0
External electrical cables and cords	CABLE-ASSEMBLY CX4 16-PIN	1
Gas Discharge Lamps	Nil	0
Plastics containing Brominated Flame Retardants	Nil	0
Components and parts containing toner and ink, including liquids, semi-liquids (gel/paste) and toner	Include the cartridges, print heads, tubes, vent chambers, and service stations.	0
Components and waste containing asbestos	Nil	0
Components, parts and materials containing refractory ceramic fibers	Nil	0
Components, parts and materials containing	Nil	0

radioactive substances

## 2.0 Tools Required

List the type and size of the tools that would typically be used to disassemble the product to a point where components and materials requiring selective treatment can be removed.

Tool Description	Tool Size (if applicable)
Torx driver (standard)	T10, T15 & T20
Small adjustable wrench	5mm

## 3.0 Product Disassembly Process

3.1 List the basic steps that should typically be followed to remove components and materials requiring selective treatment:

1. Unfasten two screws from Bulkhead and remove the PCA
- 2.
- 3.
- 4.
- 5.
- 6.
- 7.
- 8.

3.2 Optional Graphic. If the disassembly process is complex, insert a graphic illustration below to identify the items contained in the product that require selective treatment (with descriptions and arrows identifying locations).
