

Product End-of-Life Disassembly Instructions

Product Category: Networking Equipment

Marketing Name / Model

[List multiple models if applicable.]

S1500-48P

S1500-24P

S1500-12P

Name / Model #4

Name / Model #5

Purpose: The document is intended for use by end-of-life recyclers or treatment facilities. It provides the basic instructions for the disassembly of HPE products to remove components and materials requiring selective treatment, as defined by EU directive 2002/96/EC, Waste Electrical and Electronic Equipment (WEEE).

1.0 Items Requiring Selective Treatment

1.1 Items listed below are classified as requiring selective treatment.

1.2 Enter the quantity of items contained within the product which require selective treatment in the right column, as applicable.

Item Description	Notes	Quantity of items included in product
Printed Circuit Boards (PCB) or Printed Circuit Assemblies (PCA)	With a surface greater than 10 sq cm	3
Batteries	All types including standard alkaline and lithium coin or button style batteries	0
Mercury-containing components	For example, mercury in lamps, display backlights, scanner lamps, switches, batteries	0
Liquid Crystal Displays (LCD) with a surface greater than 100 sq cm	Includes background illuminated displays with gas discharge lamps	0
Cathode Ray Tubes (CRT)		0
Capacitors / condensers (Containing PCB/PCT)		0
Electrolytic Capacitors / Condensers measuring greater than 2.5 cm in diameter or height		0
External electrical cables and cords		0
Gas Discharge Lamps		0
Plastics containing Brominated Flame Retardants weighing > 25 grams (not including PCBs or PCAs already listed as a separate item above)		0
Components and parts containing toner and ink, including liquids, semi-liquids (gel/paste) and toner	Include the cartridges, print heads, tubes, vent chambers, and service stations.	0
Components and waste containing asbestos		0
Components, parts and materials containing refractory ceramic fibers		0

Item Description	Notes	Quantity of items included in product
Components, parts and materials containing radioactive substances		0

2.0 Tools Required

List the type and size of the tools that would typically be used to disassemble the product to a point where components and materials requiring selective treatment can be removed.

Tool Description	Tool Size (if applicable)
Philips screwdriver	No.1
Philips screwdriver	No.2
Description #3	
Description #4	
Description #5	

3.0 Product Disassembly Process

3.1 List the basic steps that should typically be followed to remove components and materials requiring selective treatment:

1. Remove the top cover.
2. Remove the front bezel.
3. Remove the air baffle.
4. Uninstall the power supply unit.
5. Uninstall the console board.
6. Uninstall the main board.
7. Remove the fan module.
8. Uninstall the LED board.
- 9.

3.2 Optional Graphic. If the disassembly process is complex, insert a graphic illustration below to identify the items contained in the product that require selective treatment (with descriptions and arrows identifying locations).

-
- This exploded view diagram illustrates the assembly of the ARUPA network switch. The components are labeled with callouts as follows:
- Top Cover:** Labeled with 'ARUPA network' and callouts 1, 2, 3, 4, and 1)*4.
 - Internal Components:**
 - Callout (9)*8 points to the top internal assembly.
 - Callout (9)*7 points to the middle internal assembly.
 - Callout (19) points to the bottom internal assembly.
 - Callout (8) points to a side component.
 - Callout (9)*3 points to a component near the bottom right.
 - Callout (9)*2 points to a component near the bottom right.
 - Callout (24) points to a small component.
 - Callout (11)*2 points to a component near the bottom right.
 - Callout (11)*3 points to a component near the bottom right.
 - Callout (9)*2 points to a component near the bottom right.
 - Callout (7) points to the bottom rail assembly.
 - Front Panel/Ports:**
 - Callout (12)*2 points to a component near the front panel.
 - Callout (10)*8 points to a component near the front panel.
 - Callout (13) points to a component near the front panel.
 - Callout (11) points to a component near the front panel.
 - Callout (3) points to a component near the front panel.
 - Callout (2) points to a component near the front panel.
 - Callout (11)*3 points to a component near the front panel.
 - Callout (1)*2 points to a component near the front panel.
 - Callout (5) points to a component near the front panel.

Template Revision A

Air baffle screws

4. Uninstall the power supply unit.

Screws on PSU

5. Uninstall the console board.

6. Uninstall the main board.

7. Remove the fan module.

8. Uninstall the LED board.
