

Achieve integrated compliance with HPE Data Center Automation Suite

IT security compliance requirements are exploding in today's application economy.

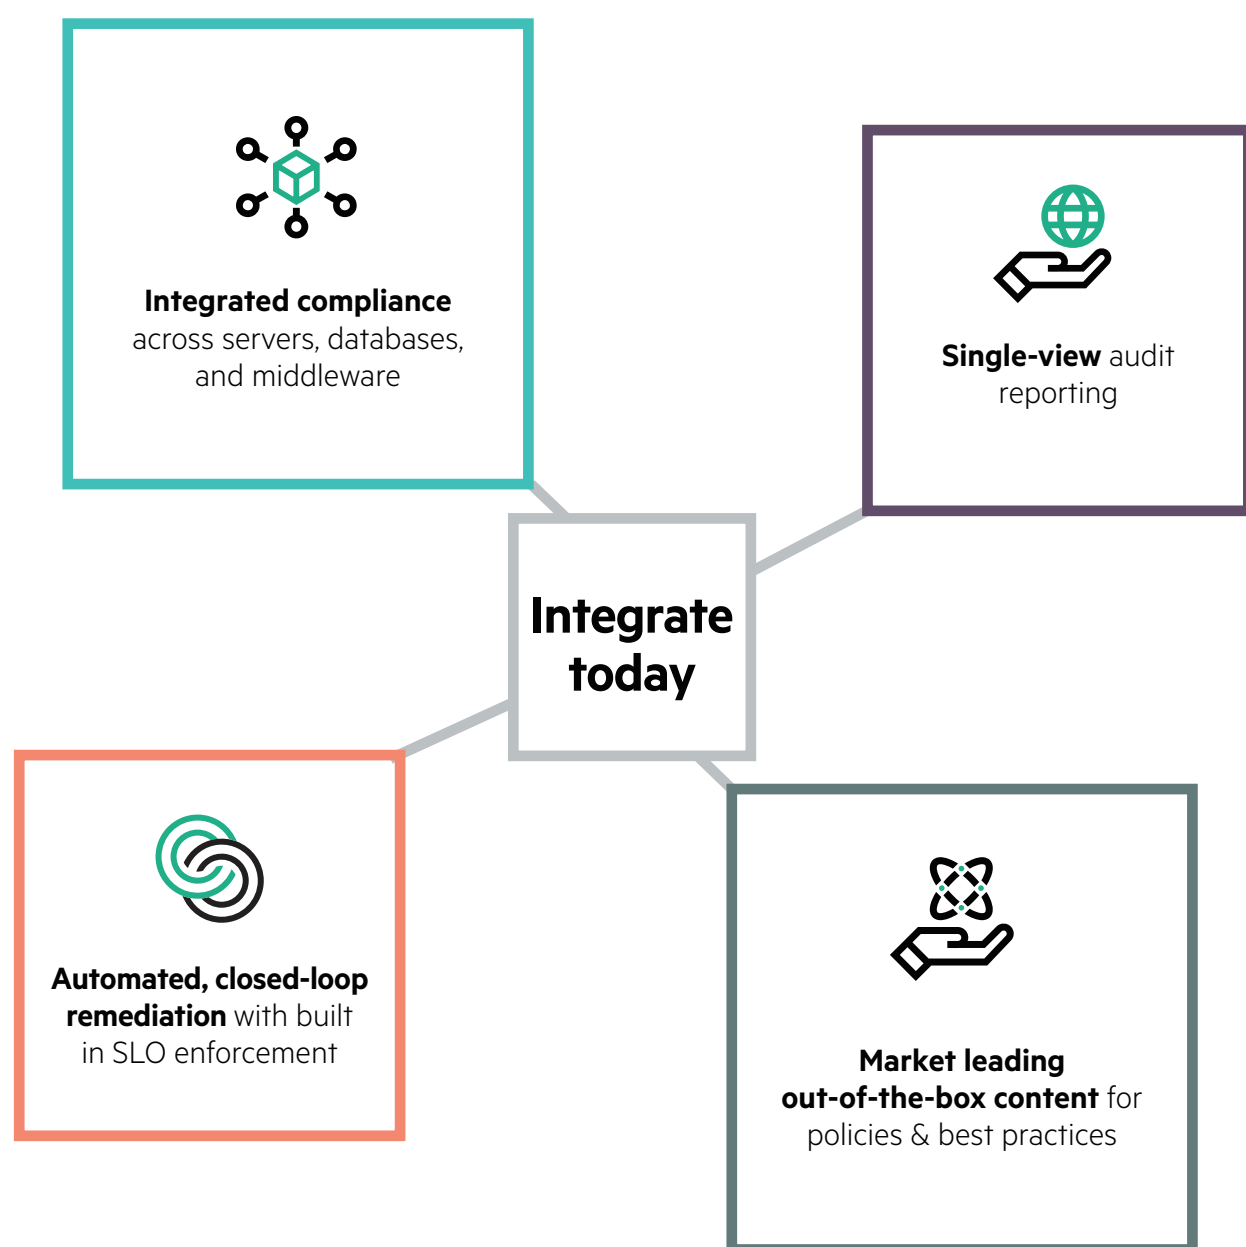

Compliance is complicated and costly.

And compliance and audit processes are inefficient and timely.

- Difficult to see the complete picture
- No control of time or criticality
- Lag to remediate, often manual
- Silo'd processes across teams and tools

What's needed to achieve integrated IT compliance management?

With integrated compliance, say good-bye to audit anxiety.
