

Getting started with IT process automation

Invest 2 hours today. See benefits in less than 30 days.

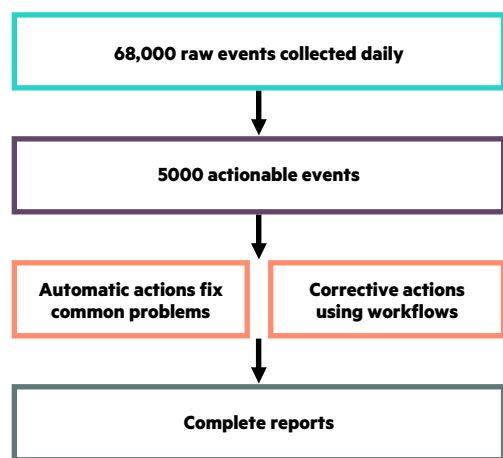

Operations orchestration is the coordination of automated tasks across teams, tools, and environments.

HPE Operations Orchestration Community Edition (OO-CE) software is a quick-start IT process automation solution. It automates and orchestrates incident remediation, service request fulfillment, and other processes.

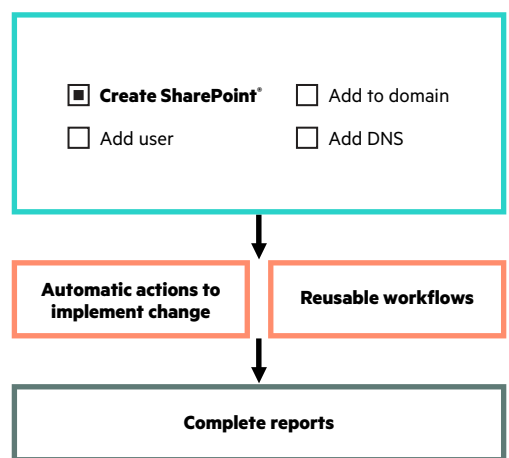

Self-healing incident remediation

The HPE Operations Orchestration environment automatically takes the steps necessary to identify and diagnose the problem—remediating many event alerts without staff intervention.

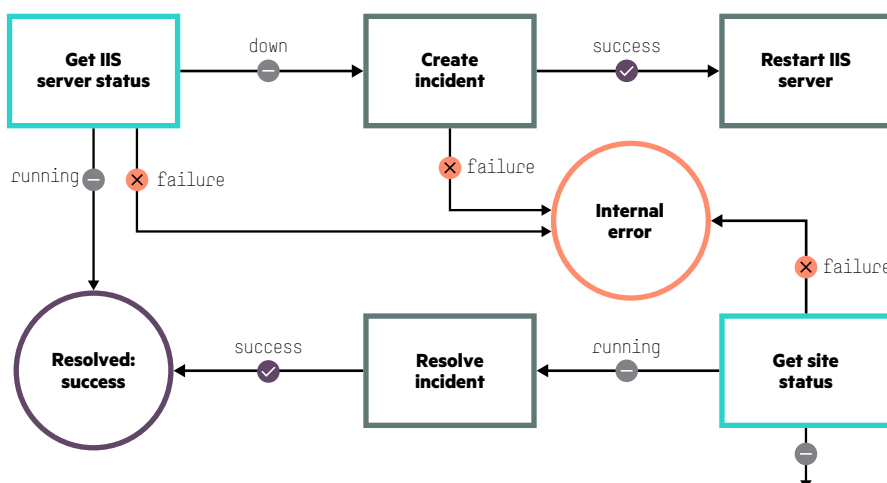

Fast service request fulfillment

The HPE Operations Orchestration environment coordinates automated actions across groups, tools, applications, and cloud providers. Services are fulfilled with the click of the button.

Workflows: design, deploy, run, report

HP OO-CE allows you to design new flows, customize out-of-the-box flows, and leverage flows from the HPE OO community, as well as deploy, run, and report on flows.

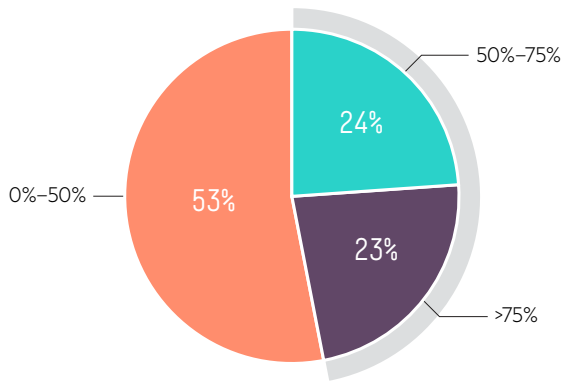

Gain powerful results with HPE OO-CE

Reduce errors

Nearly half of IT organizations reduced errors by 50% or more.

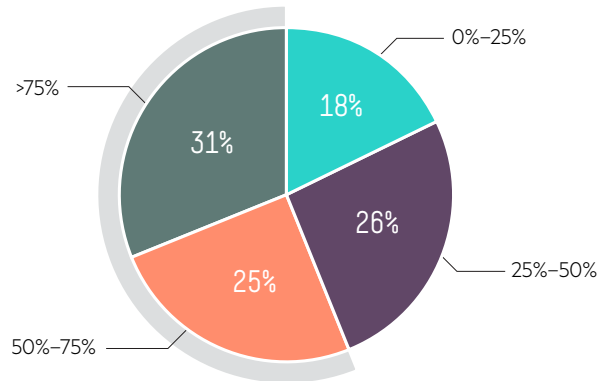

Error reduction with HPE Operations Orchestration

Go faster

The majority of IT organizations reduced task and process execution time by 50% or more.

Time savings

It's easy to get started—and realize benefits

3 easy steps
