# The Cost of Information Governance Non-Compliance

Hewlett Packard Enterprise sponsored an information governance survey across more than 200 compliance professionals in a wide variety of regulated industries, including financial services, government, life sciences, and energy. This landmark research<sup>1</sup> verified that even while scrutiny and sanctions for information non-compliance continue to grow, many organizations lack cohesive **governance strategies**, processes, and solutions.

## Information governance compliance is:

**A contemporary approach**

Let **HPE modular solutions** help you access and understand a wide range of information across a variety of sources and repositories.

+

**Analytical insights**

Understand information in its context and control information with a common policy layer framework for uniform management.

=

**Proactive information governance**

Obtain the ability to proactively manage risk and derive value from all information sources.

Read **The Cost of Information Governance Non-Compliance** to get the full survey results.
