Driving innovation and reliability within your IT infrastructure doesn’t always mean relying solely on new technology. Your technology requirements are unique and may necessitate the combined benefits of both new and legacy equipment. Reliable, Certified Pre-owned equipment can help you tailor your IT lifecycle strategy to extend the life of legacy systems. We can help you achieve your goals at any stage of the IT lifecycle without sacrificing time, money, progress, or corporate social responsibilities.

**HPE Certified Pre-owned products**

Previous generation technology to optimize legacy environments

- Extending the life of legacy applications—mature software applications require replacement hardware of the same vintage to assure performance without the need for testing
- Supporting Business Continuity or Disaster Recovery (BCDR) plans—replicas of original infrastructure are required when continuity plans include failover to alternate sites
- Applications testing facilities—isolated test environments will safely model configuration changes before being rolled out to the main infrastructure
- Support appliances and systems beyond manufacturing life—appliances, control systems, and other solutions that include embedded previous-generation products do not require re-qualification for new-generation components
- Temporary IT initiatives and operations—systems can be rented for short-term needs

**Trusted HPE products for any scenario**

Previous generation technology is perfectly suited for a variety of business scenarios:

- Extending the life of legacy applications—mature software applications require

HPE Financial Services can help customers find new ways to plan for, acquire, consume and adapt the technology systems needed for business transformation.
or seasonal increase in capacity, providing both financial and infrastructure flexibility.

In all of these scenarios, we will work with you to review your existing infrastructure, identify the required components, and develop a plan to meet your needs. The equipment is then custom-configured, tested, and certified using HPE proprietary tools and methods.

**Never sacrificing reliability, flexibility, or quality**

Our expert engineers, many with over 30 years of experience in the industry, will work with you to custom-configure an HPE Pre-owned solution with reliable, fully-tested HPE data center equipment.

We can provide:

- Trained technical assistance configuring your order to help you assure compatibility with your existing IT investment
- Production processes assuring orders are accurately filled according to your specified requirements
- A minimum 30-day return to factory warranty, with a one year OEM warranty included on configured data center equipment
- Custom support contracts that match the support terms to the existing environment
- Align to sustainability and environment initiatives by extending the lifecycle of technology and minimizing waste
- Virtual Warehouse capability to maintain equipment stock in a secure, dedicated HPE warehouse, minimizing the need for on-site storage of unused equipment
- Global logistics to ensure systems or components are delivered where, and when, they are needed

As an added measure of reliability, we also offer HPE Certified Pre-Owned data center equipment, many of which include a one-year, onsite Original Equipment Manufacturer (OEM) backed warranty.

---

**HPE Certified Pre-owned products include:**

- HPE ProLiant servers, blade servers, enclosures
- HPE Aruba and Procurve networking
- HPE Integrity
- HPE-UX
- HPE Storage MSA, EVA, 3PAR, and D2D backup
- HPE Tape Systems
- HPE Networking products, switches
- DIGITAL parts and systems, including VAX
- AlphaServer/TM systems
- Parts (memory, componentry, and more)
- Some third-party products are also available

Because your infrastructure needs are unique, it is important to have a large inventory of technology available. We have an extensive inventory of enterprise equipment in our warehouses dating from 18 months to 25 years out of production.
