Achieve top performance and flexibility for mission-critical workloads
HPE GreenLake for SAP HANA

Real-time data, coupled with immediate analytics, is fueling the digital transformation of today’s enterprises. Organizations that have invested in the SAP® platform recognize the in-memory computing advantages of SAP HANA®. But traditional IT environments were not built to handle the explosive data growth in-memory computing fosters. Success requires an organization to not only migrate to the new platform, but also to restructure its infrastructure and operations to handle exponential growth with the flexibility of pay per use.

To get the most out of your SAP HANA platform, the infrastructure that supports it must address rigorous availability, security, and reliability standards, which often span on-premises, hybrid architectures, and even multiple clouds. It’s no surprise then that HPE is a market leader, with more than 2400 customers running SAP HANA on HPE, and over 12,000 SAP HANA servers shipped.

Until recently, businesses have focused on building SAP HANA platforms on-site for performance and security purposes, or explored cloud options for greater agility and cost efficiency. While both approaches offer distinct benefits, they also come with trade-offs. The good news is that you no longer have to compromise. HPE raises the bar by providing an on-premises pay-per-use solution for SAP HANA. It’s called HPE GreenLake for SAP HANA, and it delivers all the convenience of consumption-based IT with the control, security, and performance of an on-premises solution you can evolve for future needs.

Both enterprises and service providers win with a solution that lets you focus valuable resources on getting the most out of SAP HANA, while freeing you from the worries of SAP HANA implementation, provisioning, and maintenance of the underlying infrastructure.

HPE GreenLake for SAP HANA

Get it all—SAP HANA design, implementation, performance, security, and control—for your mission-critical data. HPE GreenLake for SAP HANA offers a fully managed on-premises appliance with the right-sized SAP-certified hardware, operating system, and services to meet workload performance and availability objectives. This solution is designed, implemented, and operated by HPE Pointnext, the leading supplier of SAP infrastructure services.

Gain superior performance by running your mission-critical workloads on some of the biggest and fastest bare metal appliances available today. Deploying HPE GreenLake for SAP HANA reduces much of the complexity surrounding SAP HANA implementation and operation. HPE Pointnext, the services organization of Hewlett Packard Enterprise, helps you become a faster, smarter competitor with a broad range of advisory and operations expertise and optional SAP HANA data and analytics services to optimize and evolve your SAP HANA environment. Hardware, software, and services are also aligned into a single, unique pay-per-use metric for simplified billing. The billing unit is based on gigabytes used by your SAP environment, offering a simple outcome-based metric that’s aligned with your business needs.
Benefits of HPE GreenLake for SAP HANA

**Faster time to value**
- Complete, built-for-purpose solutions optimized for SAP HANA with certified SAP hardware from HPE
- Faster deployment with reference architectures and expertise from HPE Pointnext

**Better economics**
- Flexible pay-per-use model based on gigabytes used by SAP HANA
- Up to 38% reduction in infrastructure costs with active capacity management
- Costs on par with public cloud

**Proper control**
- On-premises solution for security, compliance, and data sovereignty needs
- Exceptional performance with fine-tuned SAP environment from HPE Pointnext
- Less business risk and higher levels of continuity and availability for SAP HANA

**Simplified IT**
- SAP HANA infrastructure managed and operated for you

**The HPE Pointnext advantage**
HPE Pointnext, the services organization of Hewlett Packard Enterprise, brings you the expertise needed to help you make Hybrid IT simple and move you to true consumption-based IT on-premises. Combined with HPE heritage and leadership in consumption based IT, strength in infrastructure, and partner ecosystems, HPE Pointnext professionals can help you deliver better outcomes faster.
