

ANYTIME, ANYWHERE LEARNING

HPE Digital Learner

90%

of staff are impacted by digital
transformation.¹

60%

of total U.S. workforce will be mobile
workers by 2024.²

“People are the make-or-break element of a high-performing IT organization. There is simply no replacement for people with the right skills, attitudes, and traits. CIOs don’t have the luxury of hiring a totally new roster of people with ‘the right stuff,’ so now, more than ever, CIOs must develop the skills they need in order to keep up with the fast-paced changes in the technology landscape.”³

PREPARE YOUR WORKFORCE TO MEET TODAY’S CHALLENGES

IT demands—compounded by unprecedented times and rapid technology change—are at an all-time high. Digital transformation has accelerated to accommodate e-commerce and virtual work environments. Economic and market pressures have demanded that organizations tackle multiple technology challenges simultaneously. To do this, resources—budget, staff, time, and technology—must be prioritized to do **more with less**.

With shifting work environments, organizations need solutions to keep employees connected, productive, and secure. Cybersecurity has become increasingly more urgent due to the proliferation of connected devices and edge computing. To maintain business continuity, organizations require secure, resilient infrastructures—but equally important, they need well-prepared employees and best practices to effectively use and leverage technology investments.

In the face of rapidly evolving technology and accelerated digital transformation, skills obsolescence and skills attrition have led to an unprecedented shortage of IT talent. The competition for skilled IT resources is intense, and organizations must find a way to differentiate themselves to retain, develop, and attract the best talent.

In addition, the composition of the workforce is evolving. The workforce in general, and IT in particular, is increasingly dominated by millennials. Millennials work, think, consume information, and learn differently from past generations. They demand more from digital systems and business processes and are less forgiving of companies that struggle to be progressive. They expect their jobs—and their learning—to accommodate lifestyle choices and work-life balance. They expect the information (and instruction) they need to be easily accessible—when and where they need it.

These demands pose great challenges—and present great opportunity. Effective and efficient use of technology is key to survive—and thrive—in the current environment. To get the most from technology investment—and to future-proof your workforce—organizations need an anytime, anywhere approach to learning and skills development.

Successful organizations are turning to subscription-based learning-as-a-service solutions to tackle these challenges. Learning as a service provides a continuous learning channel for agile, anytime, anywhere learning to prevent skills obsolescence/attrition, maximize return on technology investment, achieve successful business outcomes, and gain competitive advantage.

HPE Digital Learner

- Continuous learning channel; anytime, anywhere learning
- Modern digital platform
- Extensive digital learning content
 - HPE technology library
 - Industry libraries including Technology and Developer, Productivity and Collaboration, Business Skills, Digital Transformation, Leadership Development
- Simulated and hands-on labs
- Virtual instructor-led training option
- Ask an instructor
- Learner boosts
- Digital badging
- Metrics and reporting
- Community experience

HPE can help

For decades, Hewlett Packard Enterprise has helped transform organizations through a learning culture that drives business readiness, growth, innovation, talent retention, and competitive differentiation. With HPE Digital Learner, HPE offers a learning-as-a-service approach that delivers right-sized learning programs to address current and evolving skills development needs.

- HPE Digital Learner provides expert, curated eLearning to meet HPE and premier industry training and certification needs, as well as professional development. Our goal is to help organizations protect and grow their businesses and deliver training needed to support infrastructure needs (HPE technologies, security, business continuity, digital transformation, and cloud); emerging technologies (Big Data, DevOps, and blockchain); collaboration and productivity (social media, Adobe, web design); and business skills (business analysis, communication, and project management).
- The subscription-based HPE Digital Learner is an anytime, anywhere continuous learning channel. The subscription provides unlimited access to content throughout the subscription period—without additional cost—keeping training costs predictable and within budget.
- HPE Digital Learner provides a flexible, online learning platform with easy access—anytime, anywhere. It accommodates various skill levels and includes the perfect blend of learning support tools to fit individual schedules, learning styles, and training needs. It includes eLearning, videos, testing, reporting, learning paths, badges, and more.
- Self-paced and modular, HPE Digital Learner provides access to the right training, in the right amount, so learners get the exact training they need—when they need it. The agile nature of our solution provides a reliable, convenient means to build new expertise, refresh existing skills, and cross train employees as needed.
- With HPE Digital Learner, businesses can build competitive skills development programs to help attract, develop, and retain high quality IT and business talent. The flexibility and convenience of HPE Digital Learner means employees gain knowledge and build skills—including certifications—based on their schedule and location preferences. By creating a continuous learning culture, organizations get competent, satisfied, and confident employees—a win-win for both the employer and the individual.
- HPE Digital Learner Gold subscriptions include access to live expert-led training classes conducted through our virtual classroom environment. [Learn more](#) about our virtual instructor-led training (VILT) and other learning resources available through HPE Digital Learner.

“IT organizations that can effectively balance IT professionals’ aspirations with both near-term and long-term strategic objectives will be increasingly successful in achieving the enterprise’s DX objectives.”⁴
