

Create circularity with your end-of-use assets

Take a new approach and find **the untapped value** in your IT estate to power your **business transformation**.

Deliver business value across your tech estate

- » Capture the residual value of assets and drive technology reuse rather than disposal with HPE Asset Upcycling Services (AUS).
- » Blend old tech with new and efficiently transition to HPE GreenLake with HPE Accelerated Migration.
- » Control costs and enable tech to be in use longer after decommissioning from previous use with HPE Certified Pre-Owned (CPO) tech.
- » Further enhance your scalability capabilities by supplementing with additional assets readily available from your HPE Virtual Warehouse.
- » Right-size your IT infrastructure and increase utilization

You're in control

HPEFS by the numbers

- 3.6M+** assets processed through HPE Technology Renewal Centers
- 93%** of servers upcycled and returned to active use
- 95%** of laptops and workstations upcycled and returned to active use
- 80+** locations globally to process IT assets
- >1.4** exabyte of device data overwritten
- \$1.1B** infused back into customer budgets from upcycling and accelerated migration programs over the last 3 years
