

DIGITAL TRANSFORMATION REQUIRES MORE THAN JUST THE PUBLIC CLOUD

Prepare your data-centric workloads and workflows for the digital-first economy with hybrid DXC solutions powered by HPE.

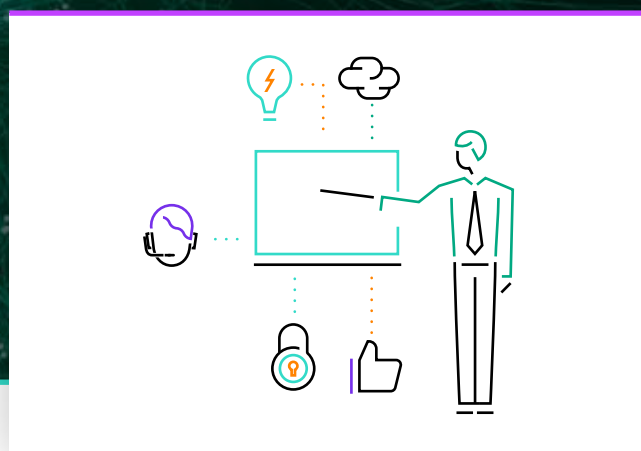

Cloud computing promises speed, agility, and cost savings—but **realizing the full value requires solving difficult challenges such as data gravity, security, compliance, cost management, and organizational change.** DXC's managed hybrid and multicloud services, enabled by the HPE GreenLake platform, can help you overcome these challenges.

WHY HYBRID AND MULTICLOUD?

Enterprises are getting overwhelmed juggling diverse IT assets across ecosystems of providers and multiple locations. Managed service providers are needed to help them meet their critical business and IT objectives. DXC and HPE have proven Hybrid Cloud, private cloud, and multicloud solutions that accelerate digital transformation so you can:

ASK YOURSELF...

- Q. Does your current infrastructure adequately support** your critical operations and meet your SLAs?
- Q. Can you innovate freely?**
- Q. Have your costs skyrocketed** as a result of a recent cloud rollout?
- Q. Are you struggling to achieve the expected benefits** of your cloud strategy?
- Q. Are your operations secure?**

FIND THE RIGHT MIX FOR YOUR BUSINESS

Finding the right platform mix requires experience and insight into how your IT operates. This is where HPE and DXC can help you define—and then move to—the right mix of platforms by following an approach that is open to any platform, including on-premises and in the cloud. We'll help you:

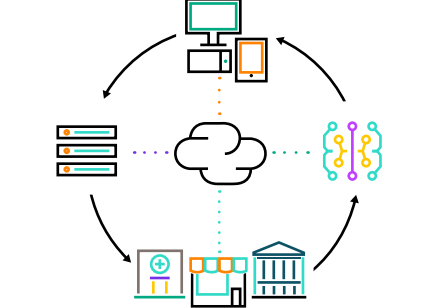

Determine the right mix for your business objectives

We will assess your existing IT investment strategy and identify value realization, as well as help you assess your people and teams to identify critical gaps in your cloud journey.

Achieve cloud-like economics and agility

The HPE GreenLake platform delivers the pay-per-use pricing, point-and-click self-service, scalability, and flexibility of the cloud experience, with the security of dedicated on-premises IT.

Manage apps and data, wherever they are

HPE GreenLake provides holistic support for all of your apps and data in edges, colocations, and data centers—from traditional virtualization to cloud-native AI/analytics and MLOps—all managed by DXC.

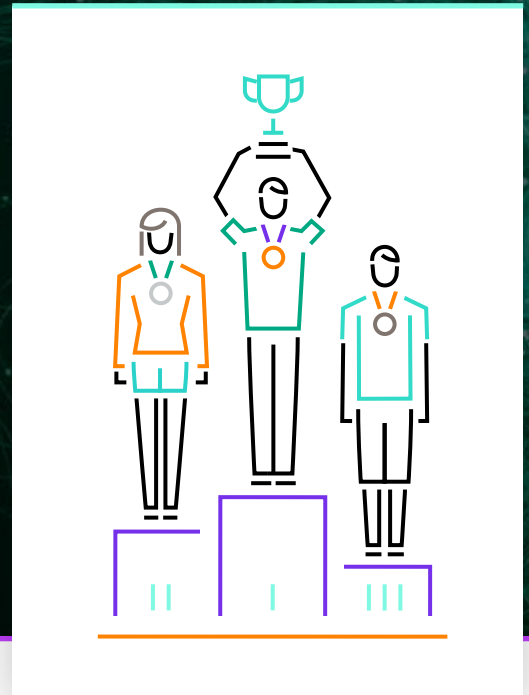

DEMAND A FULL RANGE OF PRODUCTS AND SERVICES FOR YOUR CLOUD

Moving to the cloud is no longer a matter of why, but of when and how. The HPE GreenLake platform and DXC can help you to make the right investments at the right time and on the right platforms so you can modernize operations and drive innovation across your entire IT estate.
