

DO MORE, MOVE FAST AND MAKE IT COUNT

Create new opportunities by aligning your tech assets and business objectives for long-term growth.

Manage IT assets and resources to operate at peak efficiency, lower costs and minimize e-waste.

Remove funding barriers with best in class financing programs and IT lifecycle services.

Financing programs and IT lifecycle services

HPEFS offers a range of financing programs designed to help businesses acquire, manage, and optimize their IT investments. In addition to our traditional financing and leasing programs, which allow customers to spread the cost of their technology purchase over a fixed term, our solutions can be tailored to help align to specific business needs. Examples include:

Special Financing Programs

Remove budget barriers and supply chain constraints with special financing programs designed to preserve cash flow. Programs include special financing rates and payment deferral programs.

Certified Pre-Owned Technology (CPO)

Driving innovation and reliability within an IT infrastructure doesn't always mean relying on new technology. Certified pre-owned tech, from HPEFS, can meet your unique technology requirements and help you achieve sustainability goals. All equipment is custom-configured, tested, and certified using HPE proprietary tools and methods.

IT Asset Disposition (ITAD)

The IT Asset Disposition (ITAD) program helps organizations securely and responsibly retire technology at scale. This service includes decommissioning, certified data erasure, asset tracking, secure logistics, and reuse or remarketing, helping recover value from HPE and other third party equipment while supporting compliance and sustainability goals.

Sale-Leaseback

Sale-Leaseback is an asset transfer arrangement that allows customers to convert existing, owned IT assets into an incremental cash source. This financial program enables customers to retain full use of their IT while providing an infusion of capital previously tied up in past purchase decisions.

Achieve more, faster, with greater results with HPE Financial Services

9.7M assets put back in use over the last 3 years

97% of PCs* upcycled and returned to active use in FY25
