

Electronic medical records delivered as a service

Run your Epic workloads with HPE GreenLake

The Epic challenge

The electronic health record (EHR) is a strategic asset to healthcare providers, and Epic Systems leads in enabling hospital systems and integrated health networks across the U.S. Health IT teams are committed to the highest levels of support to ensure the reliable delivery of Epic to medical staff and caregivers on a 24x7 basis. However, many health systems are looking for innovative ways to fortify the EHR IT foundation, simplify operations, increase efficiency to deliver projects faster, and reduce the total cost of ownership (TCO). HPE GreenLake offers a new way to meet your EHR needs in a scalable, pay-per-use¹ Epic service that's managed for you.

EHR delivered as a service

HPE GreenLake offers a comprehensive platform as a service (PaaS) designed with the hardware, software, and certified expertise to operate the Epic EHR at scale.

Healthcare institutions can now make the most of their technology investments: gaining performance, scalability, and agility; redistributing the burden of operating IT; and paying only for the resources they consume.

Benefits of HPE GreenLake consumption-based services

Time to market:

80% faster²
