Networking Program

General Session:

The Secure AI-Powered Network to Drive Your Business Forward

Speakers: Phil Mottram, EVP and GM, Intelligent Edge, HPE Aruba Networking, Rishma Khimji, Chief Information Technology Officer, Harry Reid International Airport, and Rodney Linville, Global Head of Information Technology, Nobu Hospitality

AI applications are changing the game in sectors ranging from hospitality to financial services, education, logistics, consumer goods, and more—and the network is at the center of it all. Join Phil Mottram, EVP & GM, Intelligent Edge/HPE Aruba Networking to learn how we are enabling customers to optimize their network through secure, flexible deployment, seamless management, and insight-driven automation. Networking Program

General Session:

Innovations in Security-First, AI-Powered Networking

Speakers: David Hughes, CPO, HPE Aruba Networking, Jon Green, CTO, HPE Aruba Networking, and Miles Davis, VP of Solutions - Architecture, Automation, and UX, HPE

Get an inside look at what comes next with HPE Aruba Networking. Whether your interest is in the role of AI or in a simple way to scale your network, this General Session will provide live demos of key use cases across the HPE Aruba Networking product portfolio. Hosted by David Hughes, Chief Product Officer of HPE Aruba Networking, you'll get a tour of new HPE Aruba Networking Central, switching, wireless, and SASE innovations. You'll also hear from Jon Green, Chief Technology Officer of HPE Aruba Networking, on the future of the industry. [GS1622](#)

Cybersecurity Defense Doesn't Need to Be Expensive: Start with What You Already Have

Speakers: Aman Raheja, CISO, HPE, Kevin Cole, Director, Product Marketing, HPE, Nigel Edwards, HPE Fellow, VP & Director Security Lab, HPE, Jon Green, Chief Technology & Security Officer, HPE Aruba Networking, HPE

Most breaches occur due to failure to address basic controls, yet many cybersecurity vendors focus instead on protecting against sophisticated zero-day vulnerabilities using expensive technologies like AI and threat intelligence subscriptions. As an HPE customer, you already have strong cybersecurity controls built into your infrastructure—and you might not even know it. This panel will feature HPE's cybersecurity leaders discussing effective approaches you can take now to strengthen security, using what's already in your environment. [SL1990](#)

Compute solutions at any scale

AI Program

Spotlight Session:

Gain More Performance, More Efficiency for Your Workloads with HPE ProLiant Compute Gen12

Speakers: Krista Satterthwaite, SVP/GM, HPE Compute, Dan McNamara, SVP & GM Server BU, AMD, John Carter, VP, Compute, HPE, and Mike Bailey, IT Infrastructure, Bourgault

Thriving in a new era of innovation requires next-generation technologies that maximize IT environments, securely and efficiently. Demand for new levels of performance, heightened security risks, and the complexity of managing large or hybrid IT estates creates new challenges that outdated solutions can no longer address. Join us as we continue to unveil more of the portfolio and demonstrate how HPE ProLiant Compute Gen12 can get you future-ready, now. [SL1755](#)

Operationalizing enterprise AI

AI Program

Spotlight Session:

Enterprise AI Pilots Are Easy. Scaling Them Isn't. Why Private Cloud Is Your Next AI Power Move

Speakers: Rom Kosla, SVP & CIO, HPE, Cheri Williams, SVP & GM Private Cloud & Flex Solutions, HPE, Dale Brown, Private Cloud AI, HPE, Dan Waibel, Global Chief Data Officer, HPE, Joey Zwicker, VP & GM, AI Solutions and Private Cloud for AI, HPE

The next wave of AI victors won't be those chasing models—they will have mastered infrastructure, data, and deployment of AI at scale. Escape from AI purgatory now by learning why enterprises are turning to HPE for a cost-predictable, secure, NVIDIA-powered private cloud AI experience that keeps control where it counts, with you. Make your move with full-stack AI solutions—from edge to core to exascale from HPE—designed for real, future-proof outcomes to help you break the bottlenecks in performance, data access, and cost predictability. Sustainable AI and smarter IT lifecycles

AI Program

Spotlight Session:

Balancing Innovation, Economics, and IT Sustainability Across Your Digital Value Chain

Speaker: Maeve Culloty, EVP, President and CEO of HPE Financial Services

AI is changing the fabric of business and society. As with previous innovation waves, you must be ready to invest, adapt, and move quickly, even in tumultuous times. Prioritizing efficiency is crucial, and staying within budget is an absolute must. How can you create a flexible tech strategy, get everything you need, drive to your sustainability goals, and still be prepared for what comes next? Join this session to discover how you can do it all with a smarter IT asset lifecycle approach. [SL1455](#)

AI for Service Providers and Model Builders

AI Program

Spotlight Session:

Fast-Track AI Model Innovation with AI Factory At-Scale

Speakers: Trish Damkroger, SVP and GM, HPC & AI, HPE, Toru Maruta, Executive Officer, GM of Advanced Platform Development Division, Advanced Technology Headquarters, KDDI CORPORATION

AI model builders, service providers, and nation states investing in sovereign AI are seizing the rapid evolution of AI—from generative AI to agentic AI—to usher in a new era of innovation. However, AI model training is complex and requires specialized infrastructure and expertise that many lack, limiting or delaying AI projects. Learn how to deploy and develop AI at any scale, faster, with AI factory solutions that deliver end-to-end integrated, high performance computing capabilities, efficiently and sustainably. Private cloud and virtualization

Hybrid Cloud Program

Spotlight Session:

The Great VM Reset: Why It's Time to Rethink Virtualization with Modern Private Cloud

Speakers: Cheri Williams, SVP & GM Private Cloud & Flex Solutions, HPE and Rajeev Bhardwaj, VP & CPO GreenLake Private Cloud, Hewlett Packard Enterprise

Virtualization is at a turning point, and rising licensing costs are just the start. Learn why now is the time to reset your VM strategy and rethink workload management for the AI era by making runtime and platform decisions invisible, offering fast value and freedom of choice across clouds, runtimes, and hardware. With HPE Morpheus Software, see how a modern private cloud powers VMs today and supports containers, automation, and AI tomorrow. If you're only thinking virtualization, you're already behind. Modernize and unlock what's next. [SL1238](#)
