Enterprise AI. Accelerated.

Real-world lessons and insights from HPE customers and partners

Don’t miss the **Generative AI in Government—Transforming Citizen Services and Simplifying Operations** public sector panel discussion, where top-tier HPE customers like **Irfan Elahi, Director of Infrastructure for the National Center for Atmospheric Research (NCAR),** will explore the challenges and lessons learned around citizen-focused AI, including security implications and maintaining control over costs and financial risks. He will draw upon his lived experiences to address how to orchestrate and automate hybrid cloud environments to support and enable AI workloads.
