Fuel your passion:

LIVING, WORKING, AND LEARNING ON THE EDGE

The definition of "edge" is as unique as you are. It can be as literal as working a dangerous job in an exotic location, or as simple as changing your work routine from a traditional office to your home office environment. As technologies evolve and an increasing number of organizations provide options to work remotely, we have opportunities to transform our approach to work-life balance.

Do I need to go into the office every day? Or am I equally productive working from home? Maybe I can do both! I’ll save time by not commuting to the office three days a week but still meet with my colleagues in person the other two days...

"How can new ways of living and working benefit employees and their companies?"

Working remotely has brought me so much joy. I never thought it would be possible to connect so many aspects of my life! I start my day learning something new and am energized to tackle any challenges that come my way. Knowing that I have so much autonomy over how I want to organize my day fuels my passion to succeed."

– Jaymi, a 20-something real-estate professional from California

Continuous learning is your toolkit and catalyst to success. According to KPMG, high-performing organizations are those that can flex their technology and people "muscles" as needed. The result is a highly skilled, digitally enabled workforce which operates with speed and agility. They are the ones who will get to the podium before others can see the finish line on the horizon.

"WHERE DOES LEARNING COME INTO PLAY?"

Companies can also reap rewards from their employees’ new lifestyles, as workforces are collaborative, engaged, loyal, and productive. As suggested by American psychologist Daniel Goleman, addressing an employee’s emotional needs may enhance emotional intelligence and provide increased skills to “understand your own emotions, and those of the people around you.” Goleman further states that "80% to 90% of the competencies that differentiate top performers are in the domain of emotional intelligence.”

Continuous learning can be the X-factor you need to get there. As technologies evolve and an increasing number of organizations provide options to work remotely, we have opportunities to transform our approach to work-life balance.

"WHAT IS THE "EDGE"?"

HPE Digital Learner is a subscription-based online learning platform that provides access to thousands of online courses. During the subscription period, customers can take an unlimited amount of self-paced training on HPE technologies, IT industry trends, and business or personal skills development.
