

Get the right skills to grow your business

HPE Digital Learner—SMB Edition

HPE Digital Learner—SMB Edition

Features

- Modern delivery platform
- Skills training for HPE technologies, including converged (for example, HPE SimpliVity), server (for example, HPE ProLiant Gen10) and storage (for example, HPE Nimble Storage)
- Simulated and virtual hands-on labs
- Library of premium industry training and certification preparation, spanning digital transformation, cloud, Microsoft Azure, AWS, Google Cloud™, DevOps, security, and Microsoft server
- Learner incentives with verifiable digital badges
- Metrics and reporting available for teams of more than 5 members

Prepare your SMB to meet today's challenges

Demands on small and medium businesses (SMBs)—compounded by the global pandemic and rapid technology change—are at an all-time high. Digital transformation has accelerated to accommodate ecommerce and virtual work environments. In addition, economic and market pressures have demanded that SMBs prioritize resources—budget, staff, time, and technology—to “do more with less.”

With shifting work environments, SMBs need solutions to keep employees connected, productive, and secure. In fact, cybersecurity has become increasingly more urgent due to the proliferation of connected devices and edge computing. In order to maintain business continuity, SMBs require secure, resilient infrastructures—but equally important, they need well-prepared employees and best practices to effectively use and leverage technology investments.

In the face of rapidly evolving technology and accelerated digital transformation, skills obsolescence and skills attrition have led to an unprecedented shortage of IT talent. The competition for skilled IT resources, is intense, and SMBs must find a way to differentiate themselves in order to retain, develop, and attract the best talent.

These demands pose great challenges—and also present great opportunity—for small and medium businesses. Effective and efficient use of technology is key for SMBs to survive—and thrive—in the current environment. To get the most from technology investment—and to future-proof your workforce—SMBs need an affordable, agile, ready-when-you-need-it approach to learning and skills development.

HPE can help

For decades, HPE has helped transform small and medium businesses through a learning culture that drives business readiness, growth, innovation, talent retention, and competitive differentiation. HPE offers a learning-as-a-service approach that delivers rightsized learning programs to address the current and evolving needs of small and medium businesses.

At the forefront of our SMB solution is [HPE Digital Learner—SMB Edition](#).

- HPE Digital Learner—SMB Edition is designed for SMB customers and provides expert, curated eLearning to meet their HPE and premier industry training and certification needs. Since our goal is to help SMBs protect and grow their businesses, we focus on the exact training needed to support SMB infrastructure—including security, business continuity, digital transformation, and cloud. See [Table 1](#) for more information.
- The subscription-based HPE Digital Learner—SMB Edition is an affordable continuous learning channel. The subscription provides unlimited access to SMB Edition content throughout the subscription period—without additional cost—keeping training costs predictable and within budget.
- HPE Digital Learner provides a flexible, online learning platform with easy access—anytime, anywhere. It accommodates various skill levels and includes the perfect blend of learning support tools to fit individual schedules, learning styles, and training needs.
- Self-paced and modular, HPE Digital Learner provides access to the right training, in the right amount, so learners get the exact training they need—when they need it. The agile nature of our solution provides SMBs with a reliable, convenient means to build new expertise, refresh existing skills and cross train employees as needed.
- With HPE Digital Learner—SMB Edition, businesses can build competitive skills development programs to help attract, develop, and retain the highest quality IT and business talent. The flexibility and convenience of Digital Learner means employees can gain knowledge and build skills—including certifications—based on their schedule and location preferences. By creating a continuous learning culture, SMBs get competent, satisfied, and confident employees—a win-win for both the business and the individual.

In addition to HPE Digital Learner—SMB Edition, HPE offers a wide array of live expert-led training classes conducted through our virtual classroom environment. Learn more about our [virtual instructor-led training \(VILT\)](#)—and other learning resources available through HPE Education Services at hpe.com/ww/learn.
