The HP Smart Array P212 is HP’s entry level PCI Express (PCIe) Serial Attached SCSI (SAS) RAID controller. The Low Profile, Half Height card has 8 ports and utilizes DDR2-266 memory. The P212 is ideal for RAID 0/1, 1+0 and can be upgraded with the 256MB battery-backed write cache (BBWC) module for RAID 5, 5+0.

What's New
- Updating supported hard drives.

Models
| HP Smart Array P212 Controller | HP Smart Array P212/ZM 1-ports Int/1-ports Ext PCIe x8 SAS Controller | HP Smart Array P212/256 1-ports Int/1-ports Ext PCIe x8 SAS Controller | 462828-B21 | 462834-B21 |
The Smart Array Advantage

HP's innovative design and integration work of the Smart Array family of products creates customer value that is unmatched in the industry. Use of Smart Array products across multiple applications results in a much lower Total Cost of Ownership (TCO) than any other server storage RAID product. The HP Smart Array family brings an unparalleled return on investment through:

**Data Compatibility** among all models of Smart Array controllers allows simple and easy upgrades any time needs for higher performance, capacity, and availability increase. Even successive generations of Smart Array controllers understand the data format of other Smart Array Controllers.

**Consistent Configuration and Management Tools.** All Smart Array products utilize a standard set of management and utility software. These tools minimize Total Cost of Ownership (TCO) by reducing training requirements and technical expertise necessary to install and maintain the HP server storage.

**Universal Hard Drive** form factor is for use across multiple HP servers, disk enclosures and storage systems. With compatibility across many enterprise platforms, you are free to deploy and re-deploy these drives to quickly deliver increased storage capacity, migrate data between systems, and easily manage spare drives.

**Pre-Failure Warranty** means HP Insight Manager not only reports when a drive is going to fail but allows replacement of failing drives prior to actual failure. For complete details, consult the HP Support Center or refer to your HP Server documentation.

Key Features

- Seamless upgrades from past generations and upgrades to next generation HP high performance and high capacity Serial Attached SCSI Smart Array controllers.
- The SA-P212 Controller supports the HP D2600 Disk Enclosure, HP D2700 Disk Enclosure, and the HP 600 Modular Disk System.
- 6Gb/s SAS technology delivers high performance and data bandwidth and contains full compatibility with 3Gb/s SATA technology.
- x8 5G PCI Express 2.0 host interface technology delivers high performance and data bandwidth up to 5 GB/s maximum bandwidth.
- Addition of the battery backed cache upgrade enables Capacity Expansion, RAID migration, and Stripe Size Migration. Additionally, Smart Array Advanced Pack license key enables RAID 6 (ADG), 6+0, Advanced Capacity Expansion, Mirror Splitting and Recombining in Offline Mode, Drive Erase, Performance Optimization-Degraded Reads and Read Coalescing (VOD)
- Mix-and-match SAS and SATA hard drives, lets you deploy drive technology as needed to fit your computing environment.
- Support for > 2 TB in a single logical drive.
- Support for HP SAS tape and tape automation products.
- Software consistency among all Smart Array family products: Array Configuration Utility (ACU), Option ROM Configuration for Arrays (ORCA), Systems Insight Manager, Array Diagnostic Utility (ADU) and SmartStart. Some of these features are not available with ProLiant 100 series platforms.
- The SA-P212 controller supports up to 54 drives.
- Low-profile PCI Express form factor - ships with a full size bracket for deployment in either a low-profile or full sized slot.
Standard Features

**Online Management Features**
- Online Capacity Expansion (with BBWC upgrade)
- Advanced Capacity Expansion (with BBWC and SAAP license key)
- Online RAID Level Migration (with BBWC upgrade)
- Online Stripe Size Migration (with BBWC upgrade)
- Mirror splitting and recombining (with SAAP license key)
- Unlimited Global Online Spares Assignment
- User Selectable Expand and Rebuild Priority
- User Selectable RAID Level and Stripe Size
- User Selectable Read and Write Cache Sizes

**Ports**
- Eight (8) SAS physical links distributed across 1 internal x4/1 external x4 wide port connectors.

**Performance**
HP's High Performance Architecture sets new boundaries of industry performance expectations!
- 6Gb/s SAS
- x8 6Gb/s SAS physical links (compatible with 3G SATA)
- 256 MB DDR2-800 battery-backed cache provides up to 4.2 GB/s maximum bandwidth.
- x8 5G PCI Express host interface provides 4 GB/s maximum bandwidth.
- MIPS 32-bit Processor
- Read ahead caching
- Write-back caching (with battery-backed write cache upgrade)

**Native Command Queuing**
Native Command Queuing (NCQ) is a technology designed to increase performance of SATA hard disk drives by allowing the individual hard disk to internally optimize the order in which received read and write commands are executed. This can reduce the amount of unnecessary going back-and-forth on the drive's heads, resulting in increased performance for workloads where multiple simultaneous read/write requests are outstanding, most often occurring in server or storage-type applications. Without NCQ the drive has to process and complete one command at a time. For NCQ to be enabled, it must be supported and turned on in the controller and in the hard drive itself.

**NOTE:** Please see the SATA Hard Drive QuickSpecs for specific SATA hard drive capacities that support NCQ: [http://h18000.www1.hp.com/products/quickspecs/11940_div/11940_div.html](http://h18000.www1.hp.com/products/quickspecs/11940_div/11940_div.html)
Capacity

Given the increasing need for high performance and rapid capacity expansion, the SA-P212 offers:

- Up to 24.3TB of external storage per PCI slot with 6x internal 450GB 3.5" SAS hard drives and 4x HP 60 Modular Smart Array enclosures or HP D2600 Disk Enclosures and 48 x 450GB 3.5" SAS hard drives.
- Up to 54TB of total storage per PCI slot with 6x internal 1TB 3.5" SATA MDL hard drives and 4x HP 60 Modular Smart Array enclosures or HP D2600 Disk Enclosures and 48 x 1TB 3.5" SATA MDL hard drives.
- Up to 17.4TB of total storage per PCI slot with 8x internal 300GB SFF SAS hard drives and 4x HP 70 Modular Smart Array enclosures or HP D2600 Disk Enclosures and 50 x 300GB SFF SAS hard drives.
- Up to 14.5 TB of total storage per PCI slot with 8x internal 250GB SFF SATA hard drives and 4x HP 70 Modular Smart Array enclosures or HP D2600 Disk Enclosures and 100 x 250GB SFF SATA hard drives.

**NOTE:** Support for greater than 2TB in a single logical drive. Additional capacity up to 180 with an expander.

Availability

Provides increased server uptime by providing advanced storage functionality:

- Online Capacity Expansion (with BBWC upgrade)
- Online Advanced Capacity Expansion (with Smart Array Advanced Pack upgrade)
- Online RAID Level Migration (with BBWC upgrade)
- Online Stripe Size Migration (with BBWC upgrade)
- Global Online Spare
- Pre-Failure Warranty

Fault Prevention

The following features offer detection of possible failures before they occur, allowing preventive action to be taken:

- **S.M.A.R.T.**: Self Monitoring Analysis and Reporting Technology first developed at HP detects possible hard disk failure before it occurs, allowing replacement of the component before failure occurs.
- Drive Parameter Tracking monitors drive operational parameters, predicting failure and notifying the administrator.
- Dynamic Sector Repairing continually performs background surface scans on the hard disk drives during inactive periods and automatically remaps bad sectors, ensuring data integrity.
- Smart Array Cache Tracking monitors integrity of controller cache, allowing pre-failure preventative maintenance.
Fault Tolerance

- Keeps data available and server running while a failed drive is being replaced; several fault tolerance configurations are supported including:
- **RAID 6 with ADG (Advanced Data Guarding):** This is the highest level of fault tolerance. It allocates two sets of parity data across drives and allows simultaneous write operations. This level of fault tolerance can withstand two simultaneous drive failures without downtime or data loss.
- **RAID 6+0:** Supported with min of 8 drives, but would have 4 available. Target benefit is to split RAID across the external boxes.

  **NOTE:** RAID 6, 6+0 can be enabled with either
  - 256 MB cache, Battery kit and Smart Array Advanced Pack License key option upgrades
  - 512 MB BBWC and Smart Array Advanced Pack License key option upgrades

- **RAID 5 (Distributed Data Guarding):** This allocates one set of parity data across drives and allows simultaneous write operations. This level of fault tolerance can withstand a single drive failure without downtime or data loss.

  **NOTE:** RAID 5 can be enabled with a minimum 256 MB cache

- **RAID 5+0:** This is a RAID 0 array striped across 5 elements. Combines the straight block-level striping of RAID 0 with the distributed parity of RAID 5.

- **RAID 1, 1+0 (Drive Mirroring):** This allocates half of the drive array to data and the other half to mirrored data, providing two copies of every file. It is a high-performance RAID.

Fault Recovery

- Minimizes downtime, reconstructs data, and facilitates a quick recovery from drive failure

  - On-Line Spares: There is no limit to the number of spare drives that can be installed prior to drive failure. If a failure occurs, recovery begins with an On-Line Spare and data is reconstructed automatically.
  - DRAM ECC corrects against single bit data and address corruption.
  - Battery-backed write cache upgrade provides for up to three days of battery power for data cache retention. The data backup duration could be extended anytime the server's auxiliary power is available during system power down.

Ease of Use

- Consistency and Upgradeability make the Smart Array family unique in the industry:

  - GUI based configuration, management and diagnostic software tools
  - Common data format between generations of products
  - Data migration between servers and external Modular Smart Array enclosures and HP Disk Enclosures

Warranty

- The warranty for this device is 3 years parts, labor and onsite.

  **Pre-Failure Warranty:** Drives attached to the Smart Array Controller and monitored under Insight Manager are supported by a Pre-Failure (replacement) Warranty. For complete details, consult the HP Support Center or refer to your HP Server Documentation.

  **Warranty Upgrade Options**

  - Response - Upgrade on-site response from next business day to same day 4 hours
  - Coverage - Extend hours of coverage from 9 hours x 5 days to 24 hours x 7 days
  - Duration - Select duration of coverage for a period of 1, 3, or 5 years
  - Warranty upgrade options can come in the form of Care Packs, which are sold at the HP System level this product attaches too
Server Compatibility

For up to date compatibility, please see the following URL for complete Smart Array P212 Controller compatibility and support information:

Operating Systems

- Microsoft Windows 2003 x64 Edition
- Microsoft Windows 2003 R2 x64 Edition
- Microsoft Windows 2003 x84 Edition
- Microsoft Windows 2008 Server x64
- Microsoft Windows 2008 R2 Server x64
- Microsoft Windows 2008 Server x84
- Red Hat Enterprise Linux 4, 5, 6 (x64 & x84)
- SUSE Linux Enterprise Server 9 (x64 & x84)
- SUSE Linux Enterprise Server 10 (x64 & x84)
- SUSE Linux Enterprise Server 11 (x64 & x84)
- Novell Netware 6.5 (Open Enterprise Server)
- VMware

**NOTE:** For more Linux OS support & certification information, please visit our the ProLiant & BladeSystem Server Linux matrix: http://h18004.www1.hp.com/products/servers/linux/hplinuxcert.html

Software Suite

All Smart Array products share a common set of configuration, management and diagnostic tools, including Array Configuration Utility (ACU), Array Diagnostic Utility (ADU), and Systems Insight Manager. This software consistency of tools reduces the cost of training for each successive generation of product and takes much of the guesswork out of troubleshooting field problems. These tools lower the total cost of ownership by reducing training and technical expertise necessary to install and maintain HP server storage.

**Systems Insight Manager**

- Powerful server and server options/storage manager tool
- Monitors over 1200 system wide parameters
- Configuration/Diagnostic Utilities
- SIM is only for the HP ProLiant 300, 500 and Blade series servers.

**HP Array Configuration Utility** (ACU)

- Powerful Web based configuration utility for all Smart Array controllers
- Provides a graphical view of HP drive array configurations.
- Allows for management of multiple arrays over a secure internet connection from anywhere in the world.
- Easy to use Wizards for configuration
- Runs offline for all supported Operating Systems on the ProLiant 300, 500 and Blade series and runs online for Windows and Linux. For online configuration of NetWare, use CPQONLIN.

**HP Option ROM Configuration for Arrays** (ORCA)
QuickSpecs

HP Smart Array P212 Controller

Compatibility

- A simple method for managing logical volumes during system power up by pressing F8 during POST
- Allows the ability to create arrays, logical volumes, and assign an online spare drive.
- Allows the ability to view and delete logical volumes
- Allows the ability to select the boot controller
- For advanced array configurations use ACU

**HP Array Diagnostic Utility (ADU)**

- In depth diagnostic and reporting utility for all Smart Array controllers
- Runs offline for all supported Operating Systems, and runs online for Windows and Linux in HP ProLiant 300, 500 and Blade series servers
Service and Support

HP Care Pack Services: Packaged server and storage services for increased uptime, productivity and ROI

When you buy HP server and storage products and solutions, it’s also a good time to think about what levels of support you may need. Our portfolio of service options reduce deployment and management worries while helping you get the most out of your server and storage investments. We take a holistic approach to your environment, bridging servers, blades, storage, software and network infrastructures with our packaged HP Care Pack Services for servers and storage.

Protect your business beyond warranty

When it comes to robustness and reliability, standard computing equipment warranties have matured along with technology. Good news that can also create problems stemming from depending on standard warranties designed to only protect against product defects and some downtime causes. Using a standard approach to warranty uplifts, such as HP Care Pack Services, helps reduce downtime risks and provides operational consistency for mission-critical and standard business computing.

HP Care Pack Services: Upgrading or extending standard server and storage warranties cost effectively

HP Care Pack Services offer a standard reactive hardware and software support services suite sold separately, or combined with our Support Plus and Support Plus 24 services. The portfolio also provides a combination of integrated proactive and reactive services, such as Proactive 24 Service and Critical Service. In addition with HP Proactive Select, you can acquire the specific proactive constancy and technical services. HP Proactive Select menu offers a broad set of service options that you can mix and match depending on your specific requirements. Proactive service options include offers for server, storage, network, SAN device, software, environment and education services.

HP server and storage lifecycle support services offers a full spectrum of customer care—from technology support to complex migrations to complete managed services. HP Factory Express provides customization, integration and deployment services for turnkey solutions. HP Education Services offer flexible, comprehensive training on to help your IT staff get the most out of your server and storage investments. HP Financial solutions extend innovative financing and cost-effective asset management programs—from purchase to equipment retirement.

NOTE: Care Pack Services availability may vary by product and country.

HP Care Pack Services are sold by HP and HP Authorized Service Partners:

- Services for customers purchasing from HP or an enterprise reseller are quoted using HP order configuration tools.
- Customers purchasing from a commercial reseller can find HP Care Pack Services at http://www.hp.com/go/lookuptool

3-Year HP Hardware Support Onsite Service, 4-hour response, 24x7
Provides you with rapid remote support and if required an HP authorized representative who will arrive on site any time and day of the year to begin hardware maintenance service within 4 hours of the service request being logged.

This service provides a trained HP service specialist to perform an installation that meets HP quality standards, for:

| ● Help improve or maintain system uptime |
| ● Convenient onsite support |
| ● Committed response time |

HP Installation and Startup of HP ProLiant Servers
Provides for the installation of your new HP ProLiant server and operating system to assist you in bringing your new HP ProLiant server and operating system into operation in a timely and professional manner.

This service provides a trained HP service specialist to perform an installation that meets HP quality standards, for:

| ● Delivery of the service at a mutually scheduled time convenient to your organization |
| ● Availability of an HP service specialist to answer basic questions during the onsite delivery of this service |
| ● Custom installation as detailed in "Delivery specifications" or in a Statement of Work (SOW) |
| ● Verification prior to installation that all service prerequisites are met |

Optional HP Care Pack Services that will enhance your HP product experience

**Optional Services**

**3-Year HP Hardware Support Onsite Call-to-Repair (CTR) Service, 6- or 24-hour**
As an alternative to our recommended support level, for customers who need committed call-to-repair for server hardware.

Provides your IT manager with a team of support specialists who will quickly begin troubleshooting the system to help return the hardware to operating condition within 6 or 24 hours of the initial service request to the HP Global Solution Center.

**3-Year HP Support Plus 24**
As an alternative to our recommended support level, for customers who need access to responsive 24x7 hardware and software support plus software updates on HP and selected third party products:

For a higher return on your server and storage technology, our 3-year combined reactive support service delivers integrated onsite hardware/software support services available 24x7x365, including access to HP technical resources, 4-hour response onsite hardware support and software updates.

**HP Proactive Select Service**
Customer needs on demand access to consulting, technical proactive services and education courses

Provides a flexible way to purchase HP best-in-class consultancy and technical services. You can buy Proactive Select Service Credits when you purchase your hardware and then use the credits over the next 12 months.

**eSupport**
HP eSupport is a portfolio of technology-based services that assist you with managing your business environment - from the desktop to the data center.

**Support Portal**
The HP support portal provides one-stop access to the information, tools and services you need to manage the daily operations of your IT environment.

**Features include:**

- Access to self-solve tools (including search technical knowledge base)
- Efficient logging and tracking of support cases
- Collaboration with other business and IT professionals
- Download of patches and drivers
- Access to diagnostic tools
- Proactive notification of relevant information

Access to certain features of the support portal requires an HP service agreement. To access the support portal, visit: http://www.hp.com/support
HP Insight Remote Support software delivers secure remote support for your HP Servers and Storage, 24 X 7, so you can spend less time solving problems and more time focused on your business. You can have your systems remotely monitored for hardware failure using secure technology that’s been proven at thousands of companies around the world. In many cases, you can avoid problems before they occur.

**Customer Technical Training**

In today's cost-conscious business environment, IT professionals, developers, consultants and users face an interesting challenge: how to keep up with the latest technologies and expand important skills while delivering profitable results on current projects. To help address this challenge, HP offers innovative training solutions that help keep you up-to-date on virtualization, server, storage, Insight Control, Citrix, Microsoft® and open source/Linux-related topics—while spending less time away from business-critical activities.

**HP Services Awards**

HP Technology Services continues to be recognized for service and support excellence by customers, partners, industry organizations and publications around the world. Recent honors and award reflect our services team's dedications, technical expertise, professionalism and uncompromising commitment to customer satisfaction.

**Additional Services Information**

**QuickSpecs**

HP Smart Array P212 Controller

**Related Options**

**NOTE:** Please see the QuickSpecs for Technical Specifications and additional information:
(Worldwide)

**NOTE:** Go to the HP Hard Drive Compatibility table for complete drive compatibility information (http://www.hp.com/products/harddiskdrives). Using hard drives in unsupported configurations will result in voiding the warranty and could result in damage to the drive and/or loss of data.

**NOTE:** There is a known compatibility issue with some early 3.5” SATA HDD that will make them unable to be used with the SA-P400 controller. Customers should verify that they are not using hard drive part number 332649-002/003 (spare 353042-001), 332650-002/003 (spare 353043-001), or 356536-002/003 (spare 353044-001).

**NOTE:** The components of a storage subsystem (e.g. the drive, the HBA/controller, firmware, and the server backplane) should operate at the same data transfer rate or the system bandwidth will be negotiated down to an acceptable level for all components.

**NOTE:** Hard drives have either a one year or three year warranty; refer to the specific hard drive QuickSpecs for details.

Rack-mount Tape Drive Enclosures

HP 1U SAS Rack-mount Kit

**NOTE:** The 1U SAS Rack-Mount Kit can support up to (2) half-height tape drives and is compatible with the DAT 160 SAS, LTO-2 Ultrium 448 SAS, LTO-3 Ultrium 920 SAS and LTO-4 Ultrium 1760 SAS tape drives.

HP 3U SAS Rack-mount Kit

**NOTE:** The 3U Rack-mount Kit can support up to (2) full-height or (4) half-height tape drives and compatible with multiple SAS tape drives including DAT 160 SAS, LTO-2 Ultrium 448 SAS, LTO-3 Ultrium 920 SAS, LTO-4 Ultrium 1760 SAS and LTO-4 Ultrium 1840 SAS tape drives.

SAS Cables for Tape Drives and Automation
HP Mini-SAS Cable for LTO Internal Tape Drive

**NOTE:** Use this cable to connect HP Ultrium 448, 920, 960, 1760 and 1840 SAS internal tape drives to Mini-SAS (SFF8087) ports. This replaces the existing cable connecting the HBA/controller to the disk backplane. This replacement cable has three channels for disks and 1 channel for the tape drive (SFF8482 port).

HP SAS Min-Min 1x-2M Cable Assembly Kit

**NOTE:** Use this cable to connect HP SAS external tape devices to HP SAS controllers with external Mini-SAS (SFF8088) connectors.

HP SAS MIN-MIN 1X-4M Cable Assembly Kit

**NOTE:** Use this cable to connect HP SAS external tape devices to HP SAS controllers with external Mini-SAS (SFF8088) connectors.

HP SAS MIN-MIN 3X1X-5M Cable Assembly Kit

**NOTE:** This split cable connects internally to SAS Hard Drive Cage (3 channels) and externally to the tape drive (1 channel) with other connector attaching to the controller. The external cable, for the drive, requires a PCI slot to exit the server.

HP 2m External Mini-SAS to 4x1 Mini-SAS Cable

**NOTE:** One cable is required for every four drives. Use this cable to connect HP MSL SAS Tape Libraries to Mini-SAS (SFF8088) ports.

HP 4m External Mini-SAS to 4x1 Mini-SAS Cable

**NOTE:** One cable is required for every four drives. Use this cable to connect HP MSL SAS Tape Libraries to Mini-SAS (SFF8088) ports.

---

### HP Cable Options

#### Mini SAS Cables

- HP Mini SAS to Mini SAS 28in Cable Assembly
- HP Mini SAS to Mini SAS 33in Cable Assembly
- HP Mini SAS to 8484 18in/24in Cable Assembly
- HP Mini SAS to 8484 32in/35in Cable Assembly

#### Additional Cables

- HP 15 Position 24in SFP Battery Cable Assembly
Technical Specifications

**Dimensions** (not including bracket)  
Low Profile PCIe Form Factor  
19.05 cm x 24.13 cm x 5.72cm (7.5 in x 9.5 in x 2.25 in)

**Disk Drive and Enclosure Interface - transfer rate**  
6Gb/s SAS (Serial Attached SCSI)  
3Gb/s SATA (Serial ATA)

**SAS Connectors**  
1 internal (SFF-8087)/1 external (Mini-SAS SFF-8088) x8 wide port connectors

**Cache Memory Speed**  
DDR-2/800 MHz with 40 or 72-bit wide bus provides up to 4.2 GB/s maximum bandwidth.

**Server Interface**  
x8 5G PCIe 2.0 provides 4GB/s maximum bandwidth.

**SAS Speed**  
x8 6G SAS provides 4.8GB/s maximum bandwidth.

**Cache Memory**  
40-bit 256MB ECC protected cache; transportable with battery-backed upgrade.  
**NOTE:** The 256MB cache is not battery-backed or transportable.

**Logical Volumes Supported**  
Zero Memory, Up to 2 logical volumes  
256mb cache, Up to 64 logical volumes

**Maximum Volume Capacity**  
6TB (6 x 1TB SATA 3.5" MDL HDD)  
**NOTE:** Support for greater than 2TB in a single logical drive.

**Host Memory Addressing**  
64-bit, supporting greater than 4GB server memory space

**RAID Support**  
RAID 6, 6+0 (Advanced Data Guarding)  
**NOTE:** RAID 6, 6+0 can be enabled with either

- 256 MB cache, Battery kit and Smart Array Advanced Pack License key option upgrades
- 512 MB BBWC and Smart Array Advanced Pack License key option upgrades

RAID 5, 5+0 (Distributed Data Guarding)  
**NOTE:** RAID 5, 5+0 can be enabled with a minimum 256 MB cache  
RAID 1, 1+0 (Striping & Mirroring)  
RAID 0 (Striping)

**Upgradeable Firmware**  
Upgradeable Firmware with Recovery ROM feature

**Environment-friendly Products and Approach**  
End-of-life Management and Recycling  
Hewlett-Packard offers end-of-life HP product return, trade-in, and recycling programs in many geographic areas. For trade-in information, please go to: http://www.hp.com/go/green. To recycle your product, please go to: http://www.hp.com/go/green or contact your nearest HP sales office. Products returned to HP will be recycled, recovered or disposed of in a responsible manner.

The EU WEEE directive (2002/95/EC) requires manufacturers to provide treatment information for each product type for use by treatment facilities. This information (product disassembly instructions) is posted on the Hewlett Packard web site at: http://www.hp.com/go/green. These instructions may be used by recyclers and other WEEE treatment facilities as well as HP OEM customers who integrate and re-sell HP equipment.
