

**Product Environmental Information Declaration  
Form for  
EU COMMISSION REGULATION No 2019/424**

**SUBJECT: Product Environmental Information Declaration**

**DATE OF DECLARATION: 2021, April 26**

<b>Regulatory Reference:</b>	COMMISSION REGULATION (EU) 2019/424 of 15 March 2019 laying down ecodesign requirements for servers and data storage products pursuant to Directive 2009/125/EC of the European Parliament and of the Council and amending Commission Regulation (EU) No 617/2013
<b>Product Type:</b>	Blade Server, 1 socket
<b>Manufacturer's Name:</b>	Hewlett Packard Enterprise 11445 Compaq Center W Dr Houston, TX 77070 United States of America Contact: <a href="mailto:sustainability@hpe.com">sustainability@hpe.com</a> for questions
<b>Product Model Number:</b>	Product Model: HPE ProLiant m750 Server Blade RMN: HSTNS-C10A  Product Model: HPE Edgeline EL1000 Converged Edge System RMN: HSTNS-3196, HSTNS-3195
<b>Year of Manufacture:</b>	2020
<b>Product Category:</b>	Server

# Product Environmental Information Declaration Form for EU COMMISSION REGULATION No 2019/424

## Number 1.1.1 and 1.1.2

Internal Power Supply efficiency and Power Factor.

Power Supplies- Platinum and Titanium. Gold Power supply ok for multi-output, until Jan. 2023	Internal Power Supply Efficiency at 230 VAC					
	HPE P/S part number	10% load	20% load	50% load	100% load	PF @50% Load
500W Platinum 865408-B21	865399-101	88,85	92,87	94,52	93,70	0,990
500W Platinum 865408-B21	865399-201	88,83	92,37	94,26	93,02	0,990
500W Platinum 865408-B21	865399-501	89,20	92,29	94,60	93,78	0,990

## Number 1.2.3 - Firmware

1.2.3 From 1 March 2021, the latest available version of the firmware shall be made available from two years after the placing on the market of the first product of a certain product model for a minimum period of eight years after the placing on the market of the last product of a certain product model, free of charge or at a fair, transparent and non-discriminatory cost. The latest available security update to the firmware shall be made available from the time a product model is placed on the market until at least eight years after the placing on the market of the last product of a certain product model, free of charge.

a) Firmware and security update availability	Specific security issues, resolved in firmware, are identified in the documentation that accompanies the release of each firmware revision. HPE product support, and firmware, are available from the <a href="#">HPE Support Center</a> .
--	---

## Number 2 SPECIFIC ECODESIGN REQUIREMENTS ONLY FOR SERVERS WITH ONE OR TWO PROCESSOR SOCKETS

### 2.0- Lot 9- SERT Test Results

#### 2.1. Idle state power

#### 2.2. Active state efficiency

SERT Test Results

Product & Configuration	Power Efficiency
<b>M750 Server Blade</b>	<b>ETSI EN 303 470 V1.1.1 (2019-03)- Environmental Engineering (EE);</b>

## Product Environmental Information Declaration Form for EU COMMISSION REGULATION No 2019/424

<b>Energy Efficiency measurement methodology and metrics for servers</b>																			
<b>System Configuration-High Performance</b> (1) Intel Xeon E-2286M Processor 2.4 GHz 8 core (4) 32GB memory DIMMS 2933MHz 128GB (2) 3840GB NVME m.2 SSD (1) HPE 800W Flex Slot Platinum Hot Plug Low Halogen Power Supply	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 15%;">Test System</th> <th style="width: 15%;">CPU Populated</th> <th style="width: 10%;">Active</th> <th style="width: 10%;">Idle Watts</th> <th style="width: 15%;">Idle Calculated Watts</th> <th style="width: 15%;">Idle 35 C Watts</th> </tr> </thead> <tbody> <tr> <td>High Performance</td> <td>CPU Populated 1</td> <td>23,1</td> <td>52,5</td> <td>93,6</td> <td>59,9</td> </tr> <tr> <td>Low Performance</td> <td>CPU Populated 1</td> <td>21,9</td> <td>47,2</td> <td>73,9</td> <td>55,3</td> </tr> </tbody> </table>	Test System	CPU Populated	Active	Idle Watts	Idle Calculated Watts	Idle 35 C Watts	High Performance	CPU Populated 1	23,1	52,5	93,6	59,9	Low Performance	CPU Populated 1	21,9	47,2	73,9	55,3
	Test System	CPU Populated	Active	Idle Watts	Idle Calculated Watts	Idle 35 C Watts													
	High Performance	CPU Populated 1	23,1	52,5	93,6	59,9													
Low Performance	CPU Populated 1	21,9	47,2	73,9	55,3														
<b>System Configuration- Low Performance</b> (1) Intel Xeon E-2286M Processor 2.4 GHz 8 core (2) 8GB memory DIMMS 2933MHz 16GB (2) 256GB NVME m.2 SSD (1) HPE 800W Flex Slot Platinum Hot Plug Low Halogen Power Supply																			
<b>Idle must be lower than the calculated limit to pass. As described in 2.1 of regulation. Active results must be higher than what is in 2.2 Table 5 of regulation</b>																			

### Number 3.1- for Servers

3.1. From 1 March 2020, with the exception of custom made servers, made on a one-off basis, the following product information on servers shall be provided in the instruction manuals for installers and end-users (when present with the product), and on the free-access websites of manufacturers, their authorized representatives and importers from the time a product model is placed on the market until at least eight years after the placing on the market of the last product of a certain product model:

a) product type;	Computer Server
(b) manufacturer's name, registered trade name and registered trade address at which they can be contacted;	Hewlett Packard Enterprise 11445 Compaq Center W Dr Houston, TX 77505 United States of America
(c) product model number, and if applicable the low-end performance configuration and the high-end performance configuration model numbers;	HPE ProLiant m750 Server Blade

## Product Environmental Information Declaration Form for EU COMMISSION REGULATION No 2019/424

(d) year of manufacture;	2021
(e) PSU efficiency at 10 % (if applicable), 20 %, 50 % and 100 % of rated output power, with the exception of direct current servers, expressed in % and rounded to the first decimal place;	See PS Efficiency Form above
(f) power factor at 50 % of the rated load level, with the exception of direct current servers, rounded to three decimal places;	See PS Efficiency Form above
(g) PSU rated power output (Watts), rounded to the nearest integer. If a product model is part of a server product family, all PSUs offered in a server product family shall be reported with the information specified in (e) and (f);	See PS Efficiency Form 1 above
(h) idle state power, expressed in Watts and rounded to the first decimal place;	See SERT Test Results above
(i) list of all components for additional idle power allowances, if any (additional PSU, HDDs or SSDs, additional memory, additional buffered DDR channels, additional I/O devices).	See SERT Test Results above
(j) maximum power, expressed in Watts and rounded to the first decimal place;	See PS Efficiency Form above
(k) declared operating condition class, as detailed in Table 6;	Declare Operating Condition Class A2 (10-35 C).
(l) idle state power (Watts) at the <b>higher</b> boundary temperature of the declared operating condition class;	See SERT Test Results above
(m) the active state efficiency and the performance in active state of the server;	See SERT Test Results above
(n) information on the secure data deletion functionality referred to in point 1.2.2 of this Annex, including instructions on how to use the functionality, the techniques used and the supported secure data deletion standard(s), if any;	Web Link to Secure deletion document <a href="#">here</a>
(o) for blade servers, a list of recommended combinations with compatible chassis;	See HPE Edgeline EL1000 Converged Edge System Quickspec <a href="#">here</a>
(p) if a product model is part of a server product family, a list of all model configurations that are represented by the model shall be supplied. If a product model is part of a server product family, the product information required for items e) to m) under point 3.1 shall be reported for the low-end and high-end performance configurations of the server product family.	See SERT Test Results above

### Number 3.3- for servers and online data storage products

## Product Environmental Information Declaration Form for EU COMMISSION REGULATION No 2019/424

3.3. From 1 March 2020, the following product information on servers and online data storage products shall be made available from the time a product model is placed on the market until at least eight years after the placing on the market of the last product of a certain product model free of charge by manufacturers, their authorized representatives and importers to third parties dealing with maintenance, repair, reuse, recycling and upgrading of servers (including brokers, spare parts repairers, spare parts providers, recyclers and third party maintenance) upon registration by the interested third party on a website provided

<p>3.3 (a) <b>indicative weight range (less than 5 g, between 5 g and 25 g, above 25 g)</b> at component level, of the following critical raw materials:          (a) Cobalt in the batteries;          (b) Neodymium in the HDDs</p>	<p>Cobalt in the batteries  <a href="#">here</a>          Neodymium in the HDDs  <a href="#">here</a></p>
<p>3.3 (b) instructions on the disassembly operations referred to in point 1.2.1 of this Annex, including, for each necessary operation and component: (a) the type of operation; (b) the type and number of fastening technique(s) to be unlocked; (c) the tool(s) required.</p>	<p>HPE ProLiant m750 Server Cartridge - Document List <a href="#">here</a>          HPE Edgeline EL1000 Converged Edge System - Document List <a href="#">here</a></p>
