

Overview

HPE Edgeline EL8000t Converged Edge System

HPE Edgeline EL8000t Converged Edge System delivers data-intensive, low-latency compute based on open standards and advanced remote manageability.

Designed to enable communication service providers (CSPs) to capitalize on data-intensive, low-latency services for media delivery, connected mobility, and smart cities, the HPE Edgeline EL800t Converged Edge System can process vast amounts of data in real time directly at the edge, based on open standards to boost flexibility and reduce costs.

To deliver new services that tap into the massive growth of real-time data, CSPs must transform their telecommunications network edge towards standard IT systems and software-defined architectures, such as virtual radio access networks (vRAN) and virtual cable modem termination systems (vCMTS). The open-standards based HPE Edgeline EL8000t Converged Edge System provides a cost effective replacement for proprietary edge systems, with enhanced performance and versatility for data-intensive real-time digital services.

Additionally, the unique design of the HPE Edgeline EL8000t Converged Edge System delivers high performance and ultra-low latency for the most demanding use cases, including media streaming, IoT, artificial intelligence, and video analytics in a compact and ruggedized form factor, equipped with edge-optimized serviceability and remote systems management. It shortens the time taken to make an enterprise IT system ready for deployment, provides access at the edge to the same applications used in the core and consequently accelerates the agility of defense, law enforcement and civilian agencies.

The compact and rugged design of the HPE Edgeline EL8000t Converged Edge System allows deployment of traditional datacenter software applications in hostile Edge environments.

Exceeding the requirements of industry standards NEBS Level 3 and ASHRAE class 3 and 4, the system is resistant to hazardous environmental influences such as heat, shock and vibration, as well as failure, supporting continuous operation between 0 and 55 degrees Celsius.

The single-socket design of companion e920t blades, equipped with high-end Intel® Xeon® Scalable Processors, reduces latency and energy consumption. System components can be combined, scaled and hot-swapped to meet changing demands, with robust support for accelerators from a variety of vendors. With a range of depth and width options for blades and chassis, the system can be flexibly configured and scaled to meet new or changing use-case requirements.

Proven HPE iLO 5 technology enables remote provisioning, ongoing system health monitoring, updates, management and security of servers installed in a HPE Edgeline EL8000t Converged Edge Systems from cell towers to oil rigs, without needing IT expertise on site.

Overview

HPE Edgeline EL8000t 2U Front Cabling Chassis View

Item	Description	Item	Description
1	Edgeline EL8000t System	4b	EL8000t Chassis Controller + Network Module (Left Bay)
2	Edgeline EL8000t backplane assembly	5	HPE ProLiant e920t Server Blade (1 or 2 per system)
3	Power supply	6	Fan Assembly
4a	Network Module (Right Bay)		

Standard Features

Enclosure

The HPE Edgeline EL8000t Chassis supports the following ProLiant Server Blade configuration

- **Server Blade Configurations**
ProLiant e920t 2U Blade Server
- **EL8000t 2U Front Cabling Chassis**
Min: 0, Max: 2

HPE ProLiant Server Blades

HPE Edgeline EL8000t System supports:

- HPE ProLiant e920t 2U Server Blades

Notes:

- Please visit the ProLiant e920t Quickspecs at the following URL for detailed information and configuration possibilities https://www.hpe.com/psnow/doc/a50002574enw?jumpid=in_lit-psnow-red
- Blades supported on the Edgeline EL8000 system will not fit in an Edgeline EL8000t, and vice versa

HPE EL8000t Systems Power Supply

- The HPE Edgeline EL8000t Systems supports redundant hot-plug power supplies.
Min: 1, Max: 2
- HPE Edgeline EL8000 Front Cabling Chassis 1500W 264VAC Power Supply Kit
- HPE Edgeline EL8000 Front Cabling Chassis 1500W 48VDC Power Supply Kit

Notes: Mixing of AC and DC power supply options in a chassis is allowed

Embedded Management

The HPE ProLiant Blade Servers plugged into an HPE Edgeline EL8000t has its own iLO 5 management processor, which can be accessed directly through the management network port on the blades respective Network module.

The HPE Edgeline EL8000t System has an Edgeline Chassis Controller Module to monitor and control common chassis elements. The iLO 5 on the server blade communicates with the Edgeline Chassis Controller to gather and report status information on the chassis itself. The chassis controller cannot be directly accessed by the user.

Monitor your servers for ongoing management, service alerting, reporting and remote management with HPE iLO.

Learn more at <http://www.hpe.com/info/ilo>

HPE Edgeline Component Pack

The HPE Edgeline Component Pack, is the delivery mechanism for firmware updates on the HPE Edgeline System. Before using your system for the first time, verify that you have the latest drivers, firmware, and system software installed. Update your system with the Edgeline Component Pack.

For more information, see the Edgeline Component Pack Update Guide on the Hewlett Packard Enterprise website:

<http://www.hpe.com/info/edgeline-docs>

Service and Support

HPE Pointnext Service and Support

Get the most from your HPE Products. Get the expertise you need at every step of your IT journey with **HPE Pointnext Services**. We help you lower your risks and overall costs using automation and methodologies that have been tested and refined by HPE experts through thousands of deployments globally. HPE Pointnext **Advisory Services** focus on your business outcomes and goals, partnering with you to design your transformation and build a roadmap tuned to your unique challenges. Our **Professional** and **Operational Services** can be leveraged to speed up time-to-production, boost performance and accelerate your business. HPE Pointnext specializes in flawless and on-time implementation, on-budget execution, and creative configurations that get the most out of software and hardware alike.

Consume IT on your terms

HPE GreenLake brings the cloud experience directly to your apps and data wherever they are—the edge, colocations, or your data center. It delivers cloud services for on-premises IT infrastructure specifically tailored to your most demanding workloads. With a pay-per-use, scalable, point-and-click self-service experience that is managed for you, HPE GreenLake accelerates digital transformation in a distributed, edge-to-cloud world..

- Get faster time to market
- Save on TCO, align costs to business
- Scale quickly, meet unpredictable demand
- Simplify IT operations across your data centers and clouds

Managed services to run your IT operations

HPE GreenLake Management Services provides services that monitor, operate, and optimize your infrastructure and applications, delivered consistently and globally to give you unified control and let you focus on innovation.

Free up resources with Operational Services from HPE Pointnext Services

HPE delivers services for IT by using proven best practices as well as automation and methodologies that have been tested and refined by HPE experts and artificial intelligence through thousands of deployments globally. Choose from the recommended services for customers purchasing from Hewlett Packard Enterprise or an authorized reseller. Services are quoted using Hewlett Packard Enterprise order configuration tools.

HPE Pointnext Tech Care

HPE Pointnext Tech Care is the new operational service experience for HPE products. Tech Care goes beyond traditional support by providing access to product specific experts, an AI driven digital experience, and general technical guidance to not only reduce risk but constantly search for ways to do things better. HPE Pointnext Tech Care has been reimagined from the ground up to support a customer-centric, AI driven, and digitally enabled customer experience to move your business forward. HPE Pointnext Tech Care is available in three response levels. Basic, which provides 9x5 business hour availability and a 2 hour response time. Essential which provides a 15 minute response time 24x7 for most enterprise level customers, and Critical which includes a 6 hour repair commitment where available and outage management response for severity 1 incidents.

<https://www.hpe.com/services/techcare>

HPE Pointnext Complete Care

HPE Pointnext Complete Care is a modular, edge-to-cloud IT environment service that provides a holistic approach to optimizing your entire IT environment and achieving agreed upon IT outcomes and business goals through a personalized and customer-centric experience. All delivered by an assigned team of HPE Pointnext Services experts. HPE Pointnext Complete Care provides:

- A complete coverage approach -- edge to cloud
- An assigned HPE team
- Modular and fully personalized engagement
- Enhanced Incident Management experience with priority access
- Digitally enabled and AI driven customer experience

Service and Support

Connect your devices

Unlock all of the benefits of your technology investment by connecting your products to Hewlett Packard Enterprise. Reduce down time, increase diagnostic accuracy and have a single consolidated view of your environment. By connecting, you will receive 24x7 monitoring, pre-failure alerts, automatic call logging, and automatic parts dispatch. HPE Tech Care Service and HPE Complete Care Service customers will also benefit from proactive activities to help prevent issues and increase optimization. All of these benefits are already available to you with your server storage and networking products, securely connected to HPE support. Learn more about getting connected at <http://www.hpe.com/services/getconnected>

Other related services from HPE Pointnext

Defective Media Retention

Is an option available with HPE Complete Care, HPE Tech Care, Tech Care Advanced, and HPE Tech Care and applies only to Disk or eligible SSD/Flash Drives replaced by Hewlett Packard Enterprise due to malfunction.

HPE Server Hardware Installation

Provides for the basic hardware installation of your new Edgeline System. It is part of a suite of HPE deployment services that are designed to give you the peace of mind that comes from knowing your HPE products have been installed by an Hewlett Packard Enterprise authorized service specialist in accordance with the product's documentation.

<https://www.hpe.com/h20195/v2/Getdocument.aspx?docname=a00062322enw>

HPE Installation and Startup Service

Provides for the installation of your new Edgeline System. This service will assist you in bringing your new HPE Edgeline System into operation and make it remotely accessible in a timely and professional manner. The HPE service delivery technician will connect the product to the network as appropriate and enable remote support to allow for automatic case creation for hardware failures. Installation and start up services also includes the installation of one supported operating system type (Windows® or Linux).

<https://www.hpe.com/h20195/v2/Getdocument.aspx?docname=a00062211enw>

HPE Service Credits

Offers flexible services and technical skills to meet your IT demands as your business evolves. With a menu of services, you can access additional resources and specialist skills to help you maintain peak performance of your IT. HPE Service Credits help you proactively respond to your dynamic IT and business needs.

HPE Education Services

Provides comprehensive training designed to expand the skills of your IT staff and keep them up to speed with the latest technologies.

Consult your HPE Sales Representative or Authorized Channel Partner of choice for any additional questions and support options.

Warranty

This product is covered by a global limited warranty and supported by Hewlett Packard Enterprise Services and a worldwide network of Hewlett Packard Enterprise Authorized Partner Ready Resellers. Hardware diagnostic support and repair is available for three years from date of purchase. Support for initial setup is available for 90 days from date of purchase. Enhancements to the warranty services are available through HPE services or customized service agreements. Hard drives have either a one year or three-year warranty; refer to the specific hard drive QuickSpecs for details.

Notes: Chassis Warranty includes 3-Year Parts, 3-Year Labor, 3-Year Onsite support with next business day response. Warranty repairs may be accomplished through the use of Customer Self Repair (CSR) parts. These parts fall into two categories: 1) Optional CSR parts are designed for easy replacement but may involve added complexity. Customers may choose to have Hewlett Packard Enterprise replace Optional CSR parts at no charge. 2) No CSR parts require a Hewlett Packard Enterprise authorized service provider to replace the part. Additional information regarding worldwide limited warranty and technical support is available at: <http://www.hpe.com/support/ProLiantServers-warranties/>

Service and Support

Parts and Materials

Hewlett Packard Enterprise will provide HPE-supported replacement parts and materials necessary to maintain the covered hardware product in operating condition, including parts and materials for available and recommended engineering improvements.

Parts and components that have reached their maximum supported lifetime and/or the maximum usage limitations as set forth in the manufacturer's operating manual, product QuickSpecs, or the technical product data sheet will not be provided, repaired, or replaced as part of these services.

The defective media retention service feature option applies only to Disk or eligible SSD/Flash Drives replaced by Hewlett Packard Enterprise due to malfunction.

- <https://www.hpe.com/us/en/services/operational.html>

To learn more on HPE Storage Services, please contact your Hewlett Packard Enterprise sales representative or Hewlett Packard Enterprise Authorized Channel Partner. Contact information for a representative in your area can be found at "Contact HPE" <https://www.hpe.com/us/en/contact-hpe.html>

HPE Support Services are sold by HPE and Hewlett Packard Enterprise Authorized Service Partners:

- Services for customers purchasing from HPE or an enterprise reseller are quoted using HPE order configuration tools.
 - Customers purchasing from a commercial reseller can find HPE Support Services at <https://ssc.hpe.com/portal/site/ssc/>
-

Configuration Information

This section lists some of the steps required to configure a Factory Integrated Model. To ensure only valid configurations are ordered, Hewlett Packard Enterprise recommends the use of a Hewlett Packard Enterprise approved configurator. Contact your local sales representative for information on configurable product offerings and requirements.

Factory Integrated Models must start with an HPE Edgeline EL8000t System with the following minimum configuration:

- One (1) HPE Edgeline e920t Blade Server.
- One (1) HPE Edgeline EL8000 Power Supply

Step 1: Base Configuration (Choose System)

HPE Edgeline System

HPE Edgeline EL8000t 2U Configure-to-order 2.0 Front Cabling Chassis P41382-B21

HPE Edgeline EL8000t Chassis Controller P27143-B21

Notes: One ECM is required for chassis management of the EL8000t. This kit must be placed in the left hand bay. A second EL8000t Chassis Controller is required to enable iLO networking in the second slot if a second e920t blade server is installed.

Step 2: Power Supply

Power Supplies

HPE Flex Slot Power Supplies (Min:1, Max:2)

HPE Edgeline EL8000 1500W 264VAC Front Cabling Power Supply Kit P11290-B21

HPE Edgeline EL8000 1500W -48VDC Front Cabling Power Supply Kit P11291-B21

HPE Edgeline 900W -48VDC Power Supply Kit P41590-B21

HPE Edgeline 1500W 264VAC Titanium Power Supply Kit P42206-B21

Notes:

- Functional systems require at least 1 power supply to be configured, with 2 power supplies recommended for redundancy
- Mixing of AC (P11290-B21) and DC (P11291-B21) power supplies in a chassis is allowed
- The AC power supply (P11290-B21) supports a nominal input of 100-240Vac. Refer to the appendix for technical details.
- The Titanium Power Supply Kit (P42206-B21) is offering to the EMEA region only.
- European Union ErP Lot 9 Regulation: Beginning on January 1st, 2024, the EU's Lot 9 eco-design regulations for servers and storage products will enforce minimum efficiency for AC power supplies: 94% for multi-output and 96% for single-output. HPE Edgeline power supplies that meet Lot 9 requirements is: Titanium Power Supply Kit (P42206-B21). HPE configurators are already informing users about the mandate for units going to the EU or European Economic Area (EEA) to comply with Lot 9 minimum efficiencies that begin on January 1st, 2024. HPE will start enforcing Lot 9 minimum efficiency for AC power supplies on November 6th, 2023; purchase orders placed on or after this date that include AC power supplies that aren't Lot 9 compatible will need rework to replace them.

Step 3: Configure ProLiant Server Blade (Min:0, Max: 2)

HPE Edgeline e920t Configure-to-order Blade Server P40893-B21

Notes:

- Refer to the e920t quickspecs for blade configuration details.
https://www.hpe.com/psnow/doc/a50002574enw?jumpid=in_lit-psnow-red
- Maximum of two (2) 2U blades.
- Mixing of e910t and e920t blades is allowed. Each blade operates independently.

Step 4: Configure Additional Options

Choose additional options for Factory Integration from sections below

Additional Options

Rail Kit

HPE Edgeline EL8000t 2-post Rack Mount Option Kit	P41584-B21
HPE Edgeline EL8000t 4-post Rail Kit	P27068-B21
HPE Edgeline EL8000t 4-post Rack Mount FIO Option Kit	P41383-B21

Notes:

- 2-post Rack Mount Option Kit (P41584-B21) is not required. The EL8000t chassis arrives standard with a 2-post 19" rack kit.
- The 2-post Rack Mount Option Kit contains additional accessories including lugs, 23" extenders, and cable management to enable remote edge installations using DC power.
- The 4-post Rack Mount Option Kit and 4-post Rail Kit must be purchased together. The option kit (P41383-B21) includes racking ears that will retain and stabilize the chassis on the rails. The 4-post rail kit (P27068-B21) includes the rails themselves.

HPE Power Cords

HPE 48VDC 2.85m Power Cable	Q0H80A

Technical Specifications

Physical Dimensions

- **Chassis Dimensions (H x W x D)**
 - Height 3.5" (2U) (8.89 cm)
 - Width 19" (48.26 cm)
 - Depth 17" (43.2 cm)
- **Weight:** 25 lbs
- **Power**
 - Typical: 800W
 - Maximum: 3000W (with power supply redundancy)

System Inlet Temperature

- **Extended Operating**

Depending on hardware configuration, the supported system inlet range can be extended up to 55°C. Compliance to NEBS Level 3 and ASHRAE A3 and A4 standards is also available.

Notes: [The approved extended temperature hardware configurations for this system are listed in the appendix.](#)
- **Standard Operating**

10° to 35°C (50° to 95°F) at sea level with an altitude derating of 1.0°C per every 305 m (1.8°F per every 1000ft) above sea level to a maximum of 3050m (10,000ft), no direct sustained sunlight. Maximum rate of change is 20°C/hr (36°F/hr). The upper limit and rate of change may be limited by the type and number of options installed.

Notes: [When configured with certain server models, a fan fault when operating above 30°C \(86°F\) may reduce system performance. Refer to the appendix for details.](#)
- **Non-Operating**

-30° to 60°C (-22° to 140°F). Maximum rate of change is 20°C/hr (36°F/hr).

Relative Humidify

- **Operating**

Minimum to be the higher (more moisture) of -12°C (10.4°F) dew point or 8% relative humidity. Maximum to be the lower (less moisture) of 24°C (75.2°F) dew point or 90% relative humidity
- **Non-Operating**

5 to 95% relative humidity (Rh), 38.7°C (101.7°F) maximum wet bulb temperature, non-condensing.

Altitude

- **Operating**

3050 m (10,000 ft). This value may be limited by the type and number of options installed. Maximum allowable altitude change rate is 457 m/min (1500 ft/min).
- **Non-Operating**

9144 m (30,000 ft). Maximum allowable altitude change rate is 457 m/min (1500 ft/min)

Emissions Classification (EMC)

- **FCC Rating**

- **Normative Standards**

CISPR 22; EN55022; EN55024; FCC CFR 47, Pt 15; ICES-003; CNS13438; K22;K24; EN61000-3-2; EN 61000-3-3; EN 60950-1; IEC60950-1

Notes: [Product conformance to cited product specifications is based on sample \(type\) testing, evaluation, or assessment. This product or family of products is eligible to bear the appropriate compliance logos and statements.](#)

Technical Specifications

Hewlett Packard Enterprise Extended Ambient Operating Temperature Support

The American Society of Heating Refrigeration and Air-Conditioning Engineers set standards for building systems, energy efficiency, indoor air quality, refrigeration and sustainability. The ASHRAE A3 and A4 classes are the latest classes that have been defined in an effort to support the Fresh Air Data cooling initiative. Hewlett Packard Enterprise Extended Ambient Operating Support is defined below as comparable to an ASHRAE class. For selected system configurations the Hewlett Packard Enterprise Edgeline Extended Ambient Operating Support allows operation even beyond ASHRAE class.

Notes: Actual allowable system operating temperature will be determined by the options (I/O cards, drives etc.) selected. Details are provided in the Edgeline system configuration tables for the desired operating environment shown below.

The following table provides a summary of environmental ranges supported, with altitude de-ratings, by Hewlett Packard Enterprise ProLiant servers. Items in bold are ProLiant features that exceed the ASHRAE comparable class feature set.

Extended Ambient Operating Support Specification					
Ambient Operating	Dry bulb temp range (°C)	Relative humidity range (%RH)	Dew point limits (°C)	Maximum altitude	Altitude de-rating*
Standard Operating	10°C to 35°C (50°F to 95°F)	8% to 90%	-12°C (min) to 24°C (max)	3050 meters	1.8°C/305m above sea level
Extended Ambient 40°C Operating (ASHRAE Class A3 compliant)	5°C to 40°C (41°F to 104°F)	8% to 90%	-12°C (min) to 24°C (max)	3050 meters	1.0°C/175m above 900m
Extended Ambient 45°C Operating (ASHRAE Class A4 compliant)	5°C to 45°C (41°F to 113°F)	8% to 90%	-12°C (min) to 24°C (max)	3050 meters	1.0°C/125m above 900m
Extended Edgeline Ambient 55°C Operating	0°C to 55°C (32°F to 131°F)	8% to 90%	-12°C (min) to 24°C (max)	3050 meters	1.8°C/305m above sea level

Notes:

- *Altitude de-rating assumes no direct sustained sunlight
- The maximum rate of change for Inlet Ambient Temperature is 20°C/hr (36°F/hr). The upper limit and rate of change can be limited by the type and number of options selected.

Hewlett Packard Enterprise Operating Support				
Component	Support Status
