HPE Education Services for HPE Synergy and HPE Composable Infrastructure

Empower your workforce. Accelerate to exceptional.

With HPE Synergy, you gain efficiency and control by deploying IT resources quickly through HPE OneView, a single interface. A powerful software-defined solution, HPE Synergy lets you compose fluid pools of physical and virtual compute, storage, and fabric resources into any configuration, for any workload.

In order to achieve successful technology transformation, changes are required to both skillsets and mindsets. We know that people learn in different ways, and that there are many steps on the journey to composability. Companies need to free up resources from day-to-day maintenance tasks and allow them to push the company toward innovation.

Hewlett Packard Enterprise can show you how to make the most of your HPE Synergy and HPE Composable Infrastructure investment with our extensive HPE Synergy technical training curriculum in combination with **HPE Management of Change (MoC) Services**.

Partner with HPE for training
- Gain the skills to manage day-to-day administration
- Tackle technology transition with confidence
- Select follow-on courses specific to needs and focus
- Continue your learning with HPE Digital Learner subscriptions, online self-paced training for individuals and teams

Prepare your workforce for transformation with HPE Synergy
Are you are about to invest in HPE Synergy? If so, you might find yourself in one of the following situations.

- You are moving from blades to composable infrastructure.
- You are not sure how to get started with automation.
- Your business model changes and this affects your IT operations.
- Your processes, SLAs, peoples' tasks and job roles will change.

If your IT teams are already fully immersed in daily operations and have no time for strategic tasks, perhaps you should ask yourself:

- How will our people and organization support this transformation to composable?
- Do our people have the right skills to achieve automation?
- Will there be a dip in productivity?
- Are we likely to encounter any resistance among our staff to the change?

If you can answer **yes** to one or more of these questions, then you should consider support from HPE MoC consultants in order to make your transformation successful.

HPE Synergy training curriculum
Building skills is one of the most effective ways to improve productivity, manage change, and build employee confidence. Well-trained personnel make better decisions, helping to increase business agility and sharpen your competitive edge.

Our comprehensive **HPE Synergy training curriculum** delivers the skills and knowledge your team needs. Figure 1 provides an overview of the **HPE Synergy and HPE OneView curriculum path**.

H9TS2AAE	HPE SimpliVity System Administration for vSphere WBT	2 hours
H9TS3AAE	HPE SimpliVity System Administration for Hyper-V WBT	2 hours

HPE technical training

HPE technical training helps you improve your ROI in HPE Synergy and HPE Composable Infrastructure technologies. Official training shortens time to implementation and improves productivity once the systems are in place. HPE trains your staff using real equipment and systems environments which model actual business scenarios. Our industry-leading instructors have full access to the developers who drive technology innovation. Like HPE products themselves, our technical training is simple, agile, and offers great value.

Simple to use
Select from job-focused courses that can be ordered individually to meet specific training needs. For value and flexibility, purchase **HPE Training Credits**. HPE Training Credits are easy to purchase as well as simple to manage, and can be purchased with hardware, software, or support contracts.

Agile
We offer a variety of training methods to match your needs. You can choose traditional instructor-led courses at one of our 120 training centers worldwide or on-site training customized to your needs, in your facility. You can also opt for virtual instructor-led training (VILT) that combines the best features of traditional classroom training (including live instructors and labs) with the best features of online training (no traveling required). What's more, if you prefer learning **on your own schedule at your own pace**, you can make use of online, self-paced training through **HPE Digital Learner**.

Great value
Training from HPE may actually cost you less than informal training. Using your own experts to train less knowledgeable IT staff may seem **free** at first glance, but in reality, you are tying up the time of two valuable team members. With HPE technical training, only the people in need of training are involved, leaving your most experienced and valuable staff members available to focus on their duties.

HPE Management of Change Services

With HPE Synergy, your IT experts' thinking expands beyond hardware provisioning. IT operations need to understand how the demand for speed changes the company's business model and how this translates into faster hardware provisioning. Your IT operations team has to start with automation in a pragmatic way that is tailored to your company.

HPE understands the importance of engaging IT teams to make your IT enabled business change successful. Senior HPE consultants can support you with Management of Change (MoC), a formalized approach to transitioning individuals, teams, and organizations to a desired future state. **HPE Management of Change Services** are designed to help companies achieve desired business results by proactively preparing and supporting people throughout technology change while also helping minimize known causes of failed technology adoption. HPE MoC Services include:

• Change Impact Analysis

• Stakeholder engagement

• Change plan and communications

• Skills Gap Analysis and upskilling

• IT organizational design

Our **experts** support the plans of many global clients and deliver predictable, effective benefits through MoC. These benefits include faster adoption of new technology, new processes, and new ways of working to help ensure that your people have the motivation, knowledge, and skills necessary to succeed.

HPE Digital Learner subscriptions

HPE Digital Learner subscription services offer ongoing technology training and skills development—to individuals and teams—at a better value for your business. We do this by putting effective technology training within reach for more people in your organization—at less cost per participant and with less disruption to your business. **HPE Digital Learner** delivers online, on-demand, self-paced learning through a state-of-the-art learning platform. It features predefined learning paths, searchable and sharable content, virtual hands-on labs, social learning, metrics, and reporting—all available at point of need to your workforce.

HPE Peak Performance Digital Badging

HPE innovative training solutions help accelerate the digital transformation journey and unleash the power of your technology investment. Learning is a critical part of how we stay ahead, helping us to develop the skills that we need to achieve peak performance levels.

The **HPE Peak Performance Digital Badging program** recognizes IT professionals for their talents, skills, and training achievements through verifiable digital credentials. Using the **HPE verified badging program**, you can track training achievements, show status within a community, progress your training journey to gain greater expertise, and share your HPE credentials with the world. Visit us **online** to learn more about HPE digital credentials related to HPE Synergy and HPE Composable Infrastructure.
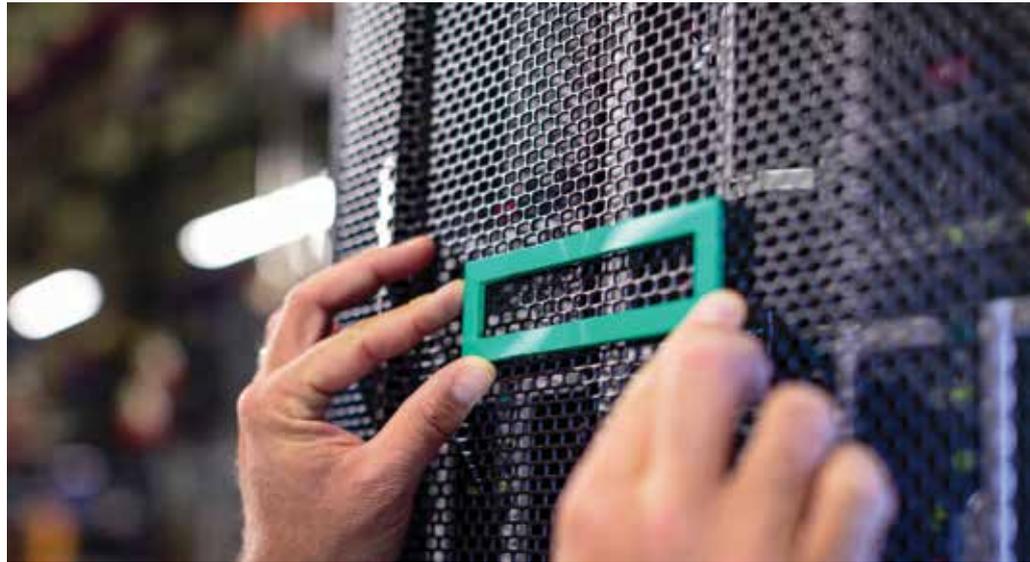

HPE Training Credits

For a simple, flexible, and economical way to purchase training from HPE, consider **HPE Training Credits**. This package provides your company with credits like a bank account, which can be used for scheduled instructor-led courses or online courses. If you know that your organization needs technical training, but are not exactly sure who needs what and when, then the flexibility of HPE Training Credits is an ideal match.

Why HPE?

HPE has built its education services on a solid foundation of experience, content, delivery, and innovation.

- Over the past 40 years, we have trained over 3.25 million customers on HPE and industry products and technologies, as well as IT management skills.

- HPE Education Consulting has over 35 years of experience in supporting the IT transformation needs of customers.

- Our curriculum includes over 2000 courses, leading to more than 15 HPE certifications and more than 30 vendor certifications.

- We bring consistent credentials, delivery, and results to customers worldwide—serving customers in more than 70 countries and in over 40 languages.

- HPE has key partnerships with industry leaders such as OpenStack®, VMware®, Linux®, Microsoft, ITIL®, PMI, CSA, and (ISC)[2]. Note: (ISC)[2] is International Information Systems Security Certification Consortium—a non-profit organization.

- We offer a complete continuum of training delivery options—self-paced eLearning, custom education consulting, traditional classroom training, video on-demand instruction, live virtual instructor-led training with hands-on labs, dedicated on-site training, and remote hands-on training with guided lab practice through HPE Education Services vLabs.

- Flexible and simplified purchase options are available with HPE Training Credits.
