

# HPE Factory Express Solutions Expansion Cable Kit

ZU724A

## Service overview

[HPE Factory Express Solutions Expansion Cable Kit](#) enables customers to receive a standalone box of customized point-to-point cables supporting the expansion of an already deployed HPE solution.

## Service benefit

Allows HPE customers to add-on or expand an existing deployed solution with the same type of cables, lengths, and custom cable labeling.

## Service features highlights

- Cable color selection on Ethernet Cat6 cables
- Depending on the cable type, custom cable lengths are supported
- Customer-defined cable labeling
- Customer receives a customized cable kit tailored to their solution

## Special considerations and limitations

In general, customers can customize certain cable attributes such as length, color, and label depending on the type of cable and amount of information to be displayed on the cable label. The total cable length limited to 200 ft per box.

For cable labeling, additional HPE Factory Express service must be ordered with HPE Factory Express Solutions Expansion Cable Kit. Typically, the HPE Customer Defined Rack Cable Label Service will need to be ordered and nested to HPE Factory Express Solutions Expansion Cable Kit, along with the cables, to provide a complete kit.

Customers must provide to HPE accurate technical specifications and/or configuration information because the delivery and benefits of this service depend upon the quality of the customer's own information. The customer's obligation to provide accurate technical specifications and or configuration information is a material condition to HPE's performance of the service.
