Getting started

About this document

The HPE Hyper Converged 250 System for VMware vSphere Matrix of Qualified Software and Firmware outlines the host operating system, HPE OneView InstantOn, HPE StoreVirtual Software, and component level firmware versions qualified to run on HPE Hyper Converged 250 System for VMware vSphere. Hewlett Packard Enterprise recommends running your HPE Hyper Converged 250 System for VMware vSphere with the following software and firmware versions. Upgrades beyond the software and firmware versions listed in this document, except where explicitly stated, or as advised by HPE support, may introduce unexpected behavior and are not supported.

The most recent version of this document can be found on <https://www.hpe.com/info/HCUUpdates>

Firmware and software updates

Updates for individual software and firmware components may be found at the following links and at <https://www.hpe.com/info/HCUUpdates>.

Definitions

Upgrade

During an upgrade, newer software or firmware components are applied to the system; this includes going to the next major or minor version.

Examples:

- LeftHand OS 12.6 > LeftHand OS 12.7 > LeftHand OS 12.8 + all critical patches
- vSphere ESXi 6.0 U2/U3 > ESXi 6.5 U2/U3
- vSphere ESXi 6.0 U2/U3 > ESXi 6.7 U1/U2/U3
- vSphere ESXi 6.5 U3 > ESXi 6.7 U1/U2/U3

Before upgrading ESXi from vSphere 6.5 U2 to vSphere 6.7 U1, refer to customer Advisory available at https://support.hpe.com/hpsc/doc/public/display?docId=emr_na-a00065358en_us.

Update/Patch/Hotfix

When applying updates, hotfixes, and patches, the major/minor revision of a software or firmware component remains unchanged.

Example:

- vSphere ESXi 6.5U2 > ESXi 6.5U3
- vSphere ESXi 6.7U1 > ESXi 6.7U2/U3

Management software

The following tables list the latest software versions qualified to run on the management VM of HPE Hyper Converged 250 System for VMware vSphere.

See the HPE Hyper Converged 250 System for VMware vSphere Installation Guide for reinstallation of the management VM.

Node software recommendations

The following table lists the latest software versions qualified to run on HPE Hyper Converged 250 System for VMware vSphere.

See *HPE Hyper Converged 250 System for VMware vSphere Installation Guide* for reinstallation of one or more nodes.

vSphere patches and update roll-ups (U1) may be applied to the system without impacting support. Upgrades to major or minor versions not covered in this document are not supported.

Node firmware and drivers recommendations

Obtain the latest HPE Service Pack for ProLiant VMware Recipe by visiting <https://vibsdepot.hpe.com/> and open the link **Current HPE Servers and option firmware and driver support recipe document**. An approved version of the Service Pack for ProLiant is available on the HPE Support Center OS Independent download page for HPE Hyper Converged 250 System for VMware vSphere. These firmware levels should be maintained on each of the four nodes in the HPE Hyper Converged 250 System for VMware vSphere.

The latest SPP is Gen9 post-production SPP and contains components for the Gen9 server platforms. For additional information, see "Reducing Server Updates." Post-Production SPPs can be downloaded from <https://www.hpe.com/servers/SPP/download>.

❗ **IMPORTANT:** Access to some updates might require product entitlement when accessed through the Hewlett Packard Enterprise Support Center. You must have an HPE Passport set up with relevant entitlements.

Remote support

Remote support is available with supported devices as part of your warranty or contractual support agreement. It provides intelligent event diagnosis, and automatic, secure submission of hardware event notifications to Hewlett Packard Enterprise, which will initiate a fast and accurate resolution based on your product's service level. Hewlett Packard Enterprise strongly recommends that you register your device for remote support.

If your product includes additional remote support details, use search to locate that information.
