

# HPE Juniper Networking private training

A complete training engagement

## Overview

Private Training from Juniper Education Services delivers a comprehensive learning program to its customers. This training has been designed specifically for companies seeking to ensure that their IT teams have the skills they need to derive the highest performance from their networks and HPE Juniper Networking solutions.

Private training from HPE improves on the traditional private or custom training class model with the incorporation of prerequisite and post-requisite training, certification, and sustaining components. This develops an end-to-end training solution that delivers effective knowledge transfer and skills growth.

By addressing before and after class phases of the learning engagement, students are prepared to learn more during the private session and retain more of the skills learned after the class. Private training provides the information students need to succeed, challenges them to demonstrate their skills via certification, and ensures that skills are maintained with continued learning. Figure 1 shows the HPE Juniper Networking private training model.

## Features and benefits

Get exactly what you need and save time:

- Select fresh content from our library
- Design a custom agenda unique to your organization's requirements
- Save time by focusing only on what you need

Train on your timeline and how you learn best:

- Choose your own dates aligned to your project cycles and team availability
- Choose from a variety of learning modalities (on-site, virtual classroom, or on demand)

Learn from experts, dedicated to your team:

- Engage with highly knowledgeable instructors available to quickly answer your technical questions and assist with hands-on labs

Optional services:

- Pre-testing—ensure the proposed class will meet your needs
- Post-testing—ensure you can apply what you learned
- Certification testing—align your skills to industry benchmarks

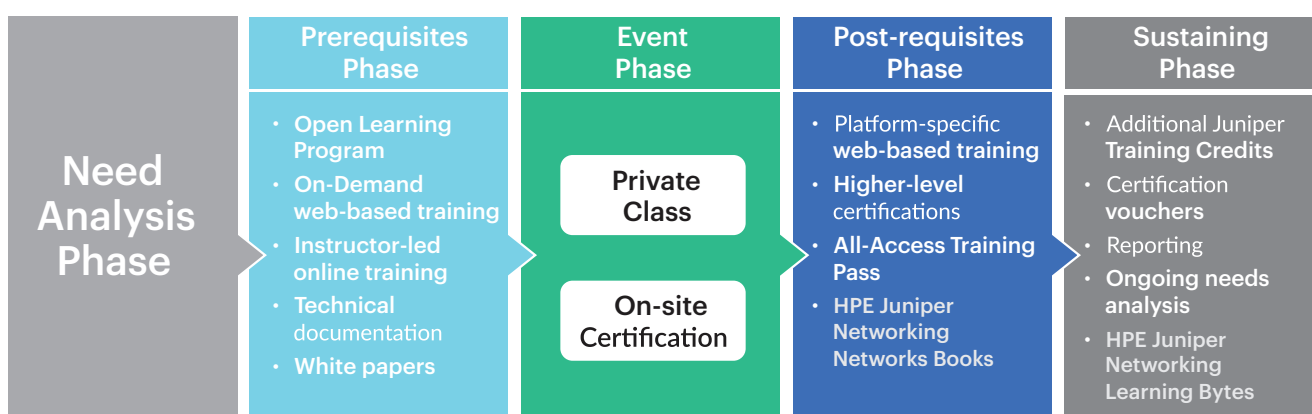

Figure 1. Phases of a private training engagement

## Components of private training

When completed, your private training plan will include:

- **Education Services offerings**—overview of the types of training components included in the training plan
- **Training program summary**—summary of the training plan components, technical requirements for the engagement, and prerequisite information that students should know to be successful
- **Review of certification components**—information on recommended certification credentials and links to more information and resources
- **Complete pricing information**—breakdown of the pricing for the various training components

— **Detailed daily agendas**—day-by-day look at the material that will be covered in the formal training sessions

— **Customer testimonials**—first-hand accounts from customers with real-world challenges

— **Training team profile**—insight into the professionals who develop and deliver your training solution

## Training modalities

Private training plans are designed for each customer using a range of learning modalities that help accommodate both organizational training requirements (location, timing, and so on.) and individual learning preferences. Common training modalities are described in Table 1.

**Table 1.** Training modalities

Training modality	Description
Public classes	Instructor-led training conveniently schedules around the world and offered by Juniper Education Services or our network of Authorized Education Partners
Private classes	Instructor-led training at HPE Juniper Networking facilities or at the customer site, letting Education Services come to you
Customized learning	Courseware that is tailored to fit your unique application and technical needs
Instructor-Led Online (ILO)	Instructor-led training delivered live online with the same hands-on courseware as our traditional classroom courses, eliminating the need for travel
On-Demand training	The perfect combination of web-based training and access to hands-on remote labs
Web-based eLearning	Web-based delivery of hundreds of videos and e-learning courses providing a high-level overview of HPE Juniper Networking solutions and product-specific learning

## Getting started

To start your private training engagement, please contact the Juniper Education Services team:
