IT infrastructure
automation made easy

6 ways to increase
productivity with
HPE OneView

Partner ecosystem

HPE OneView is an integrated IT management solution that transforms compute, storage, and networking into software-defined infrastructure.

Software-defined infrastructure enables IT to:

- Easily provision and manage physical infrastructure using software-defined templates and APIs to define and automate infrastructure configuration and lifecycle operations
- Manage infrastructure as pools of resources to streamline administrative and operational tasks
- Improve staff productivity and increase the pace of introducing new technologies and applications
- Lower costs associated with downtime and regulatory risks

Partner ecosystem

Transform with software-defined automation

Software-defined automation in HPE OneView enables IT administrators to deploy infrastructure faster, simplify lifecycle operations, and increase productivity.

Compose for any workload

The data center physical infrastructure is defined using software, which makes it programmable and able to be managed as code through a unified API.

Connect from core to cloud

Provision turnkey private cloud infrastructure and leverage the partner ecosystem to integrate HPE OneView within your existing management frameworks and preferred platforms.
