

### Overview

#### HPE Solutions with Cohesity

Cyber threats are becoming more sophisticated over time. Protecting software and networks alone is no longer enough. HPE Solutions with Cohesity redefines data security and management via a highly secure infrastructure, including HPE's industry-leading secure supply chain, Silicon Root of Trust and a cyber-resilient data management platform, Cohesity Data Cloud.

Unlike antiquated legacy point products that cause vulnerabilities due to fragmentation and inefficient operations, only HPE Solutions with Cohesity offers a 360-degree approach with Zero Trust security from silicon to cloud with a web-scale, cyber-resilient, secure data management platform spanning on-premises and cloud.

HPE Solutions with Cohesity uniquely empowers organizations to protect data and apps, detect cyber threats, backup and manage data, and recover rapidly at scale from an attack across dispersed IT environments while immediately increasing operational efficiency and giving visibility and analytics into all data. You get all of the benefits and none of the hassles with pay as you grow with the choice of on-prem and HPE GreenLake as a service option through HPE or its partners as a one-stop shop.

HPE Solutions with Cohesity are built on the ProLiant DL360 Gen10 Server, DL360 G10 Plus Server, DL380 Gen10 Plus, the ProLiant DL320 Gen11 Server, the Alletra 4120 Storage Server and the DL325 Gen11 Server

#### What's new

- New HPE ProLiant DL325 Gen 11 Servers in four capacities to support all-flash data protection use-cases.
- New functionality for Cohesity Cloud Services (CCS) including bundles, Flexible retention, government editions and FortKnox for Azure
- New Alletra 4120 Servers are now supported for cluster and archive use-cases.
- New HPE ProLiant DL320 Gen11 Servers are now supported for cluster, ROBO and Compute use-cases.

### Cohesity Software Services

Multiple-point products into a single software that can be deployed on-premises or consumed as a service (BaaS)

#### Cohesity DataProtect Service

Cohesity DataProtect is a high-performance, secure backup and recovery solution. Designed to safeguard your data against sophisticated cyber threats, it offers the most comprehensive policy-based protection for your cloud-native, SaaS, and traditional data sources. DataProtect converges

For more information, visit: <https://www.cohesity.com/products/dataprotect/>

#### Cohesity DataProtect Replica Service

Cohesity DataProtect Replica provides the ability to replicate data backed up using DataProtect service to another Cohesity cluster.

#### Cohesity SmartFiles Service

Cohesity SmartFiles is an enterprise-class, software-defined, datacentric, multiprotocol file and object solution for the enterprise that transcends traditional offerings in terms of manageability, scale, security, efficiency and multi-tiered data management. It is based on the Cohesity Data Cloud multi-cloud data platform, which delivers a patented distributed architecture for scale-out storage in a pay-as-you-grow model that never requires disruptive upgrades.

SmartFiles modernizes and simplifies data and application management by providing one platform for multiple workloads. It is a modern converged target for consolidating data silos and securely managing unstructured content and application data, including digital libraries, archives, rich media, video surveillance, big data and backup data sets.

For more information, visit: <https://www.cohesity.com/products/smartfiles/>

#### Cohesity SiteContinuity Service

Cohesity SiteContinuity is a business continuity and disaster recovery (BCDR) service from Cohesity that enables continuous replication, and automates failover and failback orchestration, driven by a unified policy engine within a fully secure environment.

For more information, visit: <https://www.cohesity.com/products/sitecontinuity/>

### Cohesity Services Common features, Supported Platforms, and Licensing

The following applies to all Services listed above unless noted otherwise in the detailed Service sections.

#### All Services include:

- Cluster expansion, contraction, and upgrade
- Cluster resiliency and fault tolerance
- SpanFS: filesystem, snapshots, deduplication, compression, cloning, encryption
- Storage Domains
- Multi-tenancy, including Organizations
- The Cohesity Insight marketplace application
- Cluster UI
- Helios management UI, including all features formerly included in Helios Premium (such as Global Policies, Global Protection Mgmt, Orchestrated Upgrades, Global Custom Reports, What If Scenario analysis, Long-term metadata retention, and various cluster configuration management capabilities from centralized Helios management portal)

## Overview

### All Services can be deployed by on the following platforms:

- Physical servers: Customer-managed clusters with Cohesity-certified platforms including HPE Apollo and ProLiant servers
- Public cloud: Customer-managed clusters in Cohesity-certified public clouds, including Amazon AWS, Microsoft Azure, Google GCP as VMs
- Virtualized environments: Customer-managed clusters in virtualized environments in VMware and Hyper-V environments
- Edge/ROBO: Customer-managed clusters with Cohesity-certified platforms including HPE nodes designated as “ROBO nodes”

**Notes:** That Cohesity clusters cannot be a mix of the 4 types of platforms above. For example, a cluster cannot consist of both physical and virtual servers.

Services are priced the same regardless of whether they are offered on spinning HDD media, flash-based SSD media, or some combination thereof.

Unless otherwise noted, all Services are licensed as follows:

- Per TB of data stored on the Cohesity cluster after deduplication and compression.

Services are licensed per usable/backend terabyte (BETB) in 1 TB increments.

### Cohesity License Overview

Cohesity software packaged “As a Service” can be run on any supported Cohesity cluster. Each Service entitles customers to all the cluster services, storage capacity, and data management features needed for the use case. Service licenses are licensed in 1 backend terabyte (BETB) increments or usable capacity after dedupe and compression. Customers can purchase for the exact amount needed which no longer require that the entire cluster be fully licensed (applies to Service SKUs only, not to previous Cohesity Data Cloud and Add-On Software Licenses).

Customers can mix and match any Services on a cluster. Customers can also mix and match earlier Cohesity software licenses such as Data Cloud with new Services within a cluster since license usage measurements are done across clusters in Helios.

A Cohesity cluster requires a minimum of 3 nodes (or 1 ROBO node) and can be built-in physical, public cloud, or virtual environments. For physical deployments, customers can run Cohesity software on certified hyperconverged nodes from HPE.

The Cohesity “As a Service” software supports additional features that can be purchased as add-on licenses. The table below shows the different software modules and how they can be combined.

Cohesity Software Service	+ 3 <sup>rd</sup> Party Add-ons
DataProtect	Kroll - Exchange, SharePoint, SQL QStar - Tape Christie BMR - Bare metal recovery
DataProtect Replica	
SiteContinuity	
SmartFiles	SentinelOne – Antivirus QStar - Tape

## Standard Features

### Cohesity Cloud services

HPE Solutions with Cohesity include Cohesity Cloud services for a comprehensive hybrid solution to manage data simply and at scale. **Cohesity Cloud Services** through HPE enables enterprises to protect data from ransomware, lowers the barriers to breaking down data silos, unify data management across on premises and the cloud with a single UI, while deriving value from your data.

1. Cohesity DataHawk provides multiple cloud service offerings to repel and recover from cyber incidents. It leverages AI/ML to detect anomalies that could indicate an emergent attack, utilizes threat intelligence to ensure recovery data is free of malware, and provides data classification to identify the exposure of sensitive and private information when an attack occurs. It also provides point-and-click data isolation and integrates with numerous SIEM, SOAR, and vulnerability scanning solutions.
  - a. The DataHawk is a full suite of software aaS services that includes FortKnox, ThreatProtection and DataClassification  
**Notes: DataHawk requires a minimum of 1 (2 minimum for HA) dedicated S2G17A HPE ProLiant DL320 Gen11 Configure-to-order Compute Server for Cohesity.**
  - b. FortKnox, ThreatProtection and DataClassification are also sold separately.
2. Cohesity FortKnox is a SaaS data isolation and recovery solution that improves cyber resiliency with an immutable copy of data in a Cohesity-managed cloud vault via a virtual air gap. FortKnox provides an additional layer of security against ransomware and other cybersecurity threats by delivering both data and operational isolation. Unlike traditional approaches to data isolation that are complex, costly, and time consuming, FortKnox dramatically simplifies operations and lowers costs with a cloud service that's as simple as connect, vault, and recover. It also helps organizations prepare for and recover confidently from attacks with quick, granular recovery back to the source or an alternate location, including cloud.
3. Cohesity ThreatProtection has the power of 100K+ AI/ML-trained ransomware/threat behavioral patterns. Ransomware and other attacks use deceptive tactics to cloak malware. Cohesity Threat Hunting helps find elusive threats using AI/ML-driven threat detection that identifies the latest variants of ransomware and other cyberattacks. The extensive library of over 100K behavioral patterns is updated daily.  
**Notes: ThreatProtection (standalone) requires a minimum of 1 (2 minimum for HA) dedicated S2G17A HPE ProLiant DL320 Gen11 Configure-to-order Compute Server for Cohesity**
4. Cohesity DataClassification uses ML/NLP to accurately discover sensitive data. Go beyond regex pattern matching using BigID's market-leading ML-based classification engine using Named Entity Recognition (NER), Natural Language Processing (NLP) techniques.  
**Notes: DataClassification (standalone) requires a minimum of 1 (2 minimum for HA) dedicated S2G17A HPE ProLiant DL320 Gen11 Configure-to-order Compute Server for Cohesity.**
5. Cohesity DataProtect delivered as a Service provides backup as a service that allows you to move to a more predictable cost model, simplify backup over hybrid cloud, and to protect and do more with your data. It is a cloud backup as a service that provides unified backup for on-premises, cloud, and SaaS workloads. With flexible capacity or user based pricing you can eliminate CapEx and surprise upgrade costs. It makes backup over hybrid cloud simple and secure by providing unified backup for all types of workloads through a single GUI. It improves productivity by freeing up IT and provides developers and analysts easy access to data so they can develop new apps and gain better insights. Just sign-up, connect, and protect your data while doing more with it.
  - a. M365 workload backup as a service - offers a comprehensive enterprise-class backup and data management for the Microsoft 365 Suite. Both AWS and Azure clouds are supported.

## Standard Features

6. Cohesity DataCloud are bundles of Cohesity DataProtect (on-prem) combined with Cohesity Cloud Services.
  - a. Cohesity DataCloud Standard: Includes DataProtect (on-prem) and Cohesity Ft. Knox. This is available in hot or cold versions.
  - b. Cohesity DataCloud Plus: Includes DataProtect (on-prem) and Cohesity DataHawk. This is available in hot or cold versions.
  - c. Add-on for either version of DataCloud include:
    - i. DataProtect aaS
    - ii. DataProtect M365 aaS

**Notes:** Cohesity DataCloud Plus requires a minimum of 1 (2 minimum for HA) dedicated S2G17A HPE ProLiant DL320 Gen11 Configure-to-order Compute Server for Cohesity

### Cohesity Data Cloud (formerly DataPlatform)

Cohesity Data Cloud consolidates secondary data and applications including backups, files, objects, test/dev, and analytics on a single, software-defined platform. Inspired by web-scale architecture, Data Cloud is a scale-out solution based on a unique distributed file system, SpanFS®. Data Cloud modernizes and simplifies secondary data and application management by providing one platform for multiple secondary workloads.

#### Key Features

- Hyperconverged Architecture: Cohesity SpanFS, a distributed file system; Web-scale architecture with unlimited scalability; Non-disruptive upgrades; Unlimited, distributed snaps and clones with no performance impact with Cohesity SnapTree
- Multi-protocol support: Distributed volumes with multiprotocol NFS, SMB, and S3 access; support for simultaneous sequential and random IOs
- Storage Efficiency: Global deduplication across all nodes, variable length, inline, or post-process; Compression, including Zstandard; Erasure coding 2:1, 4:2, and 5:2, and replication factor
- Data Resiliency: Strict consistency across nodes within a cluster, ensuring data resiliency and that reads always return the most recent data; Two node and two disk failure tolerance support
- Global Search: Automated global indexing; Wildcard searches for any VM, file, or object on the platform
- Flexible Deployment: Software-defined solution for on-premises, public cloud, and virtual infrastructure and edge sites
- Public Cloud Integration: Native cloud integration with all leading public clouds including AWS, Microsoft Azure, Google Cloud Platform, and any S3 compatible clouds, as well as AWS Govcloud and Microsoft Azure GovCloud
- Global Management: API-first architecture; RESTful API; OpenAPI standard
- Encryption: Software-defined AES-256, FIPS compliant encryption of data in flight and at rest

### Cohesity DataProtect

Cohesity DataProtect is a high-performance, software-defined data protection solution for modern, application driven infrastructure that spans from the core to the cloud and edge. Complementing Cohesity Data Cloud, it delivers comprehensive protection with policy-based management for all workloads, anywhere—virtual and physical, databases, NAS, cloud environments, and business-critical applications—on a single, web-scale platform that converges backup, recovery, replication, and target storage

#### Key Features

- Recovery level: Granular recovery of files, folders, objects; Volume recoveries; Instant volume mounts; Instant restores of VMs
- Long-term Archival: Public cloud infrastructure, S3 and NFS compatible devices; Tape support using QStar archive manager
- Hyperconverged Architecture: Converges backup, recovery, replication and scale-out target storage
- Protected Workloads:
  - Hypervisors: VMware vSphere (5.5 and newer), Microsoft Hyper-V (2016 v8.0, 2012 R2 v5.0)
  - AHV (5.5.3.1, 5.1.1) and RHV
  - Physical: Windows, RHEL, CentOS, AIX (7.x), and Solaris
  - Databases: Oracle (11g R2, 12c) and SQL (2008 and newer)
  - Applications: MS Exchange (2010 SP3 and newer), O365 and SAP HANA

## Standard Features

### **Cohesity DataProtect and Unlimited Archive**

Cohesity DataProtect and Unlimited Archive is backup software for virtual and physical environments with ability to archive unlimited copies of backed up data to supported external archive targets. Customer must separately procure storage capacity from a supported external archive target. Subscription per TB of backend storage used for backup.

---

### **Cohesity Cristie Bare Metal Recovery for DataProtect**

Cohesity Cristie Bare Metal Recovery (BMR) for DataProtect provides the ability to recover the System State of a server (Physical / Virtual) from BMR enabled backups performed using a Cohesity Agent.

---

### **Cohesity DataProtect Kroll Ontrack PowerControls**

Kroll Ontrack® PowerControls™ is a forensically sound email management tool that helps IT administrators granularly search and restore mailboxes, messages, attachments and other Microsoft® Office Outlook items – without restoring the entire database.

---

### **QStar Archive Manager for Cohesity DataProtect**

QStar Archive Manager for Cohesity DataProtect provides tape management for long term data retention on tape.

---

### **Cohesity CloudArchive**

CloudArchive gives you the option to seamlessly archive datasets for extended retention from the Cohesity Data Platform through pre-built integrations with Google Nearline, Microsoft Azure and Amazon S3, Glacier. Cohesity CloudArchive is a more cost-effective archiving alternative than copying data to local media and then transporting it to a secure, remote location for long-term retention.

---

### **Cohesity CloudArchive Direct**

CloudArchive Direct provides the ability to archive data to supported external archive targets without storing it on the local cluster. Subscription per TB of data stored in supported external archive target after deduplication and compression. Customer must separately procure storage capacity from a supported external archive target.

---

### **Cohesity CloudTier**

CloudTier gives you the power to use public cloud as an extension of their on-premise storage. It dynamically increases local storage capacity, by moving seldom-accessed data blocks into the cloud. The policy-based waterfall model delivers transparent cloud tiering managed from the Cohesity Data Platform console so that end users no longer have to worry about exceeding on-premise capacity during temporary or seasonal demand spikes.

---

### **Cohesity CloudSpin**

CloudSpin, a Cohesity Data Cloud capability specifically built for public cloud, eliminates the need for expensive copies of data by allowing the use of on-premises backup data in the cloud. CloudSpin addresses the format issues inherent in on-premises-to-cloud mobility by allowing the conversion of on-premises VMs to appropriate cloud formats. Spinning up new VMs in the cloud is easy with CloudSpin using idle back-up data from the on-premises environment. With CloudSpin, IT can make idle backup data more valuable by using it for test/dev with the assurance that the platform provides native data protection in the cloud. Moreover, Cohesity boosts operational efficiency by providing an easy path to quickly move applications back on-premises, as needed, for production.

---

### **Cohesity Cloud Snapshot Manager**

Cohesity Cloud Snapshot Manager Subscription provides protection for cloud resources using snapshot management. Each subscription license enables this feature for up to 25 instances of supported cloud services. Customer must purchase separately Cohesity Data Cloud.

---

---

## Standard Features

### **Cohesity Agile Development and Test**

Cohesity Agile Dev and Test allows enterprises to instantly provision – and manage – high-fidelity data to development and test teams. Cohesity's zero-cost clones enable you to accelerate the development of high-quality applications, while tackling the mass data fragmentation challenge. Subscription license per TB of DataProtect backend storage.

---

### **Cohesity Helios**

Helios, is SaaS-based, global secondary data and application management. Helios provides a single global view for you to actively manage all your secondary data and applications — on-premises, in the public cloud, and edge. By adding Cohesity Helios to your multi-cluster environment, you can gain global access and control over all secondary data and apps

---

AMD EPYC 9534 2.45GHz 64-core 280W Processor for HPE

P53699-B21

AMD EPYC 9334 2.7GHz 32-core 210W Processor for HPE

P53712-B21

#### Step 3: Select Heat Sink (Min 1 / Max 1)

##### Description

HPE ProLiant DL3X5 Gen11 CPU Performance 1U Heat Sink Kit

**SKU**

P58457-B21

#### Step 4: Select SSD Drive Options

##### Notes:

- If Processor P53705-B21 is chosen, then min. 20 / max 20 of P57807-B21 must be chosen.
- If Processor P53699-B21 is chosen, then min. 10 / max 10 of P57807-B21 must be chosen
- If Processor P53712-B21 is chosen, then min 10 / max 10 of P57803-B21 (for 76.8TB) or P57799-B21 (for 38.4TB) must be chosen.

##### Description

## Configuration Information

### Select Cohesity Base Software License

#### Notes:

- Choose a Cohesity “Service” or a Cohesity “DataPlatform” edition. Cohesity “Service” licenses and “DataPlatform” licenses cannot be mixed.
  - o \*Cohesity DataHawk, FortKnox, ThreatProtection, DataClassification, DataProtect aaS, DataProtect M365 aaS, Cohesity DataProtect, DataProtect Replication, SmartFiles, SiteContinuity Service SKUs and Kroll Ontrack Power Controls must include one of the following option codes when ordered.
    - Option Code 001 “New”– For brand new license deployment
    - Option Code 002 “Expansion”– For brand new license on expansion nodes being added to existing cluster
    - Option Code 003 “Renewal”– For renewal of expiring licenses

**Notes:** See earlier sections for Cohesity Software Details

### SSD and HDD Spares (recommended)

#### Notes:

- To minimize time to repair for defective SSDs or HDDs it is highly recommended to keep spares of these parts on site. The following formula should be used to determine the number of spares to have on site dependent on the number of nodes installed:
  - o 3 to 10 nodes of installed - 1 SSD of each type and 1 HDD in server node
  - o 11 to 20 nodes installed- 1 SSD of each type in and 2 HDDs in server node
  - o 21 to 50 nodes installed - 2 SSDs of each type and 2 HDDs in server node
