

HPE AND CANONICAL

HPE Servers, HPE Synergy, and Canonical Ubuntu Long Term Support

Working together. Accelerating results.

A NEW STYLE OF PARTNERING

Hewlett Packard Enterprise and Canonical are collaborating in a fresh new way to bring increased value to customers like you.

We know that acquiring technology is only the first step in achieving a business goal. The technology pieces need to work together. They need to be tested. They need to provide rich functionality, quickly and effectively, so you can concentrate on your business needs.

To help satisfy these needs, Canonical is a member of the HPE Partner Ready for Technology Partner program, an industry-leading approach to supply sophisticated integrated technologies in a simple, confident, and efficient manner.

Canonical has access to the right tools, processes, and resources to help our joint customers accelerate innovation and transformation that brings value, achieves business needs, and increases revenue and market share.

Product overviews

Ubuntu Long Term Support (LTS)

Ubuntu LTS releases have set the standard as the industry's leading enterprise server operating system for stable, maintained releases for large-scale deployments. Commercial users of HPE infrastructure engage with Canonical on certified Ubuntu to gain access to 10 years of support, consulting, management tools, managed services, and extended security maintenance for the latest open-source software available.

HPE ProLiant servers

HPE provides a broad server portfolio to run diverse workloads that are centered on business outcomes and provide consistent agility, security, and economic control across hybrid cloud. HPE ProLiant servers support embedded server management capabilities that give you complete control of your IT infrastructure. HPE Integrated Lights-Out (iLO) allows you to configure, monitor, and update your HPE servers seamlessly from anyplace in the world. Featuring the latest innovations in simplified operations, performance, and security, HPE iLO allows you to manage your entire server environment with ease.

HPE Synergy

HPE Synergy can support traditional and cloud-native applications in virtual machines, containers, or on bare metal. It combines software-defined intelligence with a unified API that incorporates powerful tools from the HPE partner ecosystem.

COMPANY OVERVIEW

About Canonical

Canonical is the publisher of Ubuntu, the OS for most public cloud workloads, a leading open infrastructure platform in the enterprise data center, as well as the emerging categories of smart gateways, AI/ML, self-driving cars, and advanced robots. Our mission is accelerating open source globally. Canonical helps enterprises run economic multicloud infrastructure, by providing enterprise security, support and services to commercial users of Ubuntu, OpenStack, and Kubernetes. Established in 2004, Canonical is a privately held company.

About Hewlett Packard Enterprise

Hewlett Packard Enterprise is the global edge-to-cloud platform-as-a-service company that helps organizations accelerate outcomes by unlocking value from all of their data, everywhere. Built on decades of reimagining the future and innovating to advance the way people live and work, HPE delivers unique, open, and intelligent technology solutions, with a consistent experience across all clouds and edges, to help customers develop new business models, engage in new ways, and increase operational performance.
