

HPE AND PARALLELS

HPE ProLiant Servers and Parallels Remote Application Server

Working together. Accelerating results.

A NEW STYLE OF PARTNERING

Hewlett Packard Enterprise and Parallels are collaborating in a fresh new way to bring increased value to customers like you.

We know that acquiring technology is only the first step in achieving a business goal. The technology pieces need to work together. They need to be tested. They need to provide rich functionality, quickly and effectively, so you can concentrate on your business needs.

To help satisfy these needs, Parallels is a member of the HPE Partner Ready for Technology Partner program, an industry-leading approach to supply sophisticated integrated technologies in a simple, confident, and efficient manner.

Parallels Partner has access to the right tools, processes, and resources to help our joint customers accelerate innovation and transformation that brings value, achieves business needs, and increases revenue and market share.

PRODUCT OVERVIEWS

Parallels RAS: Parallels RAS offers fully scalable, continuously available, centralized virtual application and desktop delivery from any device. Parallels RAS combined with HPE ProLiant Servers businesses benefit from a simple, fully test-proven virtualization solution—at an affordable rate. This industry-leading solution provides customization options to meet the needs of any IT environment. Taking a traditional three-tier networking, storage, and compute approach to networks, the ProLiant Servers is the best-selling server worldwide. Additionally, hybrid deployments with Parallels RAS and Servers together can boost scaling options and provide secure backup capabilities.

HPE ProLiant Servers: HPE provides a broad server portfolio to run diverse workloads that are centered on business outcomes and provide consistent agility, security, and economic control across hybrid IT. HPE ProLiant Servers support embedded server management capabilities that give you complete control of your IT infrastructure. HPE Integrated Lights-Out (iLO) allows you to configure, monitor, and update your HPE servers seamlessly from anywhere in the world. Featuring the latest innovations in simplified operations, performance and security, HPE iLO allows you to manage your entire server environment with ease.

COMPANY OVERVIEW

About Parallels

The global leader in cross-platform technology, Parallels makes it simple for anyone to access any file, desktop, or application from any OS platform. Parallels Remote Application Server (RAS) is the award-winning business IT solution to overcome virtualization-related complexity in network environments. Specially designed with hyperconvergence in mind, Parallels RAS allows centralized control of virtual desktop and application delivery from an easy-to-use interface. Employees using the Parallels Client benefit from world-class mobile experiences with native-like touch gesture controls. Businesses rely on Parallels together with HPE to deliver industry-leading, product-tested IT solutions. For more information visit parallels.com/ras.

About Hewlett Packard Enterprise

Hewlett Packard Enterprise is a global technology leader focused on developing intelligent solutions that allow customers to capture, analyze, and act upon data seamlessly from edge to cloud. HPE enables customers to accelerate business outcomes by driving new business models, creating new customer and employee experiences, and increasing operational efficiency today and into the future.
