

HPE and Racktop Systems

HPE Storage and RackTop BrickStor

Working together. Accelerating results.

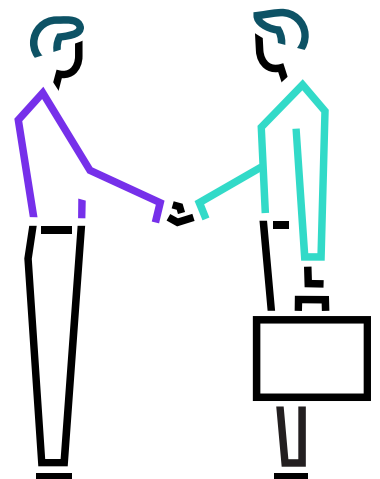

A new style of partnering

Hewlett Packard Enterprise and RackTop Systems are collaborating in a fresh new way to bring increased value to customers like you.

We know that acquiring technology is only the first step in achieving a business goal. The technology pieces need to work together. They need to be tested. They need to provide rich functionality, quickly and effectively, so you can concentrate on your business needs.

To help satisfy these needs, RackTop Systems is a member of the HPE Partner Ready for Technology Partner program, an industry-leading approach to supply sophisticated integrated technologies in a simple, confident, and efficient manner.

RackTop Systems has access to the right tools, processes, and resources to help our joint customers accelerate innovation and transformation that brings value, achieves business needs, and increases revenue and market share.

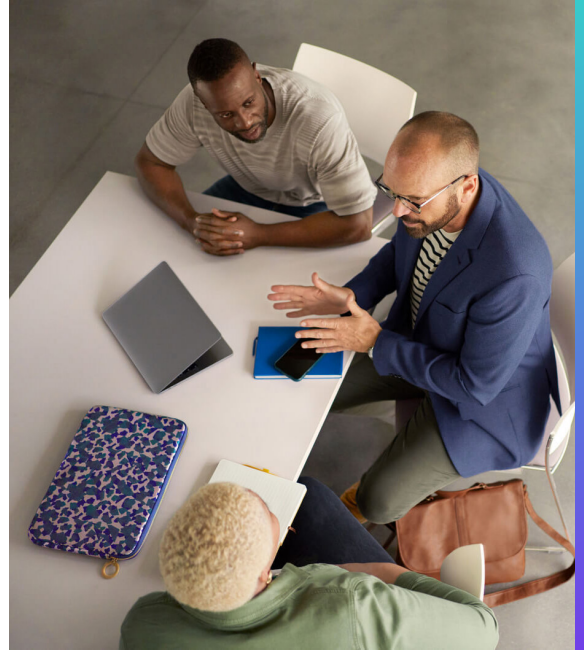

Product overviews

RackTop's software defined Cyberstorage solution, **BrickStor Security Platform**, is fortified with advanced security and compliance features. It provides active protections for unstructured data so you can actively stop ransomware attacks in real-time. BrickStor SP not only provides unified block and file services but also detects and prevents attacks on your data before it impacts your business. No matter the workload, your data is safe without sacrificing performance, security, or compliance.

BrickStor actively defends SMB and NFS file shares, ensuring your most valuable data assets are protected from sabotage, ransomware attacks, and malicious insiders. BrickStor's active defense solution combines UEBA (user and entity behavior analysis) and SOAR (security orchestration automation and response) capabilities which are uniquely designed, engineered, and integrated to detect and stop data threats. BrickStor can deploy as a virtual machine, on dedicated hardware, in the cloud, as a gateway to your S3 compatible storage, or in conjunction with a SAN (storage area network).

HPE Alletra is a bold paradigm shift for data infrastructure from edge to cloud. It sheds the complexity and silos inherent in conventional hybrid cloud environments with category-defining, cloud-native data infrastructure that delivers a cloud operating and consumption experience wherever data lives. Built for every application from traditional to modern, HPE Alletra spans workload-optimized systems to deliver architectural flexibility without the complexity of traditional storage management. It enables IT to shift from owning and maintaining data infrastructure to simply accessing and utilizing it on demand and as a service.

About RackTop Systems

Since its founding in 2010, [RackTop Systems](#) has led a transformative approach to Cyberstorage protection that aligns with a new era of data-driven cyberattacks. Engineered by U.S. Intelligence Community veterans, RackTop's best-in-class BrickStor security solution follows an innovative zero trust model that empowers the public and private sector to safeguard their data from the escalating presence of ransomware and insider threats.

RackTop works with a diverse range of clients and partners from the healthcare, utilities, financial services, higher education, and advertising/media industries, as well as federal, state, and local governments, to provide enhanced data security and solve complex data protection challenges. With visibility into the in-and-out points and integrations of their enterprise, companies can take proactive steps to alleviate the real root of the cyberattack landscape: data breaches. With RackTop's unified Cyberstorage software, our clients gain real-time visibility into data usage to both detect and respond to attacks before their valuable data assets are stolen or destroyed.

The foundation of RackTop's mission is built on leading an industry-wide shift from outdated legacy mindsets of the 1990s to an innovative and effective blueprint that exemplifies the future of cybersecurity. With RackTop, companies are positioned to elevate their data protection and IT security to new heights.

About HPE

HPE is the edge-to-cloud company that helps organizations accelerate outcomes by unlocking value from all of their data, everywhere. Built on decades of reimagining the future and innovating to advance the way people live and work, HPE delivers unique, open, and intelligent technology solutions, with a consistent experience across all clouds and edges, to help customers develop new business models, engage in new ways, and increase operational performance.
