

HPE AND VM2020 SOLUTIONS

HPE SimpliVity 380 and VM2020 Solutions EZDR

Working together. Accelerating results.

A NEW STYLE OF PARTNERING

Hewlett Packard Enterprise and VM2020 Solutions are collaborating in a fresh new way to bring increased value to customers like you.

We know that acquiring technology is only the first step in achieving a business goal. The technology pieces need to work together. They need to be tested. They need to provide rich functionality, quickly and effectively, so you can concentrate on your business needs.

To help satisfy these needs, VM2020 Solutions is a member of the HPE Partner Ready for Technology Partner program, an industry-leading approach to supply sophisticated integrated technologies in a simple, confident, and efficient manner.

VM2020 Solutions has access to the right tools, processes and resources to help our joint customers accelerate innovation and

transformation that brings value, achieves business needs, and increases revenue and market share.

PRODUCT OVERVIEWS

VM2020 Solutions EZDR: EZDR is a Disaster Recovery and Cyber Resilience automation solution especially built for HPE environments, delivering proven Recovery Time Objectives (RTO) and Recovery Point Objectives (RPO) in mere minutes. EZDR's tight integration with HPE SimpliVity Data Virtualization simplifies setup and operation enabling frequent and realistic DR Drills for all workloads. This ensures predictable results and reliable protection against natural and manmade disasters.

HPE SimpliVity customers and partners worldwide use EZDR to enhance DR and cyber resilience strategies, while also leveraging their DR sites for agile and automated DevOps.

Product brochure

EZDR's "multi point-in-time recovery" functionality enables cyber incident response training and recovery, allowing users to quickly:

- Identify safe point in time to recover
- Apply and test patches and scans before letting users connect to the environment
- Initiate detailed forensic activities to analyze what went wrong, how the threat advanced over time, and how to prevent and respond to future attacks
- Assess viability of operating while compromised

HPE SimpliVity 380: Delivering cloud-speed agility with enterprise-grade performance—that is what happens when power, simplicity, and efficiency converge. HPE SimpliVity combines all IT infrastructure and advanced data services in a single, integrated hyperconverged solution. With HPE HyperGuarantee data efficiency, customers gain more time by removing IT service delivery roadblocks with an offering that costs a fraction of traditional and public cloud solutions. Providing Game-Changing Data Efficiency, HPE SimpliVity 380 includes data efficiency that improves application performance, frees up storage, and accelerates local and remote backup and restore

functions—often delivering average data efficiency improvements of 40:1 across deployments. With policy-based, VM-centric management, the VM Management and Mobility is abstracted from the underlying hardware; simplifying day-to-day operations and enabling seamless data mobility and increased productivity. Lastly, HPE SimpliVity delivers the resilience, built-in backup, and bandwidth-efficient replication via built-in backup and disaster recovery. This ensures the highest levels of data integrity and availability—often allowing customers to eliminate third-party data protection solutions.

COMPANY OVERVIEW

About VM2020 Solutions

VM2020 Solutions is focused on bringing realism to Information Technology drills in the areas of Disaster Recovery and Cyber Resilience. Organizations use VM2020's products and services to increase their levels of preparedness, validate their incident response plans under live ammunition conditions, align business continuity and cyber practices, meet compliance requirements, and obtain reliable and predictable recovery times.

VM2020 has been recognized by CIO Magazine as the "20 most promising Disaster Recovery solutions provider"

for its ability to expand the number of protected workloads through simplicity and cost-effectiveness, VM2020 is capable of protecting virtualized IT assets across industries such as finance, healthcare, manufacturing, defense, education, and law.

VM2020 orchestration software and services are especially developed for Hyperconverged IT infrastructure from HPE SimpliVity.

Supported use cases include automated disaster recovery and failback, cyber incident response drills and point-in-time recovery, transfer of work, non-disruptive DR drills, and assistance in exporting HPE SimpliVity backups to archival repositories.

About Hewlett Packard Enterprise

Hewlett Packard Enterprise is a global technology leader focused on developing intelligent solutions that allow customers to capture, analyze, and act upon data seamlessly from edge to cloud. HPE enables customers to accelerate business outcomes by driving new business models, creating new customer and employee experiences, and increasing operational efficiency today and into the future.
