

Harness the power of collaborative SAP planning

Schedule a free SAP planning workshop with HPE GreenLake and Equinix

Service brief

In the latest SAP User Group survey, 91% of members indicated that their SAP S/4HANA® deployments are or will be on-premises, hybrid, or private cloud solutions, with only 9% citing an all-public cloud strategy.¹

Wondering what your next steps are in optimizing SAP?

In today's competitive digital-first world, ERP systems are transforming by using hybrid, private, and [public cloud](#) for SAP® applications and databases. SAP support for third-party databases will end by 2027 requiring businesses to redefine their [SAP HANA®](#) application landscape to optimize operations, improve customer experiences, and grow revenue.

Legacy SAP implementations need to be upgraded to support long-term supplier maintenance, increase process agility, and improve ROI while lowering the total cost of ownership of ERP accelerating time to value with automation and live insight.

The [HPE GreenLake edge-to-cloud platform](#), coupled with [Platform Equinix](#) and its diverse global colocation data centers, gives businesses the agility and economics of cloud, while providing enhanced security, lower costs, and improved performance needed to run mission-critical SAP applications and HANA workloads.

Meet with HPE GreenLake and Equinix team members to gain valuable SAP insights

Our SAP planning workshops provide an unbiased point-of-view of functional and technical areas to look out for, and avoid potential blind spots specific to your needs. The goal is to help you optimize your data center and cloud capabilities to create a cohesive strategy in preparation for legacy ERP migration to SAP or SAP applications/HANA transformation.

With both business and technical expertise, HPE GreenLake and Equinix specialists will explore your specific SAP deployment objectives and/or challenges and share valuable insights on how you can design your network, infrastructure, and applications to unlock the value of your SAP implementations more fully.

Gain critical knowledge on how to:

- Architect the best deployment for your SAP landscape
- Reduce SAP deployment time with SAP instance automation tools

- Connect to SAP business partner ecosystems directly and safely
- Support sustainability initiatives like “green IT”

HPE GreenLake and Equinix offer:

- Relevant SAP market, industry, and customer insights to drive your business forward
- A focused, productive conversation that addresses your company’s specific SAP objectives and needs
- A representative assessment of your current state and requirements for a transformation road map
- Insight on how we’ve helped other SAP customers solve similar challenges

Your personalized workshop agenda

To make the meeting beneficial for you, about two weeks before the meeting, Hewlett Packard Enterprise and Equinix will send over a short survey to learn more about your SAP landscape and what you hope to gain from the session. We will use your answers to shape the following agenda:

Topic	Description	Duration
Welcome	Introductions and meeting agenda	5 minutes
SAP market leadership	Introduction of HPE, Equinix, and SAP business expertise	15 minutes
Understanding your SAP landscape and needs	You will share your SAP objectives, challenges, and needs with the HPE and Equinix teams. This directs conversations to key business/technological areas that directly impact your specific transformation needs.	20 minutes (Attendee)
HPE and Equinix insights and recommendations to prepare for your transition	HPE and Equinix: It’s all about the workload and location <ul style="list-style-type: none"> • SAP activate methodology • SAP performance and resiliency • SAP deployments: The who, where, and how • How we can help 	40 minutes (HPE and Equinix)
Wrap-up and next steps	Feedback and next steps to deliver a technical discovery	10 minutes
