HPE Financial Services

Creating smarter IT lifecycles

Solution brief

IT Asset Disposition (ITAD) Services

Comprehensive, secure and sustainable IT Asset Disposition (ITAD) that returns value to help fund your innovation strategy.

The proper removal of aging assets is a critical component of the IT asset lifecycle. But organizations can often feel overwhelmed with managing logistics, ensuring data security, and adhering to an extensive list of regulations associated with technology systems removal.

With over 20 years of asset management experience, HPE Financial Services understands and can help ensure your IT assets are properly and securely retired and return the value of those assets back to your budget.

HPE

HPE Financial Services offers an extensive range of financing solutions and IT lifecycle services to organizations worldwide, catering to a diverse set of needs from IT acquisition to sustainable retirement and reuse of technology.

IT Asset Disposition (ITAD) Services is a comprehensive program designed to help manage technology end-of-life in a secure and sustainable way.

With a focus on reuse and remarketing, the service helps recover value from most workplace or data center technologies in a secure, globally consistent, and environmentally responsible way.

HPEFS are experts in managing the retirement of:

— Servers

— Storage

— Networking equipment

— PCs and laptops

— Monitors

— Printers

— Mobile devices

— Other forms of technology

HPEFS handles equipment from HPE, HP and all other 3rd party manufacturers of data center and workplace assets.

Partner with an expert

Our experts work with you, helping to manage the complex process of retiring your technology. Our goal is to minimize the effort required by you to refresh your technology and allow you to focus on what matters — innovation and driving your business forward.

We offer solutions that help you manage your technology on a continuous basis, across multiple locations around the world. As you refresh your equipment, we can help manage the end of use upcycling throughout the process. We can also do a one-time takeout of unused assets, typically for smaller, less complex IT organizations.

When you put your unneeded assets through our asset upcycling services, our lifecycle experts will refurbish and remarket the equipment for a second useful life.

With revenue sharing capabilities, this circular economy approach benefits both the environment and your bottom line, and can enable you to extract value from unneeded IT to supplement your budget.

Decommissioning Services

The proper removal of aging assets is critical to help ensure maximum capital return. But organizations can often feel overwhelmed with managing logistics, ensuring data security, and adhering to an extensive list of regulations associated with technology systems removal. HPEFS can help with a full suite of decommissioning services available to ITAD customers.

Additional available services include:

— Deinstallation

— Data sanitization

— Device destruction

  • Shredding

  • Deformation/Spiking

  • Degaussing

— Automated Reporting and Settlement

— True market value provided for assets

Recycling

Although not all assets can be refurbished for a second useful life, it is crucial to ensure their proper and safe disposal. HPEFS serves as your trusted partner in this process, offering the capability to arrange secure recycling for your pre-sorted assets. Through a global network of partners, HPEFS ensures that recycling is conducted responsibly and in compliance with its strict environmental and security standards.

HPE Circular Economy Report

This report is designed to help you measure the impact of your IT lifecycle management choices and provides metrics that help you fulfill non-financial Social and Environmental Responsibility (SER) reporting requirements. Get the facts on material, energy, carbon and landfill savings achieved by putting your owned or leased IT assets through renewal.
