

Jose Tellado

Fellow, Network Analytics
Hewlett Packard Enterprise

Jose is currently the Chief Technologist of the Rasa WiFi Networks Analytics group where he has been working to provide technology leadership in the area of wireless and RF management and optimization working closely with multiple organizations: Aruba AOS, Airwave, Aruba CTO and the IntroSpect cloud/security teams.

Jose has a very strong track record in technology innovation. He has been part of the founder or core team at 3 start-ups: Iospan Wireless (MIMO-OFDMA pioneer acquired by Intel), Teranetics (IEEE 802.3an PHY editor and first 10GBase-T solutions) and RASA (WiFi Analytics) acquired by HPE Aruba.

He holds over 53 issued US patents and 30+ pending, in the areas of wired communications (DSL, 10GBase-T, IEEE 802.3an), wireless communications (MIMO, OFDM) and wireless network analytics.

Jose received his PhD in Electrical Engineering from Stanford in 1999 and his MS in Electrical Engineering from Stanford in 1994.
