

### MODELS

#### Microsoft Exchange Backup/Restore Solution

#### Overview

---

Compaq's *Microsoft Exchange Backup/Restore Solution* consists of a unique combination of innovative software and hardware that simplifies Microsoft Exchange storage management for Windows NT environments.

The products include the *StorageWorks Virtual Replicator*, a key deliverable in Compaq's Enterprise Network Storage Architecture (ENSA), and as an option, *Compaq Batch Scheduler*. Detailed QuickSpecs for each of the above products can be found at:

<http://www.compaq.com/products/StorageWorks/swvr/swvrquickspec.html>

<http://www.compaq.com/products/software/ntenterprise/batch-scheduler/index.html>

The combination of the above provides:

- Virtualization of disks recommended for this solution up to 400 GB (SWVR can go to TB)
- Snapshots of disks
- Unattended restore of the Microsoft Exchange Store
- Lower total cost of ownership

The solution provides a time and cost-saving solution for the restore operation of Microsoft Exchange.

The optional *Compaq Batch Scheduler* can also schedule and track batch jobs on Multi-vendor platforms other than Compaq Intel. It can schedule jobs on HP-UX, Sun Solaris™, IBM AIX, SCO, Tru64™ Unix and OpenVMS for both VAX and Alpha.

Using this approach for restoring critical data has two key advantages:

1. Critical files/databases can be put back in production in much less time than restoring from tape.
2. This compliments existing backup operations.

#### System Software Supported

---

- Microsoft Windows NT Workstation/Server 4.0 Service Pack 3 (minimum)
- For clustered environments: Microsoft Windows NT Server, enterprise Edition 4.0
- StorageWorks Virtual Replicator

#### Processors Supported

---

Intel

#### Memory Supported

---

Required	64 MB
Recommended	128 MB

#### Other

---

Windows Compatible Mouse

### ORDERING INFORMATION

Part Numbers		6-3 #
	Compaq StorageWorks Virtual Replicator License & Media	388931-B21
	Compaq StorageWorks Virtual Replicator License only	388932-B21
Optional	<i>Compaq Batch Scheduler</i> for Windows NT Licenses & Media	388934-001
