

Overview

Microsoft Windows Server 2019

Microsoft Windows Server 2019 is the operating System bridging on-premises and cloud that will help you to grow your business locally and extend operations to the cloud from a position of strength. It maximizes your existing investments and builds on Windows Server security, app innovation, and Hyper-Converged Infrastructure capabilities to help you extend and enrich on-premises investments to include cloud services.

Today, most business owners face daily challenges in running their businesses. One of the most difficult challenges can include managing the highest level of security. Windows Server 2019 is designed to help.

- **Enhanced security capabilities:**
Windows Server 2019 helps to ensure that all apps and system components have just enough access privilege. Discover and address security breaches with assistance from the integrated Windows Defender Advanced Threat Protection¹. Protect VM workloads from unauthorized access, with Shielded Virtual Machines for Windows Server²
- **Unique Hybrid Platform:**
Windows Server 2019 works with your existing on-premises investments to help you extend your on-premise infrastructure to leverage the cloud and add hybrid management capabilities.
- **Unprecedented hyper-converged infrastructure (HCI)**
HCI is one of the latest trends in the server industry today. Organizations are embracing the trend for cost and performance reasons. In hyper-converged deployments, compute, storage, and networking are on the same cluster, simplifying configuration helping to reduce cost and to maximize your hardware investments.
- **Faster innovation for applications**
Both developers and operations need a modern platform that enable them to deliver innovation at the rate of changing business demands.

Leveraging a 30+ year partnership with Microsoft, HPE helps you maximize advanced features and functionality in Windows Server 2019 to achieve greater security control, modernize your infrastructure to help improve efficiency and productivity, and hybridize your datacenter. To simplify the support process, Hewlett Packard Enterprise delivers Microsoft Windows Server 2019 support for HPE Servers, see the support matrix at <http://www.hpe.com/servers/wincert>.

Hewlett Packard Enterprise offers Windows Server 2019 OEM license product for the following editions:

- **Datacenter:** Ideal for companies of all sizes that have demanding IT workloads, require advanced storage, virtualization, and application deployment
- **Standard:** For businesses that need advanced features, support for distributed office locations, and require a flexible way to virtualize their environment
- **Essentials:** For small companies with basic IT needs purchasing a first server; likely small or no dedicated IT department. Essentials is also a good option for customers who have previously used Windows Server Foundation edition, which is not available for Windows Server 2019.

Notes:

- For more information on Hewlett Packard Enterprise's offering of Microsoft Windows Server 2019 products, go to: <http://www.hpe.com/servers/ws2019>.
- ¹Windows Defender Advanced Threat Protection (ATP) requires an Azure subscription
- ²Shielded Virtual Machines feature requires Windows Server 2019 Datacenter

Overview

What's New

- Storage Replica (now limited support also included in Windows Server 2019 Standard)
 - Storage Migration Service for easy and automated, wizard-driven migration of legacy Windows file servers
 - 24TB RAM support
 - 1024 Logical Processor support
 - Windows Defender Advanced Threat Protection – ATP (Azure subscription required) unified endpoint protection
 - Security enhancements:
 - System Guard Runtime Monitor
 - Virtual Secure Mode (VSM) Enclaves
 - Shielded Linux VMs
 - Shielded VM Single Host Binding
 - Windows Admin Center (browser-based, out-of-band management tool: free download from Microsoft)
 - Azure integration(Azure subscription required):
 - Azure File Sync
 - Azure Backup
 - Azure Advanced Threat Analytics(ATA)
 - Hyper-V:
 - Virtual Persistent Memory (vPMEM)
 - Nested virtualization
 - Fallback Host Guardian Service (HGS)
 - Shielded VM Offline Mode
 - Updated WSSD Program for validated Storage Spaces Direct(S2D) solutions
 - System Insights local predictive analytics
 - Common PMEM architecture for all NV-DIMM devices
 - PMEM enhancements within Clustering, Virtualization, S2D and ReFS to enable DAX with certain Apps (SQL)
 - S2D Networking performance enhancements - Guest RDMA
 - Telemetry enhancements – include HW configuration, System ROM version, OS version, Server roles/Features/Apps, Geographic location, device/driver reliability
 - RDS Next Gen enhancements
-

Standard Features

Microsoft Hardware Specifications for Essentials Edition	
Windows Server 2019	Essentials
CPU	Up to 2 Processors; Per server licensing
Min. CPU Req.	1.4 GHz x64
X64 RAM STD/ Max	Minimum: 2GB RAM (Recommend: 8GB) / Maximum: 64GB
ECC	Yes
NIC	multiple NICs supported
Internal optical bay drive allowed	Yes
Minimum OS Storage Footprint	160 GB with a 60-GB system partition
SW RAID	Yes
Video	Optional
Keyboard, Mouse	Optional

Windows Server 2016 Downgrade options

Important Message:

Microsoft has recently announced new policies regarding Silicon support for Windows Server operating system products, including those that are offered through 'downgrade' rights.

By placing a request for a Windows Server 2016 Downgrade kit, you confirm that your HPE Server meets the Microsoft processor requirements, the details of which can be found at the following link:

<https://docs.microsoft.com/en-us/windows-server/get-started/system-requirements>.

Please note, for the deployed OS to be supported by Microsoft, your HPE Server must meet all processor requirements that are specified and listed for both the licensed product and the downgrade/down-edition (DG/DE) software. For clarity, if you purchased a Windows Server 2019 and intend to downgrade to Windows Server 2016, your server must meet both the processor requirements for Windows Server 2019 and 2016.

This requirement applies both to customers who have purchased the Windows Server OEM license directly from HPE or from an HPE Reseller or Partner. The Microsoft processor requirements are in addition to other hardware requirements for the Windows Server operating system products that are specified in the document located at

[https://msdn.microsoft.com/library/windows/hardware/dn915086\(v=vs.85\)](https://msdn.microsoft.com/library/windows/hardware/dn915086(v=vs.85)).

Microsoft may update the processor requirements and the minimum hardware requirements for Windows Server operating system products as requirements change.

Microsoft Hardware Specifications for Standard and Datacenter Editions

Unless otherwise specified, these minimum system requirements apply to both Standard and Datacenter editions.

Processor

Processor performance depends not only on the clock frequency of the processor, but also on the number of processor cores and the size of the processor cache. The following are the processor requirements for this product:

Minimum:

- 1.4 GHz 64-bit processor
- Compatible with x64 instruction set
- Supports NX and DEP
- Supports CMPXCHG16b, LAHF/SAHF, and PrefetchW
- Supports Second Level Address Translation (EPT or NPT)

Core info at <https://technet.microsoft.com/sysinternals/cc835722.aspx> is a tool you can use to confirm which of these capabilities your CPU has.

Standard Features

RAM

The following are the estimated RAM requirements for this product:

Minimum:

- 512 MB (2 GB for server with Desktop Experience installation option)
 - ECC (Error Correcting Code) type or similar technology
-

Storage controller and disk space requirements

Computers that run Windows Server 2019 must include a storage adapter that is compliant with the PCI Express architecture specification. Persistent storage devices on servers classified as hard disk drives must not be PATA. Windows Server 2019 does not allow ATA/PATA/IDE/EIDE for boot, page, or data drives.

The following are the estimated minimum disk space requirements for the system partition.

Minimum: 32GB

Network adapter requirements

Minimum:

- An Ethernet adapter capable of at least gigabit throughput
- Compliant with the PCI Express architecture specification.
- Supports Pre-boot Execution Environment (PXE).

A network adapter that supports network debugging (KDNet) is useful, but not a minimum requirement.

Other requirements

Computers running this release also must have the following:

- DVD drive (if you intend to install the operating system from DVD media)

The following items are not strictly required, but are necessary for certain features:

- UEFI 2.3.1c-based system and firmware that supports secure boot
- Trusted Platform Module
- Graphics device and monitor capable of Super VGA (1024 x 768) or higher-resolution
- Keyboard and Microsoft® mouse (or other compatible pointing device)
- Internet access (fees may apply)

For more detail about Windows Server 2019 System Requirements visit:

<https://docs.microsoft.com/en-us/windows-server/get-started-19/sys-reqs-19>

HPE Integrated Lights Out (iLO)

HPE iLO Essentials is the preferred license for small and medium businesses that offer full remote server management capabilities for small and medium business via the Integrated Remote Console (IRC), virtual media, and e-mail based alerts. HPE iLO Advanced licenses offer smart remote functionality without compromise, for all HPE Servers. The license includes the full integrated remote console, virtual keyboard, video, and mouse (KVM), multi-user collaboration, console record and replay, and GUI-based and scripted virtual media and virtual folders. You can also activate the enhanced security and power management functionality. Learn more about HPE iLO Advanced at <http://www.hpe.com/servers/iloadvanced>.

Service and Support

Software Technical Support

Remote Tech Support via HPE PointnextHPE Services Tech CareHPE Tech Care Service provides reliable and consistent support to keep your business up and running. Tech Care goes beyond traditional support by providing access to product specific experts, an AI driven digital experience, and general technical guidance to not only reduce risk but constantly search for ways to do things better. Within HPE PointnextHPE Services Tech CareHPE Tech Care Service, HPE offers several ways for you to obtain support for your Microsoft solution. If your purchase includes the software licenses for Microsoft products, you receive 90 days of telephone support for installing your Microsoft software. You can also purchase more extensive support to cover your requirements. Remote Tech Support provides software support for Microsoft Windows Server 2022 and includes support for other Microsoft supported applications. Visit <https://psnow.ext.hpe.com/doc/4AA4-9999ENW> to view the HPE supported Microsoft SW list. With Remote Tech Support, your IT staff receives fast and reliable access to HPE support. HPE PointnextHPE Services technical resources work with your IT team to provide advice on software features and use, problem diagnosis and resolution, software defect identification, and access to patches. This service also provides electronic access to comprehensive support information allowing any member of your IT staff to locate essential product and support information. Remote Tech Support for Microsoft Windows Server 2022 is available from HPE PointnextHPE Services via multiple contact methods including electronic media and telephone.

Remote Tech Support includes:

- 24x7 access to technical resources - Connect with Remote Tech Support via telephone, web portal, chat, or forums as locally available for assistance in resolving software implementation or operations problems. Service is available around the clock every day, including all holidays.
- Problem analysis and resolution - HPE PointnextHPE Services support provides corrective support to resolve identifiable and reproducible software product problems, and to help you identify problems that are difficult to reproduce. You can also receive assistance in trouble-shooting problems and setting configuration parameters.
- Software features and operational support - HPE PointnextHPE Services provides information on the latest product features and known problems and solutions, plus operational advice and assistance.
- Escalation management - Established escalation procedures enlist specialized expertise from HPE PointnextHPE Services to Microsoft support.
- Electronic software information - Access HPE PointnextHPE Services electronic support facility including symptom solution database, product descriptions, specifications, technical literature, and more. Software technical support does not include assistance with:
 - Generating or diagnosing user generated programs or source codes
 - Installation of non-Hewlett Packard Enterprise products

Notes: For more information, visit: <https://www.hpe.com/services/techcare>

Also available is HPE PointnextHPE Services Complete CareHPE Complete Care Service. HPE PointnextHPE Services Complete CareHPE Complete Care Service provides Customers with a single point of contact for all their support needs. The service is delivered under the governance of an assigned HPE account team that is familiar with the Customer's IT environment. The goal of the assigned account team is to work with the Customer as a trusted partner and help the Customer achieve their overall business objectives. A mutually agreed upon and executed statement of work (SOW) details the precise combination of reactive and proactive support features to be provided under HPE PointnextHPE Services Complete CareHPE Complete Care Service based upon Customers' requirements.

Customers may choose compute services operating system patch analysis and management. For Microsoft OSs, HPE delivers written communication regarding cumulative updates and patches as per the release cycle defined by Microsoft. HPE also provides monthly (or the timeframe agreed in the SOW) notification on Microsoft security releases and quarterly (or the timeframe agreed in the SOW) notification on Microsoft products supported by HPE, applicable to servers outlined in the account support plan.

Notes: For more information, visit: <https://www.hpe.com/services/complecare>

Service and Support

Microsoft Software Assurance

Boost productivity across your organization with new software versions, deployment planning services, 24x7 phone and web support, end-user training, unique desktop technologies and more, all in one cost-effective program.

With New Product Versions, every Microsoft product license that is covered by Software Assurance can be upgraded to the most recent version.

For example, if a new version of Microsoft Windows Server is made available during the term of your coverage, your licenses will automatically be upgraded to the new version. Customers that acquire perpetual licenses through Software Assurance can deploy the upgrades after their coverage has expired.

Notes: For more information, please visit:

<https://www.microsoft.com/en-us/licensing/licensing-programs/software-assurance-default>

Windows Server Catalog Definition

Microsoft's certification program gives HPE Servers a compatibility certification with Windows Server operating systems. HPE Servers listed in the Windows Server Catalog have been rigorously tested and certified with Microsoft Windows Server 2019.

Notes:

- For information on HPE Servers certified for Windows Server, visit: <http://www.hpe.com/servers/wincert>.
 - For details on Microsoft's server catalog and also a list of HPE certified servers, visit: <https://www.windowsservercatalog.com/>
-

Configuration Information

Windows Server 2019 Essentials Edition 1-2P Pre-Installed UEFI on HPE Servers

Notes:

- Unified Extensible Firmware Interface (UEFI) is an industry standard set of interfaces between the system firmware and the operating system, and between various components of the system firmware. UEFI enables numerous new capabilities, for more information please read the whitepaper [UEFI: successor to legacy BIOS](#).
- All Essentials edition part numbers include x64 DVD media and Certificate of Authenticity (COA). Sold only as a configurable option with an HPE Server purchase.

Language Code Key for P11071-xxx
