More speed for Spedition

“Tirolia is on course for growth and the modernization boost in our IT is giving us a new boost.”

– **Michael Lukasser**, Tirolia’s Chief Executive

Tirolia Spedition is the shipping company in the red-white-red country. Speed is Tirolia’s trademark, speed is everything for the Logistics Specialist from Ebbs. In the project development business, in customer service and now, once again, in IT. This is because Tirolia—with its in-house computing center—has undergone a real modernization boost, thereby simultaneously creating a new boost for the business.

Solution:
Data

Industry:
Logistics

Country:
Austria

Objectives

- Boosting performance in the data center
- Guaranteeing high availability of data and processing
