

## **Nigel Edwards**

Fellow, HPE Security Engineering  
Hewlett Packard Enterprise

In over thirty years with the company, Nigel Edwards has worked on a broad range of security technologies and projects. His contributions and expertise include fabric and component level security (Gen-Z and DMTF SPDM), single sign on (SAML), firmware security, operating system kernel security, application security, cloud infrastructures, distributed authorization, malware analysis and malware detection. Nigel's current focus is hardware-software co-design: extending hardware security guarantees to applications and workloads. He holds over 30 granted patents.

Nigel has a BSc and PhD in Electrical and Electronic Engineering from the University of Bristol, UK. He is a Chartered Engineer and a member of the Institution of Engineering and Technology, UK.
