

On-demand scalability fuels expansion at CMC markets

CMC Markets APAC now has a robust, scalable infrastructure optimized for our workloads and capable of providing the trading experience we want for our clients. In the first year running on the HPE GreenLake cloud, our availability and performance scores were exceptionally high.”

– Robert Palfi, Head of IT Production, CMC Markets Stockbroking

Industry: Financial services

Country: United Kingdom

Solution: [HPE Managed Services](#)

[HPE Alletra Storage 9000](#)

**Hewlett Packard
Enterprise**

Availability and performance can be differentiators for any trading platform, but CMC Markets had an aging infrastructure that limited their expansion potential. They relied on HPE Managed Services to modernize their technology with Nutanix and the HPE GreenLake—an always-available, high-performing combination. By fundamentally changing their operations, they've increased agility and accelerated their ability to provide great trading services.

Objectives

- Modernize existing technology to support expansion
- Increase availability and implementation speeds
- Improve operational efficiency

Requirements

- Greater scalability
- Low risk of outages
- Easy infrastructure management for local IT team

Solution

- HPE Managed Services
- HPE Alletra Storage 9000
- HPE ProLiant DL servers

Outcomes

- Exceptionally high availability and performance scores
- Removing infrastructure management burden eliminates the workload of two full-time engineers
- Increased focus on strategic innovations, such as automation, that deliver value
- Increased agility and ability to respond to market demands
- Improved budgeting capabilities due to greater visibility of infrastructure costs
