

PROTECT YOUR HYBRID CLOUD ENVIRONMENTS WITH HPE STOREONCE

DATA IS YOUR MOST VALUABLE ASSET

Data drives your **digital transformation**

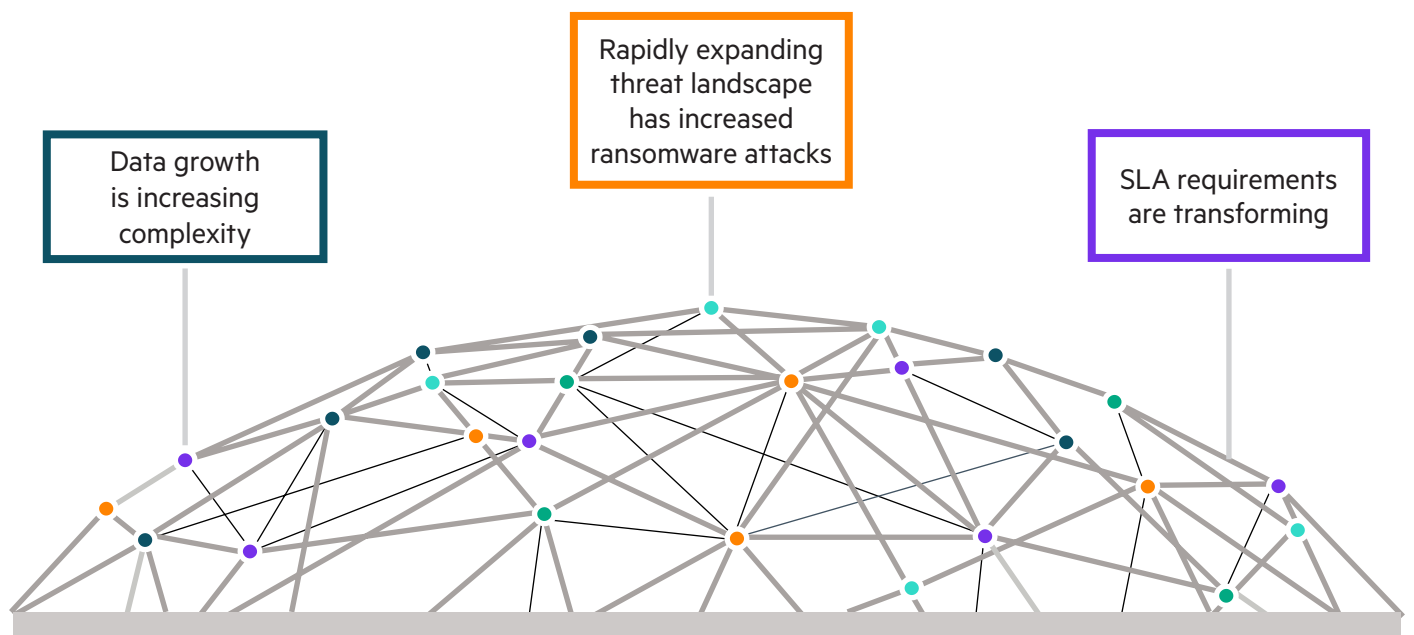

It needs to be **protected, secure, and recoverable**

And **instantly available** where and when needed

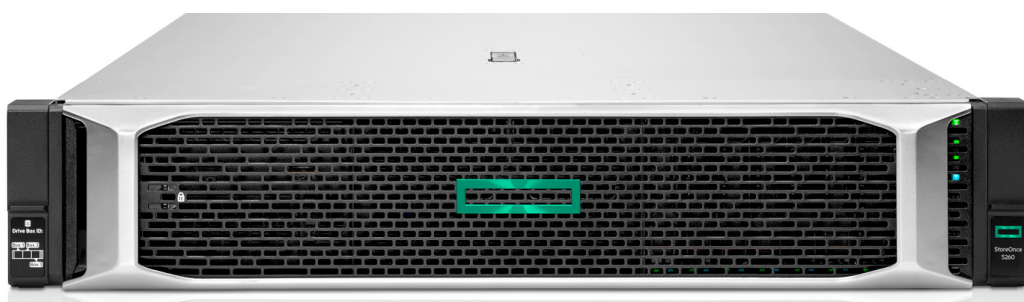

In an always-on connected world, downtime and data loss can prove catastrophic to your business

PROTECTING DATA IS INCREASINGLY CHALLENGING

Transforming the simplicity, power, and flexibility of hybrid cloud data protection with next-generation HPE StoreOnce Systems

Simplify operations

Deliver on SLAs

Protect your data, your way

Native cloud integration and 20x lower cloud storage costs¹

Take control of data growth with up to:

20:1 storage efficiency³

Software-defined protection more scalable, more flexible VSA

95%

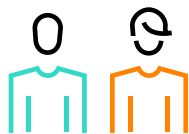

Less operator time² with multisystem management

Break the backup window with up to:

105 TB/hr backup performance & **95%** less network utilization⁴

Backup as a service on-premises with HPE GreenLake

Self-service Empowers DBAs to back up directly to HPE StoreOnce

Mitigate risk with Secure backups | Fast restores High availability storage

Investment protection Integrated with a rich ecosystem of market-leading backup ISVs

¹⁻³ Assuming dedupe ratio of 20:1 as compared to a fully hydrated backup

² Based on management of federation of 20 HPE StoreOnce Next-Gen appliances compared to management of 20x HPE StoreOnce G3 appliances independently (In cloud or on-premises)

⁴ Using 20:1 source side dedupe
