## Intelligent data center switching

**Evolve your data center network to a simplified architecture, enhance performance, and reduce costs—all with embedded security.**

Welcome to the future of data center networking with top-of-rack deployment. By deploying switches at the top of your rack, you optimize connectivity, reduce cable clutter and minimize latency, ensuring lightning-fast data transfer and seamless scalability.

### About HPE Aruba Networking CX 8100 Switch Series

The HPE Aruba Networking CX 8100 Switches are based on AOS-CX, a modern software system that automates and simplifies critical network tasks, offers programmability with REST APIs and Python scripts, and delivers enhanced fault tolerance and zero-service disruption during planned or unplanned control-plane events. Real-time, network-wide visibility and analytics are also available in every switch.

The series includes industry-leading line rate ports with 1/10GbE (SFP/SFP+) and 40/100GbE (QSFP+/QSFP28) connectivity in a compact 1U form factor. 4x10Gbps and 4x25Gbps break out from 40/100G. These switches are great for customers needing 1GbE/10GbE with a mix of fiber and copper ports.

### About HPE Foundation Care Service

HPE Foundation Care Service is composed of comprehensive hardware and software services aimed to help increase the availability of your IT infrastructure. Hewlett Packard Enterprise (HPE) technical resources provide support and work with your IT team to help you resolve hardware and software problems with HPE and selected third-party products.
