

The workspace of the future is here!

Take your customer to the Metaverse in an immersive virtual office experience

Travel to the Perimeter-less edge, harness the power that is transforming diverse industries and experience an immersive virtual reality workplace hosted by HPE Customer Center teams.

Customers visit a fascinating, immersive workplace of the future, combining HPE Edge-to-Cloud technologies with partner tools that are helping people connect, communicate and collaborate, work faster and smarter, towards more creative outcomes they care about. From individual productivity with familiar apps to team collaboration in immersive team spaces, the edge now turns into a virtual and Metaverse ready experience.

Accelerate your customer opportunities and bring the possibilities of digital transformation to life in this engaging virtual experience.

Request a customer briefing to explore the VR Metaplace environment

01 Give your current workflow some space
Bring your desktop applications into your virtual office and give them an entire monitor each

02 Unite VR with your PC
Bring your PC into your virtual world and broaden your access with virtual monitors.

03 Have your screens and your people too
Sometimes you need to focus on the people, sometimes it is the content—usually, it is both.

04 Trade online calls for the office buzz
Your team interacting like everyone is together. Because they are.
