

UNLOCK THE FULL VALUE OF DATA—WHEREVER IT LIVES

Deploy or repatriate object storage the “cloud smart” way with HPE GreenLake for Scality

72% of organizations have brought some applications back on-premises after moving them to the public cloud.¹

TOP REASONS TO PRIORITIZE PRIVATE OBJECT STORAGE

As cloud strategies mature, companies rebalance workloads across cloud services, deploying and repatriating some data storage and management on-premises or in a colocation facility.

68% see security and compliance as a barrier to public cloud.²

Risk

Data must be available and secure to drive competitive advantage.

Five

different cloud platforms used on average⁴

Control and insight

Data must add value and be compliant and secure.

50%

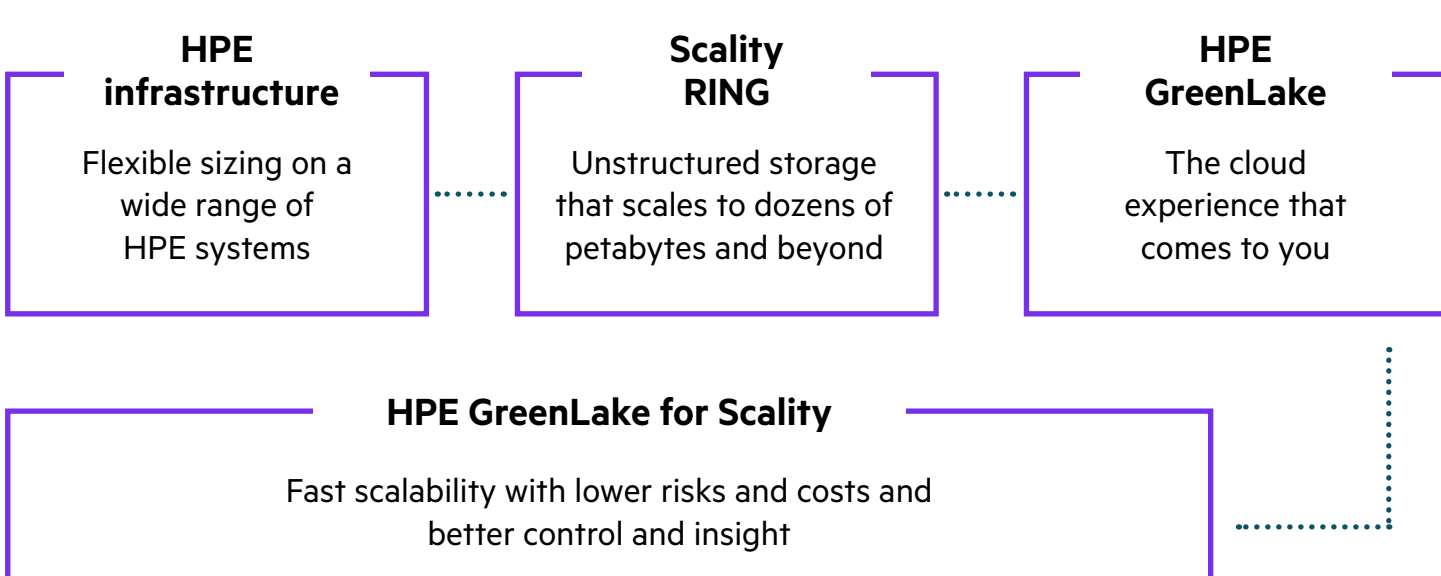

rise in costs from increased public cloud usage³

Costs

Organizations need to cut costs, conserve capital, and align costs to the business.

“CLOUD FIRST” IS NOW “CLOUD SMART”

If you’re deploying or repatriating object storage on-premises but still want the speed, agility, and scalability of a cloud operating model, HPE GreenLake for Scality provides a cloud experience with lower risks and costs and more control and insight for unstructured data at any scale, no matter where it lives.

STOP MANAGING INFRASTRUCTURE—START USING DATA TO CREATE VALUE

Enjoy agile, scalable, and economical storage with a cloud experience that can streamline object storage.

Risk

Maintain availability and security.

100%

availability and fourteen-nines of durability⁵

Control and insight

Simplify IT operations and eliminate data blindness.

40%

increase in IT productivity by reducing the support load on IT⁶

Costs

Reduce and align costs with business outcomes.

147%

ROI, plus 30–40% TCO savings due to eliminated overprovisioning⁶

CUSTOMER SUCCESSES

Customers across a range of industries are already using HPE GreenLake for Scality to accelerate business outcomes.

Anytime, anywhere

Reduce and align costs with business outcomes.

University Hospital Basel fights cancer using data to advance research in personalized treatments for complex diseases.

“The advantage of Scality RING is that, when we reach current capacity, the system can simply be expanded online.”

—Markus Müller, Head of Data Center Management, University Hospital Basel
