

CLUDERA HORTONWORKS DATA PLATFORM FROM HPE

Hadoop Software for ProLiant Servers

OVERVIEW

HPE and Hortonworks deliver an innovative approach to Big Data and modern data management challenges. If you are looking for a 100% open source platform for storing, processing, analyzing and transporting large volumes of data, Hortonworks Data Platform handles data from many sources and formats in a quick, easy, cost-effective manner. It delivers a stable and highly extensible platform, making it easier to integrate Apache™ Hadoop® with your existing data architectures and increases the value of the data organization.

FEATURES

100% Open Source Platform

Hortonworks Data Platform from HPE is designed for the enterprise and makes it easier to integrate Apache Hadoop with your existing data architectures while increasing the value of the data flowing through your organization.

Includes 100% open source components developed by the open community within the governance of The Apache Software Foundation.

Fundamentally Versatile

Hortonworks from HPE is fundamentally versatile. It provides linear scale storage and compute across a wide range of access methods from batch to interactive, to real time, search and streaming.

With Hadoop YARN at its core, Hortonworks Data Platform from HPE delivers flexible enterprise functions across a range of data processing engines, paired with comprehensive enterprise capabilities for governance, security and operations.

Completely Integrated

Hortonworks Data Platform from HPE is designed to integrate deeply in your environment and augment existing data center technologies while being deployable across a wide range of infrastructures.

You can deploy Hadoop wherever you want it—from cloud or on-premises as an appliance, and across both Linux and Windows operating systems.
