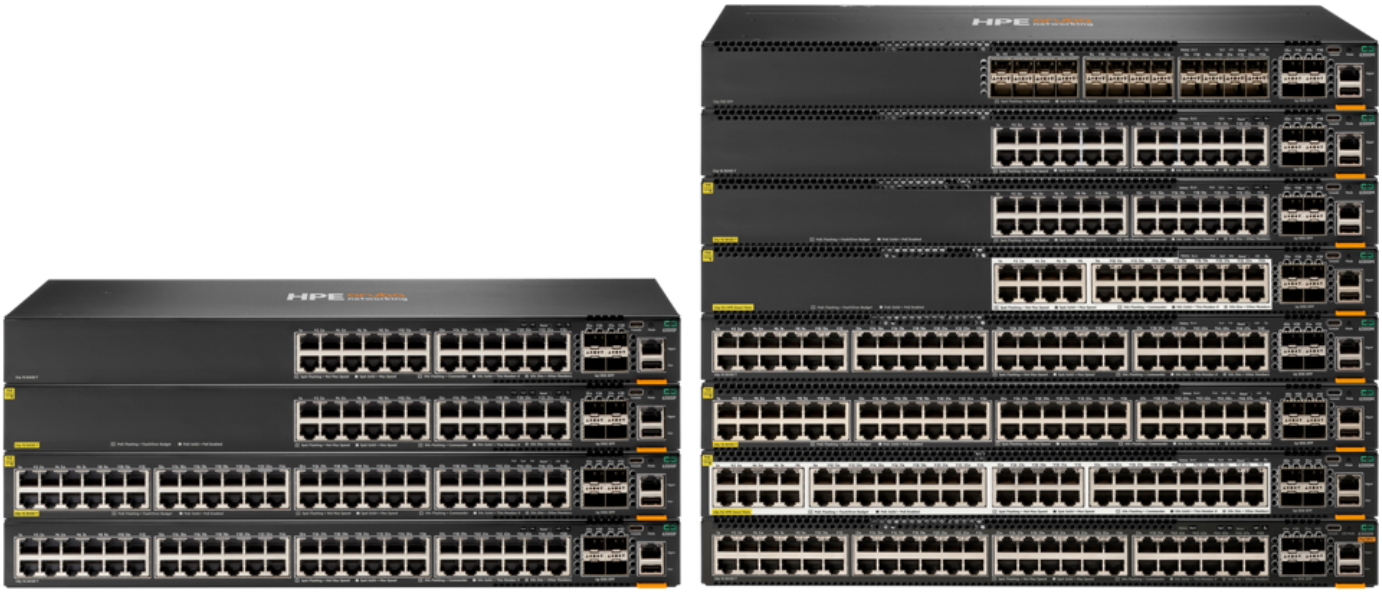
HPE Networking CX6300 Switch Series



Nouveautés

- HPE Networking CX6300 Series delivers stackable Layer 3 switching with BGP, EVPN, VXLAN, VRF, OSPF routing, robust QoS, MACsec 256, PTP, AVB and LRM; these features are not supported on CX6300L
- Three stackable Layer 2-only CX6300L switches with HPE Smart Rate multi-gigabit and MACsec 256 encryption are available for high-performance access deployments
- Powerful 7th Gen ASIC architecture provides the CX6300 series with 880 to 1760 Gbps system switching capacity, 660 to 1310 Mpps of system throughput and up to 200 to 400 Gbps stacking bandwidth

Vue d'ensemble

The HPE Networking CX6300 Switch Series is a modern, flexible, and intelligent family of stackable switches ideal for access, aggregation, and data center top-of-rack (ToR). It features a cloud-native design and fully programmable operating system (OS). The CX6300 delivers advanced monitoring and troubleshooting with capabilities such as a real-time Network Analytics Engine, HPE Networking Switch Multi-Edit Software and flexible deployment options to implement and validate network configurations.

A powerful Gen7 ASIC architecture delivers fast, non-blocking performance for AI, Wi-Fi 7, and Internet of Things (IoT) requirements. Virtual Stacking Framework (VSF) allows for stacking of up to 10 switches, providing scale and simplified management. The new CX6300M switches deliver 90W Class 8 PoE (up to 4320W of PoE budget), enhanced uplink capabilities up to 50G, MACsec/PTP/AVB support, and improved support for high-power enterprise and Wi-Fi 7 deployment.

- High-availability with choice between 2 to 10-member Virtual Switching Framework (VSF) stacking for scale, or 2-member Virtual Switching Extension (VSX) cluster for active-active redundancy

- 24 to 48 HPE Smart Rate multi-gigabit ports (1/2.5/5/10GbE) and 1 GbE fiber, supporting up to 90W 802.3bt PoE. New 24/48 port CX6300M models provide 90W power simultaneously for up to 48 ports.

- Management, insights, and actions via HPE Aruba Networking Central or HPE Mist. Dynamic segmentation enables enhanced security and simple access for users and IoT

Caractéristiques

AI-native performance and power

The HPE Networking CX6300 Switch Series is a wire-speed solution that uses a fully distributed architecture with Gen7 ASICs that deliver low latency, increased packet buffering, and intelligent power consumption for AI, Wi-Fi 7, and Internet of Things (IoT) requirements.

The Virtual Switching Framework (VSF) allows you to quickly grow your network using high-performance front-plane stacking. Four built-in uplinks support speeds of up to 10, 25, 50, and 100 GbE for a total of 200 to 400 Gbps of stacking throughput per switch.

The Virtual Switching Extension (VSX) uses an inter-switch link (ISL) for high availability and state synchronization between two active-active switches with independent control planes; a switch can belong to either a Virtual Switching Framework (VSF) stack or a VSX cluster, but not both.

HPE Smart Rate multi-gigabit Ethernet delivers adaptive speed options for Wi-Fi, Internet of Things (IoT), and other clients, alongside Class 4 (30W), Class 6 (60W), and Class 8 (90W) PoE on each port (720W, 1440W, 2880W and 4320W maximum PoE budget options).

Additional features include a hibernation mode that enables CX6300 and CX6300L (Layer 2-only) switches to schedule downtime to conserve energy. The CX6300L stackable switches are Layer 2-only, balancing scalability, high-capacity, and cost-effective connectivity.

Automatisation et analytique

The HPE Networking CX6300 Switch Series delivers enhanced visibility with built-in analytics for real-time monitoring and a time series database (TSDB) that stores configuration and operational state data, making it available to quickly resolve network issues.

HPE Aruba Networking Central fournit une gestion et des opérations réseau complètes, sécurisées et AI-natives, pour optimiser les performances, accélérer le dépannage et unifier les réseaux filaires avec le Wi-Fi, les réseaux étendus et plus encore.

The Network Analytics Engine (NAE) provides real-time insights and actions, analyzing events that can impact network health and even mitigating problems directly through quarantining to support network, application, system and security operations.

HPE Networking Switch Multi-Edit Software introduces automation that allows for rapid network-wide changes and helps ensure policy conformance post network updates. Intelligent capabilities include search, edit, validation (including conformance checking), deployment, and audit features.

Import switch information into HPE Networking Switch Multi-Edit Software for simplified configuration management and for continual conformance validation.

Gestion et sécurité de la stack complète

The HPE Networking CX6300 Switch Series is supported on HPE Aruba Networking Central or HPE Mist delivering enhanced network visibility and an expanded AI toolset, addressing the scale and demands of the most mission-critical environments.

Dynamic segmentation that automatically applies and enforces user, device, and application-aware policies on HPE Networking wired and wireless infrastructures.

Improve visibility, performance, end-user experience and simplify IT operations with auto profiling, RBAC, L7 firewall. Application recognition and control are available via CX Advanced Feature Pack. These features are not supported on CX6300L switches.

Switch-to-switch tunnels enable scalable multi-tenancy support with Virtual Extensible Local-Area Networks (VXLAN) to VRF mapping, while allowing policy application through user roles; these features are not supported on CX6300L switches.

Réduisez les tâches manuelles des opérations informatiques liées au déploiement initial ou aux changements récurrents de configuration pour prendre en charge les ajouts, les déplacements et les modifications avec des ports neutres, grâce à des rôles utilisateurs locaux et une authentification MAC locale (LMA).

Déploiement dans des topologies de datacenters

HPE offre aux clients des solutions d'infrastructure informatique préconçues très différentes, qui couvrent un large éventail de solutions HPE Compute, HPE Storage et HPE Networking, incluant la virtualisation, vSAN™, HCI, HPC, MCS, ainsi que des offres d'applications et de services IaaS basées sur Microsoft®, SAP HANA®, VMware® et Nutanix.

Les commutateurs CX 10/25 GbE et 40/100 GbE peuvent être déployés dans le cadre de configurations et de déploiements intégrés et mixtes de calcul, de stockage et de réseau HPE.

Ces solutions pour datacenter informatique intégrées, prêtes à déployer aident à simplifier et à accélérer la mise à disposition des services tout en réduisant la durée, le risque, et l'expertise nécessaires pour déployer des solutions complexes.
