

HPE 3PAR POLICY MANAGER SOFTWARE

Storage Device Management Software

OVERVIEW

Does your storage environment require granular and centralized outbound and remote services policy administration?

With HPE 3PAR Policy Manager Software, customers have the ultimate flexibility and control to allow or deny outbound communications or remote service connections to and from HPE 3PAR Storage Systems at the customer site. Policy Manager enables customers to define and implement remote service access policies. Policy configurations are managed by the customer, ensuring integrity of customer-configured remote access policies. To ensure limited access, Policy Manager is installed on a customer-provided server.

Policy Manager also serves as the centralized point for collecting and storing audit logs of all diagnostic data transfers and authorized remote service connections to and from all devices managed by the software. Since policies are administered by the customer, the audit logs are a trusted source for reporting and compliance.

FEATURES

Provides Flexible and Granular Control in Defining and Implementing Remote Service Access Policies

Allows customer to define and implement granular outbound or remote service connection policies for HPE 3PAR Storage Systems.

Allows Centralized Audit for all Devices Being Managed

Serves as the centralized point for collecting and storing audit logs of all diagnostic data transfers and authorized remote service connections to and from all HPE 3PAR Storage Systems managed by the software.

Provides the ability to view the audit log via Web browser within the customer internal network.

Provides a Trusted and Secure Audit Log for the Purpose of Reporting and Compliance

Policy Manager is installed on customer-provided hardware and all policies are defined and implemented by the customer.

HPE Global Service and Support organization has no access to Policy Manager Software.
