

HPE Data Ops Manager

HPE Alletra 6000 Array Upgrades Software and Support SaaS (S1E77AAE)

Overview

Are you looking for single pane of glass for managing your data infrastructure?

HPE Data Ops Manager allows customers manage their fleet from anywhere - simplifying infrastructure operations with cloud agility. Delivering global unified management, enabling customers to manage data infrastructure across edge to cloud from a single web interface. Everything organizations need to easily manage their fleet of data infrastructure across its lifecycle is available at their fingertips with an intuitive SaaS-based user experience – accessible from anywhere and from any device. Deploy apps faster by transforming provisioning from LUN-based to intent-based. Orchestrate infrastructure workflows at scale so managing hundreds of systems is as simple as managing one. Deploy, manage infrastructure on demand with simple discovery, activation, and configurations. Everything is delivered as-a-service so for our customers there is no software to deploy, manage or maintain.

Features

Intent-based Provisioning

Intent-based Provisioning eliminates guesswork and spreadsheets by ensuring workloads are always deployed on the right resource. It leverages real-time context into resource headroom and application-specific SLAs to optimize where your data is stored — automatically.

Capacity and Performance Trends

Determine resource utilization of storage system using key performance indicators of capacity (Used and host written), latency, IOPS and bandwidth in an interactive time-series graph for storage system, volume and hosts.

Alerts and Notifications

Receive fleet wide alerts and notifications with pursuant actions to manage storage systems at scale.

Monitor data infrastructure at scale with exception based monitoring and reporting of highlighting issues with appropriate resolution steps.

Snapshots

Manage read-only images of a volume at a specific point in time within the dashboard of HPE Data Ops Manager.
