

HPE Aruba Networking Beacons

What's new

- Software configurable for location or proximity mode
- Remote beacon management support
- Easy to deploy – no infrastructure wiring required
- Install in any size or shape room
- Work both indoors and outdoors, with battery and USB powered options
- SDK support for iOS and Android mobile devices

Overview

HPE Aruba Networking Beacons leverage Bluetooth Low-Energy (BLE) technology to power indoor location and wayfinding, and proximity-aware push notifications at enterprises, stadiums, hospitals and other public venues. The ability to customize the placement of beacons ensures a highly engaged customer experience.

These small, low-power wireless transmitters broadcast radio signals at regular intervals that can be heard and interpreted by iOS and Android devices using HPE Aruba Networking Wi-Fi access points. Purpose-built applications can be created using our software development kits (SDKs).

Features

Configurable Beacons

HPE Aruba Networking Beacons can be configured for either location-based wayfinding or for proximity-aware notifications so that corresponding actions are triggered on a venue's mobile app.

Choice of Physical Form Factor

HPE Aruba Networking Beacons are available in different form factors to better match your specific needs.

Larger beacons are great for permanent installations and are maintenance-free for up to four years.

Small, Low-power Wireless Transmitters

HPE Aruba Networking Beacons broadcast 2.4 GHz radio signals at regular intervals.

Beacons can be heard and interpreted by iOS and Android devices that are also equipped with HPE-powered mobile apps.

Technical specifications	HPE Aruba Networking Beacons
Warranty	90 Days. See the warranty duration .
Weight	37.5 g max per beacon, depending on model selected
Product dimensions (metric)	16 x 47 x 47 mm max per beacon, depending on model selected
Mounting	High-strength indoor/outdoor adhesive for direct mounting to wall
Radio coverage	Compliant with BLE standard based on BT version 4.0 GFSK modulation at 2.4 GHz ISM band

HPE Aruba Networking Services

HPE Aruba Networking services simplify and accelerate the network technology lifecycle, enabling your network to scale with better predictability and cost-effectiveness. Whether you operate your own network and need to improve your IT efficiencies, or you want to offload some of the burden, we have the services you need to reach your goals.

Support Services

Our support portfolio provides the essential support elements as well as proactive and preventive features to help you improve your team's productivity and get the most from your network. Our support customers benefit from faster issue resolution, simplified operations and efficiencies, and reduced network issues.

Professional Services

With deep intellectual capital and purpose-built tools, our team delivers a range of standard and custom professional services designed to accelerate your value from HPE Aruba Networking technology.

Project based services include:

- Planning, audit, and assessment
- Architecture review and design
- Deployment, migration, and knowledge transfer

Annual subscription services include:

- Network optimization
- Intelligent Operations
- Customer Experience Management
