

HPE Aruba Networking Switch Multi-Edit Software

What's new

- HPE Aruba Networking Switch Multi-Edit Software provides automation of search, edit, validation, deployment, and audit for network configurations.
- Verify device configurations are consistent and compliant with intelligent assistance and continuous validation to streamline workflow and reduce the risk of errors.

Overview

HPE Aruba Networking Switch Multi-Edit Software provides intelligent configuration assistance and continuous validation across device configurations. This verifies that changes are consistent, compliant, and reduces the amount of errors. Network operators gain the benefits of automated assistance for configuration, with built-in validation and intelligent auditing. Minimal training is required as incumbent teams leverage their existing knowledge and experience.

HPE Aruba Networking Switch Multi-Edit Software allows you to view and edit multiple configuration files in a single editor, providing automatically-displayed contextual insights along with command completion, syntax highlighting and validation.

Features

Intelligent Configuration with Validation for Consistency and Compliance

HPE Aruba Networking Switch Multi-Edit Software allows automation of search, edit, validation, deployment and audit for network configurations.

Built-in intelligence auditing automatically verifies that changes are consistent, and minimizes the probability of errors.

Save Time by Simultaneously Viewing and Editing Multiple Configurations

HPE Aruba Networking Switch Multi-Edit Software confirms vital constructs such as IP addresses and access list entries are consistent across your systems' devices.

You can search the switch configurations, hardware, and software versions to find the group of switches that require investigation from a single web interface.

Customize Validation Tests for Corporate Compliance and Network Design

HPE Aruba Networking Switch Multi-Edit Software validates compliance to corporate policies and network architecture design, automatically checking the changes to the network.

For example, you can make sure your security settings are always set properly, or make sure your network access lists are consistent and conform to your design.

Automate Configuration Deployment Without the Overhead of Programming

HPE Aruba Networking Switch Multi-Edit Software reduces the risk and impact of errors when deploying multiple configuration changes.

Track the configurations and quickly rollback to a previous configuration if needed.

HPE Aruba Networking Services

HPE Aruba Networking services simplify and accelerate the network technology lifecycle, enabling your network to scale with better predictability and cost-effectiveness. Whether you operate your own network and need to improve your IT efficiencies, or you want to offload some of the burden, we have the services you need to reach your goals.

Learn more about what HPE Services - Aruba Networking has to offer at: hpe.com/edge/services

Support Services

Our support portfolio provides the essential support elements as well as proactive and preventive features to help you improve your team's productivity and get the most from your network. Our support customers benefit from faster issue resolution, simplified operations and efficiencies, and reduced network issues.

Professional Services

With deep intellectual capital and purpose-built tools, our team delivers a range of standard and custom professional services designed to accelerate your value from HPE Aruba Networking technology.

Project based services include:

- Planning, audit, and assessment
- Architecture review and design
- Deployment, migration, and knowledge transfer

Annual subscription services include:

- Network optimization
- Intelligent Operations
- Customer Experience Management

Our [Education Services](#) allow your team to come up to speed quickly.
