

HPE Bar Code Labels

Labeled Media and Services

What's new

- Now includes LTO-7 Ultrium technology

Overview

HPE LTO Ultrium, Super DLT and DLT+tape IV Bar Code Label Packs provide an easy-to-use solution to the aggravation of bar coding.

Under constant pressure to deliver quality of service with limited resources, the last thing IT managers should be worrying about is why their in-house bar code labels aren't working properly or whose turn it is to operate (or run) the departmental label printer. Each HPE label pack of consecutively numbered bar codes contains 100 data labels and 10 cleaning cartridge labels. No two pack sequences are ever identical to avoid data integrity issues in archives. HPE Bar Code Label Packs will be available from most resellers that stock HPE brand media.

Finally, HPE Bar Code Label Packs have been fully tested to guarantee performance in demanding automation environments, so unlike cheaper alternatives, users can be certain that their backups will never be disrupted by bar code quality issues.

Features

Saves Time, Money and Mistakes

Allows staff to focus on more important tasks.

Cost effective bar code labels.

HPE approved labels for maximum reliability.

Simple to apply to all cartridges.
